ELITE®
SERIES

072-090-120-150 Models

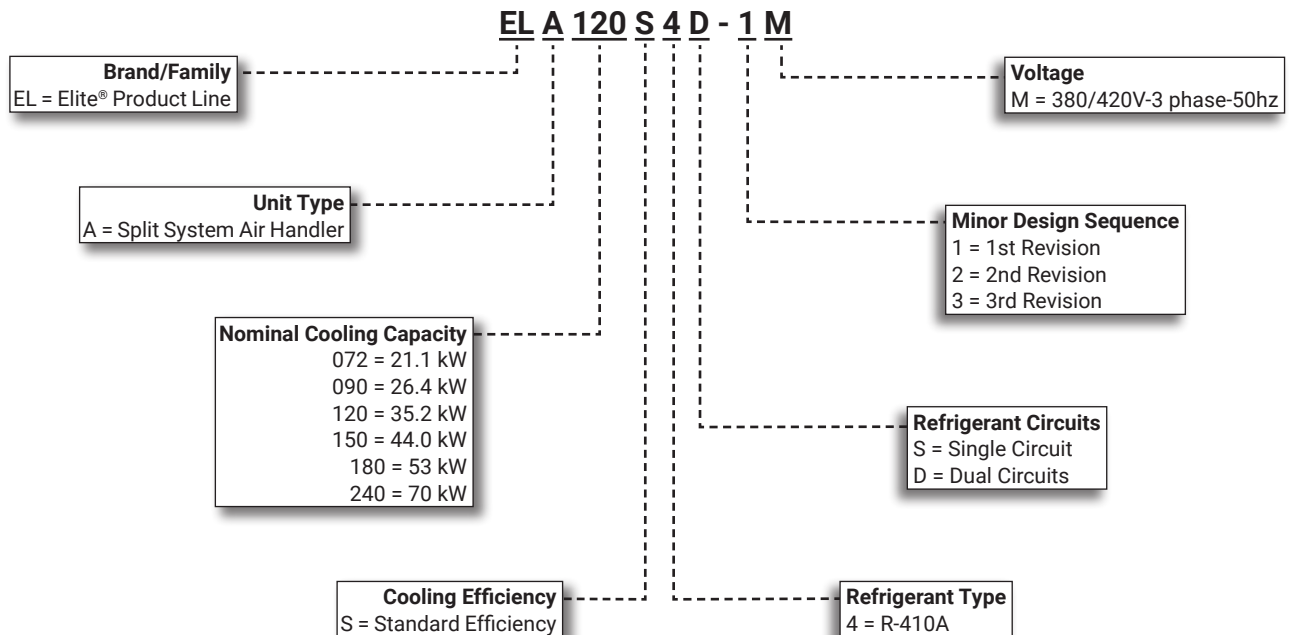

180-240 Models

Nominal Capacity - 21.1 to 70 kW
Optional Electric Heat - 7.6 to 25.5 kW

MODEL NUMBER IDENTIFICATION

FEATURE HIGHLIGHTS

1. Multi-Circuit, Copper Tube Coil
2. Expansion Valve
3. Refrigerant Piping and Drain Connections
4. External Filter Rack
5. Belt Drive Blowers
6. MSAV® (Multi-Stage Air Volume)
7. Control Box
8. Heavy Gauge Steel Cabinet
9. Corrosion Resistant Drain Pan

180-240 Models

072-090-120-150 Models

APPROVALS

APPROVALS

- Tested with matching air conditioners and heat pump units in the Lennox Research Laboratory environmental test room in accordance with AHRI Standard 340/360 while operating at rated voltage and air volumes
- Blower data is from unit tests conducted in the Lennox Laboratory air test chamber
- Components bonded for grounding to meet safety standards for servicing required by Underwriters Laboratories (UL) and the International Electrotechnical Commission (IEC)
- International Organization for Standardization (ISO) 9001 Registered Manufacturing Quality System

FEATURES AND BENEFITS

APPLICATIONS

- The Elite® Series 21.1 to 70 kW large split system air handlers combine MSAV® (Multi-Stage Air Volume) and up to two stages of cooling to provide temperature control and enhanced humidity control
- Provides installation versatility in a variety of applications
- Superior efficiency in air conditioning and heat pump applications with enhanced air handling and filtering
- Easy to field service
- Equipped with single circuit (072) or dual-circuit (090-240) indoor coils
- Suitable for application with Lennox 21 to 70 kW ELS air conditioners or 7.5 and 10 kW ELP heat pump outdoor units
- Convertible upflow or horizontal design
- Each refrigerant circuit has a dedicated expansion valve
- 090-240 models have a dual distribution system for two stage capacity control
- Shipped factory assembled ready to install
- Standard static blower drive is furnished factory installed
- Low or high static drive options are available as factory installed options
- See Blower Drive Specifications Table for selections

REFRIGERATION SYSTEM

- 1 Multi-Circuit, Copper Tube Coil**
 - Extra large surface area of Lennox designed coil provides maximum cooling efficiency, excellent heat transfer and low air resistance
 - Coils on 090-240 models are face split with separate circuits, each circuit has its own expansion valve
 - Precise circuiting gives uniform refrigerant distribution.
 - Lennox fabricated coil is constructed of precisely spaced ripple edged aluminum fins fitted to durable seamless, rifled copper tubes
 - Rifled tubing provides enhanced heat transfer which results in maximum coil performance when combined with the Lennox fin design
 - Fins are strengthened to resist bending and are equipped with collars that grip tubing for maximum contact area
 - Flared tubing connections and silver soldering provide tight, leakproof joints

- Long life copper tubing is corrosion-resistant and easy to field service
- Coil is thoroughly factory tested under high pressure to ensure leakproof construction

- 2 Expansion Valve**

- For use with R-410A systems
- Factory installed and piped
- Multi-circuit coils are equipped with one thermal expansion valve per circuit
- Valves are sized for best performance
- 090 and 120 models have internal check valves for use with heat pump systems

Freezestats

- Protects the evaporator coil from damaging ice build-up due to conditions such as low/no air flow, or low refrigerant charge

- 3 Refrigerant Piping and Drain Connections**

- Refrigerant line inlets (knockouts) are provided on both sides of the cabinet
- Refrigerant lines require sweat connections and are made internal to the cabinet
- Condensate drain outlet extends outside the cabinet for ease of connection
- Condensate drain can be relocated to other side of cabinet and can be repositioned for horizontal air flow applications

Options/Accessories

Field Installed

Float Switch Kit

- Float switch interrupts cooling operation if excessive condensate collects in the drain pan.

Heat Pump Check Valve Kit (240 Models Only)

- Contains two valve assemblies that field convert the coil to allow it to be matched with two ELP090 heat pump outdoor units

FEATURES AND BENEFITS

INDOOR AIR QUALITY

4 External Filter Rack

- Filter rack design permits quick and easy removal of filters for servicing
- Heavy-gauge galvanized steel cabinet is completely insulated with thick, foil-faced fiberglass insulation and painted to match the unit
- Furnished and shipped inside the unit for field installation
- Must be field assembled
- 51 mm thick, MERV 8 pleated media filters are furnished as standard

Options/Accessories

Field Installed

Healthy Climate® Air Filters

- Disposable MERV 8 or high efficiency MERV 13 (Minimum Efficiency Reporting Value based on ASHRAE 52.2) efficiency 4-inch pleated filters
- 102 mm pleated filters offer longer filter life and better filtration efficiency compared to standard 51 mm filters

102 mm External Filter Mounting Kits

- Required for use with Health Climate MERV 8 or MERV 13 filters. Kit includes filter rack for 102 mm filters. Must be field assembled

BELT DRIVE BLOWERS

- 072-090-120-150 models are equipped with a single blower wheel
- 180 and 240 models have dual blower wheels
- 5 • Centrifugal belt driven blowers deliver large air volumes quietly and with low power consumption
- Blower wheels are heavy-duty, with forward curved blades and double inlet
- Wheels are statically and dynamically balanced to eliminate vibration and designed to give maximum air delivery
- Bearings are heavy-duty, permanently sealed and lubricated
- Belt tension is automatically controlled by auto tensioning device
- Adjustable motor pulley allows speed adjustments
- Standard static drive is furnished factory installed
- See Blower Drive Specifications table for optional factory installed low and high static drives available

6 MSAV® (Multi-Stage Air Volume)

- Variable frequency drive (VFD) and control stages the supply air blower airflow
- Designed for use on dual-stage split systems the VFD alters the frequency and voltage of the power supply to control blower motor speed and airflow
- Supply air blower has two speeds:
 1. Low speed for part-load cooling operation

NOTE - Low speed is 66% of high speed.

2. High speed for full load cooling and all heat modes

- Full speed blower operation is set by adjusting the motor pulley to deliver the desired air volume
- The ventilation speed is selectable between high and low speed

NOTE - Part load airflow in cooling mode on MSAV® units should not be set below 220 cfm/nominal full load ton to reduce the risk of evaporator coil freeze-up.

- Lower operating costs are obtained when the blower is operated on lower speeds

MSAV® Sequence of Operation

- Ventilation speed is determined by the VENT SPEED switch setting on VFD control board (LO or HI)
- Blower operates in low speed for mechanical cooling (Y1)
- Blower operates in high speed for any other mode (free cooling, mechanical cooling Y1+Y2, and heating)
- Economizer damper minimum position is fully closed in unoccupied mode
- In occupied mode, the economizer damper minimum position is determined by the setting of the two potentiometers on VFD control board
 - LO SPD MIN POS potentiometer sets the minimum position when blower is operating at low speed
 - HI SPD MIN POS potentiometer sets the minimum position when blower is operating at high speed

Options/Accessories

Factory Installed

Low or High Static Drives

- A choice of optional low or high static drives are available for factory installation
- See Blower Drive Specifications table

CONTROLS

7 Control Box

- Located in separate compartment in unit cabinet
- Low voltage terminal strip factory installed
- Blower contactor furnished and factory installed in control box
- All controls are pre-wired at the factory

NOTE - Freezestat wiring needs to be field wired depending on upflow or horizontal configuration.

Options/Accessories

Field Installed

Thermostat

- Thermostat is not furnished with unit and must be ordered extra
- See page 8, also see individual Thermostat bulletins and Lennox Price Book

Aftermarket Unit Controller Options

- See Options/Accessories table for selection

FEATURES AND BENEFITS

CABINET

- 8 • Heavy-gauge, pre-painted steel for superior rust and corrosion protection
- Completely lined with thick fiberglass insulation resulting in quiet and efficient operation
- Closed-cell foam on top mullion between the blower and coil section reduces heat transfer through cabinet and prevents moisture build-up on outside of cabinet
- Supply and return air duct flanges are furnished for field installation
- Service access provided on three sides of unit
- Large removable panels provide complete service access on one side of unit
- Electrical inlets are conveniently located in the cabinet

9 Drain Pan

- Deep, corrosion resistant plastic drain pan
- Reversible drain pan allows for drain outlets on either end of cabinet and can be repositioned for horizontal air flow applications
- Drain pan is removable from either side in both horizontal and vertical applications
- Blow-off baffle and extended drip shield collects condensate from the coil and directs it to the drain pan

Options/Accessories

Factory Installed

Corrosion Protection

- Polymeric epoxy coating
- Deposited by electrical transport (electrophoresis), using a process known as electrocoat (e-coat)
- Available for enhanced coil corrosion protection
- Blower housing is painted when this option is ordered

Field Installed

Float Switch

- Prevents condensate overflow by turning the unit off when the condensate level is abnormally high

OPTIONS / ACCESSORIES

ELECTRIC HEAT SECTION

Field Installed

- Furnished in a separate add-on matching cabinet
- Mounting hardware is furnished to secure cabinets together
- Pre-punched mounting holes are furnished for aligning electric heat section to air handler supply air flange
- Removable panel permits service access
- Electrical inlet provides wiring entry
- Field installed electric heaters are available in several kW sizes
- See Electric Heat Data table
- Helix wound, nichrome heating elements are exposed directly in the air stream resulting in instant heat transfer, lower coil temperatures and long service life
- Elements are accurately located and insulated from the heavy-gauge steel support frame by high quality insulators
- Elements are equipped with individual limit controls providing positive protection in case of overheating
- Sub-fusing, contactors, control relays, 24V transformer are furnished
- Certain electric heat sizes may be two-stage controlled (with field provided control) with each stage being energized only when required
- See Electric Heat Tables

HOT WATER COIL

Field Installed

- Furnished in a separate add-on matching cabinet
- Mounting hardware is furnished to secure cabinets together
- Pre-punched mounting holes are furnished for aligning hot water cabinet to air handler
- Cabinet is constructed of heavy-gauge galvanized steel
- Completely insulated with thick, foil-faced fiberglass insulation
- Removable panel permits service access
- Cabinet is reversible to allow piping on either side of unit
- Lennox designed and built coil has large face area, excellent heat transfer and low air resistance
- Constructed of precisely spaced ripple-edged aluminum fins fitted to durable copper tubes
- Fins are equipped with collars that grip tubing for maximum contact area
- Flared shoulder tubing connections and silver soldering provide tight, leakproof joints
- Long life copper tubing is easy to field service
- Coil is thoroughly factory tested under high pressure to ensure leakproof construction

NOTE - Valves and pumps must be furnished by installer.

OPTIONS / ACCESSORIES

ECONOMIZER

Field Installed

- Factory assembled and wired economizer dampers and controls are available for field installation
- Heavy-gauge galvanized steel cabinet is completely insulated with thick, matte-faced fiberglass insulation
- Large removable panels on both sides of cabinet provide complete service access
- Mounting flanges provide ease of connection to air handler unit
- Flanges on outdoor air opening and return air opening permit easy duct connection
- Damper linkage and shafts are plated

Standard Economizer Features

- Gear-driven action, return air and outdoor air dampers, plug-in connections to unit, neoprene seals, 24-volt, fully-modulating spring return motor, adjustable minimum damper position

Standard Economizer Control Module

- The Standard Economizer Control Module can be adjusted to operate based on outdoor air temperatures.

Economizer Controls:

- **Damper Minimum Position** - Can be set lower than traditional minimum air requirements resulting in cost savings
- **IAQ Sensor** - Signals dampers to modulate and maintain 13°C when CO₂ is higher than the CO₂ setpoint
- **Demand Control Ventilation (DCV) LED** - A steady green Demand Control Ventilation LED indicates the IAQ reading is higher than setpoint and requires more fresh air
- **Free Cool LED** - A steady green LED indicates outdoor air is suitable for free cooling

NOTE - Free Cooling runs when outdoor air temperature is lower than the set temperature on the economizer control.

NOTE: The Free Cooling default setting for outdoor air temperature sensor is 13°C.

High Performance Economizer Features

- ASHRAE 90.1-2010 compliant
- Gear-driven action, high torque 24-volt fully-modulating spring return damper motor, return air and outdoor air dampers, plug-in connections to unit, nylon bearings, enhanced neoprene blade edge seals and flexible stainless steel jamb seals to minimize air leakage

High Performance Economizer Control Module

- Module provides inputs and outputs to control economizer based on parameter settings
- Module automatically detects sensors by polling to determine which sensors are installed in system
- Module displays any alarm messages (fault detection and diagnostics) as an aid in troubleshooting
- Non-volatile memory retains parameter settings in case of power failure
- Keypad with four navigation buttons and LCD screen is furnished for setting economizer parameters
 - Menu Up/Exit (⬆) button returns to the main menu.
 - Arrow Up (▲) button moves to the previous or next parameter within the selected menu
 - Arrow Down (▼) button moves to the next parameter within the selected menu
 - Select (enter) (↵) button confirms parameter selection

Main Menu Structure:

- STATUS (economizer and system operation status)
- SETPOINTS (settings for various setpoint parameters)
- SYSTEM SETUP (settings/information about the system)
- ADVANCED SETUP (freeze protection, CO₂ settings, stage 3 delay and additional calibration settings)
- CHECKOUT (damper positions)
- ALARMS (output signal that can be configured for remote alarm monitoring)

NOTE - The free cooling setpoint must be set based on the Climate Zone where the system is installed. Refer to Installation Instructions for complete setup information and menu parameters available.

Differential Enthalpy Control

- Allows the outdoor air enthalpy control to select between outdoor air or return air, whichever has lower enthalpy
- Field installed in economizer damper section

Single Enthalpy Temperature Control

- Outdoor air enthalpy sensor enables Economizer if the outdoor enthalpy is less than the setpoint of the control

OPTIONAL CONVENTIONAL TEMPERATURE CONTROL SYSTEMS

ComfortSense® 7500 Commercial 7-Day Programmable Thermostat

- Four-Stage Heating / Two-Stage Cooling
- Universal Multi-Stage
- Intuitive Touchscreen Interface
- Automatic Changeover between Heating and Cooling
- Full Seven-Day Programming
- Four Time Periods Per Day
- Temperature and Humidity Control
- One-Touch Away Mode
- Holiday Scheduling
- Smooth Setback Recovery (SSR)
- Performance Reports
- Notifications/Reminders
- Dehumidification/Humiditrol® Control for Split Systems and Rooftop Units
- Economizer Relay Control
- Backlit Display
- Wallplate Furnished
- FDD, ASHRAE and IECC Compliant

ComfortSense® 3000 Commercial 5-2 Day Programmable Thermostat

- Two-Stage Heating / Two-Stage Cooling
- Conventional Systems
- Intuitive Interface
- 5-2 Day Programming
- Program Hold
- Remote Indoor Temperature Sensing
- Smooth Setback Recovery (SSR)
- Economizer Relay Control
- Maintenance/Filter/Service Reminders
- Backlit Display
- Wallplate Furnished
- Simple Up and Down Temperature Control

ComfortSense® Non-Programmable Thermostat

- One-Stage Heating / Cooling
- Conventional Systems
- Intuitive Interface
- Manual Changeover
- Backlit Display
- Simple Up and Down Temperature Control

OPTIONAL CONVENTIONAL TEMPERATURE CONTROL SYSTEMS

Description	Model No.	Catalog No.
ComfortSense® 7500 Commercial 7-Day Programmable Thermostat	C0STAT06FF2L	17G74
Universal thermostat locking guard (clear)	C0MISC15AE1-	39P21
Temperature Sensors	1 Remote non-adjustable wall-mount 20k	C0SNZN01AE2-
	1 Remote non-adjustable wall-mount 10k	C0SNZN73AE1-
	Remote non-adjustable discharge air (duct mount)	C0SNDC00AE1-
	Outdoor temperature sensor	C0SNSR03AE1-
		47W36
		47W37
		19L22
		X2658

¹ Remote wall-mount sensors can be applied in any of the following combinations:

- One Sensor - (1) 47W36
- Two Sensors - (2) 47W37
- Three Sensors - (2) 47W36 and (1) 47W37
- Four Sensors - (4) 47W36
- Five Sensors - (3) 47W36 and (2) 47W37

ComfortSense® 3000 Commercial 5-2 Day Programmable Thermostat	C0STAT05FF1L	11Y05
Thermostat wall mounting plate	C0MISC17AE1-	X2659
Temperature Sensor	Remote non-adjustable wall mount 10k averaging	C0SNZN73AE1-
ComfortSense® Non-Programmable Thermostat	C0STAT12AE1L	51M32

UNIT CLEARANCES

TOP OR END VIEW
(Depending on Application)

INSTALLATION CLEARANCES (WITH ELECTRIC HEAT)

- Cabinet – 0 in. (0 mm)
- To Plenum – 0 in. (0 mm)
- To Outlet Duct within 3 feet (914 mm) – 0 in. (0 mm)

RECOMMENDED SERVICE CLEARANCES

1 Filter Removal and Routine Maintenance:
36 in. (914 mm)

1 Service Clearance for Drain Pan Removal:
ELA072, ELA090 – 57 in. (1448 mm)
ELA120, ELA150 – 73 in. (1854 mm)
ELA180, ELA240 – 102 in. (2590 mm)

2 Coil Cleaning (Upflow):
All models – 36 in. (914 mm)

3 Alternate Coil Cleaning:
Provide 36 in. (914 mm) on this side if top/rear access is obstructed

3 Alternate Drain/Refrigerant Line Location:
Allow additional clearance if refrigerant or drain lines are routed from this side of cabinet.

4 Freestanding Operation With Filter Rack But Without Return Air Duct:
All models - 24 in. (610 mm)

SIDE VIEW (Upflow)

SIDE VIEW (Horizontal)

Standard	810 - 1036	5.6	5.6	7.5	7.5	---	---	---	---	---	S
High	963 - 1232	5.6	5.6	7.5	7.5	---	---	---	---	---	O

NOTE - Using total air volume and system static pressure requirements, determine from blower performance tables Rev/min and motor horsepower required. Maximum usable horsepower of motors furnished by Lennox are shown. If motors of comparable horsepower are used, be sure to keep within the service factor limitations outlined on the motor nameplate.

S - Factory installed standard

O - Factory Installed with extended lead time.

1 Nominal kW based on 400V/3ph/50hz.

2 Electric heater capacity only - does not include additional blower motor heat capacity.

3 Refer to local codes to determine wire, fuse and disconnect size requirements. Use wires suitable for at least 75°C (167°F).

4 Heating, Air Conditioning, Refrigeration type breaker or fuse.

SPECIFICATIONS - HOT WATER COIL

DIMENSIONS

TYPICAL SUPPORT METHOD FOR AIR HANDLER WITH HEAT SECTION IN HORIZONTAL POSITION

NOTES:

1. Ensure support rails do not interfere with ducting, plumbing or electrical connections.
2. Ensure support rods do not interfere with filter access or duct connections.
3. When hot water or electric heat section is installed, additional support underneath these accessories will be required.
4. Support rods and rails are field supplied.

¹ NOTE-Opening same top and bottom.
