

Complete and attach to copy of WPT or record DaveNet WPT number.

Return with SureLight® control.

DaveNet WPT number: _____

Installation type:

- New Construction
- Existing Residential
- Commercial

Furnace located in:

- Conditioned Space
- Unconditioned Space

Fuel type:

- Natural Gas
- LP

Have any of the following conditions occurred prior to the repair call?

- Power Outage
- Brown Out
- Lightning Storm
- Other, Explain

Room thermostat setting when problem occurred:

- Heating
- Cooling
- Continuous Fan
- Auto Changeover
- Recovering from setback

What are the measured values on the control prior to replacement?

Line H to C terminal = _____ volts
 Line N to C terminal = _____ volts
 Flame Sense Current = _____ uAmps
 Ignitor resistance = _____ ohms

Other installed equipment:

- Electronic Air Cleaner
- Humidifier
- Other IAQ products

Describe any unusual electrical systems in the home:

Place an "X" in the box(es) that apply.

Symptom	Control Output				
	Ignitor	Inducer	Gas Valve	Indoor Blower	High Stage
"ON" when it should be "OFF"					
"OFF" when it should be "ON"					
Intermittent Output					
Continuous Output					

- Ignitor glows but no ignition
- No flame sensed after gas ignition
- Flame sensed w/o flame present
- Other (Explain: _____)

Diagnostic flash code reported on board prior to de-energizing power:

- | | |
|--|-------------------------------------|
| Diag No. 1 | Diag No. 2 |
| <input type="checkbox"/> Off | <input type="checkbox"/> Off |
| <input type="checkbox"/> On | <input type="checkbox"/> On |
| <input type="checkbox"/> Slow flash | <input type="checkbox"/> Slow flash |
| <input type="checkbox"/> Fast flash | <input type="checkbox"/> Fast flash |
| <input type="checkbox"/> Flashing simultaneously | |
| <input type="checkbox"/> Flashing alternately | |
