

**BLOWER MOTOR
NOMINAL EFFICIENCIES**

General

A variety of blower motors from various suppliers are available as factory-installed options. These options are 60 Hz, three phase motors rated for 600 volts or less. Table 1 shows the nominal full load efficiency for each motor option. Premium efficiency motors may be eligible for rebates (utility company, government, etc.).

The high efficiency blower motors meet or exceed the nominal efficiency levels for a NEMA 60 Hz premium efficiency electrical motor rated 600 volts or less.

In addition, all 5 Hp and larger blower motors meet or exceed the nominal efficiency levels for a NEMA 60 Hz premium efficiency electrical motor rated 600 volts or less.

TABLE 1

Motor Efficiency	Horse-power	Voltage	NEMA Designation	NEMA Nominal Efficiency (%)
Std.	1.0	230	56H	85.5
Std.	1.0	460	56H	85.5
Std.	1.0	575	56H	85.5
Std.	1.5	230	56H	86.5
