

T-CLASS™ ROOFTOP UNIT - 50HZ
24.8 to 38.8 kW (84,800 to 132,700 Btuh)

Bulletin No. 490106

August 2005

Supersedes December 2004

TCA120
 Shown With Optional Economizer

NOTE - Due to Lennox' ongoing commitment to quality, Specifications, Ratings and Dimensions subject to change without notice and without incurring liability. Improper installation, adjustment, alteration, service or maintenance can cause property damage or personal injury. Installation and service must be performed by a qualified installer and servicing agency.

MODEL NUMBER IDENTIFICATION

FEATURES AND BENEFITS

PERFORMANCE/QUALITY

Components bonded for grounding to meet safety standards for servicing required by Underwriters Laboratories (UL) and the International Electrotechnical Commission (IEC). Cooling performance is rated at test conditions included in Air-Conditioning and Refrigeration Institute (ARI) Standard 340/360-2000 while operating at rated voltage and air volumes. International Organization for Standardization (ISO) 9001 Registered Manufacturing Quality System.

COOLING SYSTEM

Designed to maximize sensible and latent cooling performance at design conditions. System can operate from -1°C (30°F) to 52°C (125°F) without any additional controls.

Compressors

Resiliently mounted on rubber grommets for quiet operation. Copeland Scroll™ compressors on all models for high performance, reliability and quiet operation.

Thermal Expansion Valves

Assures optimal performance throughout the application range. Removable element head.

Freezestats

Protects the evaporator coil from damaging ice build-up due to conditions such as low/no air flow, or low/no refrigerant charge.

Filter/Driers

High capacity filter/drier protects the system from dirt and moisture.

Coil Construction

Copper tube construction, enhanced rippled-edge aluminum fins, flared shoulder tubing connections, silver soldered construction for improved heat transfer. Factory leak tested.

Evaporator Coil

Face split with separate circuits. Each circuit has its separate expansion valve, compressor and refrigerant charge. Enhanced aluminum fins and copper tube coils with cross row circuiting optimizes both sensible and latent cooling capacity.

Condenser Coil

Formed type on all models. Ripple-edged, enhanced aluminum fin and copper tube construction maximizes heat transfer capability.

Condensate Drain Pan

Painted, galvanized pan with positive slope. Drain connection extends outside unit.

Outdoor Coil Fan Motors

Thermal overload protected, totally enclosed, permanently lubricated ball bearings, shaft up, independent motor mount.

Outdoor Coil Fans

Polyvinyl Chloride (PVC) coated fan guard furnished.

REQUIRED SELECTIONS

Cooling Capacity - Specify the nominal cooling capacity of the unit.

ACCESSORIES

Field Installed

High Pressure Switches - Protects the compressor from overload conditions such as dirty condenser coils, blocked refrigerant flow, or loss of outdoor fan operation.

Compressor Crankcase Heaters - Protects against refrigerant migration that can occur during low ambient operation.

Condensate Drain Trap - Available in copper or polyvinyl chloride (PVC).

Low Ambient Kit - Cycles the outdoor fan while allowing compressor operation in the cooling cycle. This intermittent fan operation allows the system to operate without icing the evaporator coil and losing capacity. Designed for use in ambient temperatures no lower than -17.8°C (0°F).

BLOWER

Supply air fan provides a wide range of air flow capability. Special order high and low static motor and drive options are available offering an even wider range of capability.

Supply Air Motor

Overload protected with permanently lubricated ball bearings ensures durable operation. Special order high and low static motors provide a higher level of air performance for demanding applications.

Supply Air Blower

A double inlet wheel with forward curve blades provide maximum air performance and quiet operation. Dynamically balanced with permanently lubricated ball bearings assure long, reliable operation. Adjustable pulleys allow air to be precisely tuned to the needs of the application.

OPTIONS

Factory Installed

High and Low Static Supply Fan - Extends air flow external static range.

CONTROLS

UNIT CONTROLLER

Solid-state microprocessor-based control board that provides flexible control of cooling functions. All control voltage is provided via a 24V (secondary) transformer with built-in circuit breaker protection. Built-in functions include:

Blower On/Off Delay - Time delay between blower on and off cycles provides a more even supply air temperature during heating.

Built-in Control Parameters - Saves installation time as no programming is required.

Minimum Compressor Run Time - Ensures proper oil return to the compressor.

Night Setback Mode - Saves energy by closing outdoor air dampers and operating supply fan on thermostat demand only.

Heat/Cool Staging - Capable of up to 2 heat / 2 cool staging with a third party DDC control system or thermostat.

Thermostat Bounce Delay - Protects compressor from short cycling when a mechanical thermostat is used.

ACCESSORIES

Field Installed

Blower Proving Switch - Uses a static pressure sensor to monitor blower operation and shuts down unit if blower fails.

Control Systems - See Page 18.

Dirty Filter Switch - Senses static pressure increase indicating dirty filter condition.

Smoke Detector - Photoelectric type, installed in supply air section or return air section or both sections.

FEATURES AND BENEFITS

CABINET

Construction

Heavy-gauge steel panels and full perimeter heavy-gauge galvanized steel base rail provides structural integrity for transportation, handling, and installation. Base rails have rigging holes. Three sides of the base rail have fork slots. Raised edges around duct and power entry openings in the bottom of the unit provide additional protection against water entering the building.

Air-Flow Choice

Units are available in down-flow (vertical) or horizontal air flow configuration with optional field installed Horizontal Conversion Kit.

Duct Flanges

Horizontal supply duct flange is standard on all units.

Power Entry

Electrical lines can be brought through the unit base or through horizontal access knock-outs.

Exterior Panels

Constructed of heavy-gauge, galvanized steel with a two-layer enamel paint finish. Large removable panels provide service access.

Insulation

All panels adjacent to conditioned air are fully insulated with non-hygroscopic fiberglass insulation. Unit base is fully insulated. The insulation also serves as an air seal to the roof curb, eliminating the need to add a seal during installation.

Access Panels

Access panels are provided for the economizer/filter section, blower section, heating section and the compressor/controls section.

REQUIRED SELECTIONS

Air Flow Configuration - Specify horizontal or down-flow.

OPTIONS / ACCESSORIES

Factory Installed

Corrosion Protection - A completely flexible immersed coating with an electrodeposited dry film process. (AST ElectroFin™ E-Coat). Meets Mil-spec MIL-P-53084, American Society for Testing and Materials (ASTM) B117 Standard Method Salt Spray Testing, ASTM 1153 Standard Specification for Methyl Isobutyl Ketone. Shall be available as an option for enhanced corrosion protection.

Field Installed

Coil Guards - Painted, galvanized steel wire guards to protect outdoor coil. Not used with Hail Guards.

Hail Guards - Constructed of heavy gauge steel, painted to match cabinet, helps protect outdoor coils from hail damage. Not used with Coil Guards.

Horizontal Conversion Kit - Two piece duct cover kit blocks off unit down flow supply air opening, horizontal return air opening panel (on unit) is moved to block off down flow return air opening for horizontal applications.

ELECTRICAL

ACCESSORIES

Field Installed

Electric Heat - Helix wound nichrome elements, time delay for element staging, individual element limit controls, heaters 22.5 kW and larger can be two-stage controlled. The following must be ordered with electric heat: Unit Fuse Block, LBT2 Terminal Block, and control kit. See Electric Heat Accessories tables for ordering information, Pages 15.

AIR FILTERS

Disposable 51 mm (2 inch) pleated MERV 7 filters (Minimum Efficiency Reporting Value based on American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) 52.2) meet the requirements for ASHRAE 62 for improved indoor air quality.

ACCESSORIES

Field Installed

MERV 11 Filters - Disposable 51 mm (2 inch) pleated, high-efficiency MERV 11 filters (Minimum Efficiency Reporting Value based on ASHRAE 52.2).

SERVICEABILITY

Designed to streamline general maintenance and decrease troubleshooting time.

Marked & Color-Coded Wiring

All electrical wiring is color-coded and marked to identify which components it is connecting.

Electrical Plugs

Positive connection electrical plugs are used to connect common accessories or maintenance parts for easy removal or installation.

Access Panels

Large access panels are provided for quick and easy access to maintenance areas.

Blower Access

Blower assembly slides out of the unit for easy access.

TXV Access

Thermal expansion valves are located near the perimeter of the unit for easier access.

Thermal Expansion Valves

Removable element head allows change out of element and bulb without removing the TXV.

Standard Components

A large number of common maintenance parts are standard throughout the entire range of sizes (26 to 44 kW), reducing the need to carry a lot of different parts to the job or in inventory.

Compressor Access

Compressors are located near the perimeter of the unit for easier access.

Compressor Compartment

Compressors are isolated from the condenser air flow allowing system operation checks to be done without changing the air flow across the outdoor coils.

OPTIONS / ACCESSORIES

ECONOMIZER / OUTDOOR AIR / EXHAUST AIR

Factory or Field Installed

Economizer - Parallel, gear-driven action return air and outdoor air dampers, plug-in connections to unit, nylon bearings, neoprene seals, 24 volt, spring return motor, adjustable minimum damper position, damper assembly slides in unit, outdoor air hood must be ordered separately, choice of economizer controls. Three-position economizer opens fully to use outdoor air for free cooling when outdoor air is suitable and opens to minimum position during the occupied time period. Optional Modulating Economizer Sensor Kit may be used to modulate dampers to maintain a 13°C (55°F) discharge air temperature.

Down-Flow Barometric Relief Dampers - Allows relief of excess return air static when economizer is near full open. Aluminum blade dampers prevent blow back and outdoor air infiltration during off cycle. Bird screen furnished.

Outdoor Air Hood - Required with Economizer and Outdoor Air Damper Sections. Two cleanable aluminum mesh fresh air filter furnished. Available factory installed when ordered with a factory installed single enthalpy economizer or field installed with all other economizer and outdoor air damper selections.

Field Installed

Economizer Controls

Single Sensible Control - Senses outdoor air temperature and enables the economizer if the temperature is less than the set point of the control.

Differential Sensible Control - Two temperature sensors allow the control to compare the outdoor air and return air and using setpoints, enables the economizer when the outdoor air is cooler than the return air.

Single Enthalpy Control - Outdoor air enthalpy sensor enables economizer if the outdoor enthalpy is less than the setpoint of the control.

Differential Enthalpy Control - Two solid-state enthalpy sensors allow the control to select between outdoor air or return air, whichever has lower enthalpy.

Economizer Modulating Sensor Kit - Sensor that allows the economizer damper to modulate to maintain 13°C (55°F) discharge air temperature, while in free-cooling.

Outdoor Air Damper Section

25% Motorized Outdoor Air Damper - Parallel blade, gear-driven dampers are automatically adjusted with a two-position damper motor.

25% Manual Outdoor Air Dampers - Parallel blade dampers are manually adjustable to a fixed position.

Economizer and Outdoor Air Damper Application Note

Minimum mixed air temperature in heating mode -1°C (30°F)

Maximum mixed air temperature in cooling mode: 32°C (90°F)

Down-Flow Barometric Relief Damper Hood

- Protects exhaust air from recirculating into outdoor air stream.

Horizontal Barometric Relief Dampers

- Allows relief of excess air when economizer is near full open. Aluminum blade dampers prevent blow back and outdoor air infiltration during off cycle. Field installed in return air duct. Bird screen and hood furnished. Two dampers per order number.

Power Exhaust Fan - Installs internal to unit for down-flow applications with economizer option. Provides exhaust air pressure relief. Interlocked to run when supply air blower is operating. Fan runs when outdoor air dampers are 50% open (adjustable). Motor is overload protected. Galvanized steel cabinet and hood painted to match unit. Total air volume is 1980 L/s (4200 cfm) at 0 Pa (0 in. wg.). 249 W (1/3 hp) motor. 300 Watts total input.

Indoor Air Quality (CO₂) Sensor - Monitors CO₂ levels opens economizer dampers to setpoint as needed for Demand Control Ventilation.

CEILING DIFFUSERS

Ceiling Diffusers (Flush and Step-Down models) - Aluminum grilles, large center grille, insulated diffuser box with flanges, hanging rings furnished, interior transition (even air flow), internally sealed (prevents recirculation), adapts to T-bar ceiling grids or plaster ceilings.

Transitions (Supply and Return) - Used with diffusers, installs in roof curb, galvanized steel construction, flanges furnished for duct connection to diffusers, fully insulated.

ROOF CURBS

Standard Roof Curb - Nail strip furnished, mates to unit, US National Roofing Contractors Approved, shipped knocked down. Available in 356 mm (14 inch) and 2610 mm (4 inch) heights.

Cliplock 1000 Roof Curb - Interlocking curb pieces speed assembly. Nail strip furnished. Supports full perimeter of unit. Shipped knocked down. Available in 356 mm (14 inch), 457 mm (18 inch) and 610 mm (24 inch) heights.

BLOWER DATA

BELT DRIVE BLOWER - BASE UNIT

BLOWER TABLE INCLUDES RESISTANCE FOR BASE UNIT ONLY (NO HEAT SECTION) WITH DRY INDOOR COIL AND AIR FILTERS IN PLACE. FOR ALL UNITS ADD:

- 1 - Wet indoor coil air resistance of selected unit.
- 2 - Any factory installed options air resistance (heat section, economizer, etc.)
- 3 - Any field installed accessories air resistance (duct resistance, diffuser, etc.)

Then determine from blower table blower motor output and drive required.

See below for blower motors and drives. See page 12 for wet coil and option/accessory air resistance data.

BOLD INDICATES FIELD FURNISHED DRIVE.

¹ Throw is the horizontal or vertical distance an air stream travels on leaving the outlet or diffuser before the maximum velocity is reduced to 15 m (50 ft) per minute. Four sides open.

| | 4 2 | 420 | 34.4 | 117,600 | | | | | | |

NOTE - Nominal kW heat capacity based on 480 volt input. See table for output at other voltages-

¹ Fuse block must be ordered extra. Fuse block must be installed in field installed heaters. Also requires LTB2 Terminal Block. See Optional Electric Heat Accessories tables.

² Refer to local electrical codes to determine wire, fuse and disconnect size requirements. Use wires suitable for at least 167°F (75°C).

³ HACR type breaker or fuse.

⁴ Can be used with two stage control.

³ HACR type breaker or fuse.

⁴ Can be used with two stage control.

INSTALLATION CLEARANCES - MM (INCHES)

NOTE - Top Clearance 1524 mm (60 in.).
NOTE - Entire perimeter of unit base requires support when elevated above mounting surface.

¹ 1524 mm (60 in.) recommended service clearance for blower deck removal

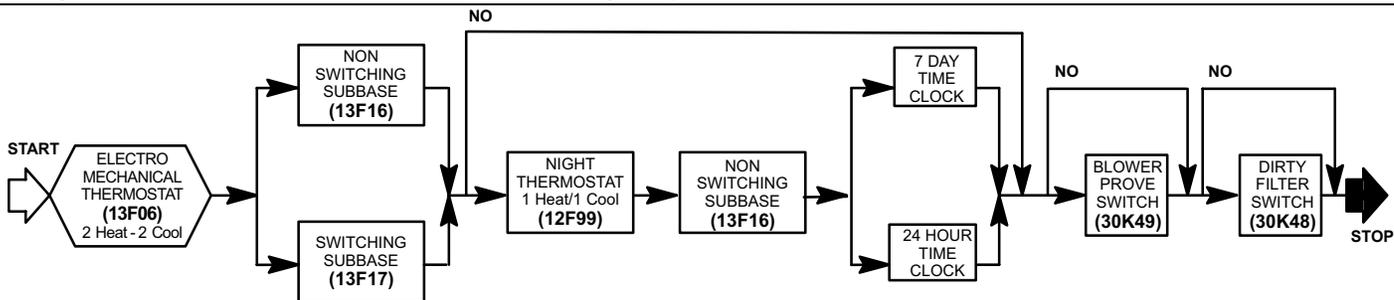

OPTIONAL CONVENTIONAL TEMPERATURE CONTROL SYSTEMS - FIELD INSTALLED

System and Component Description

Field Installed
Catalog No.

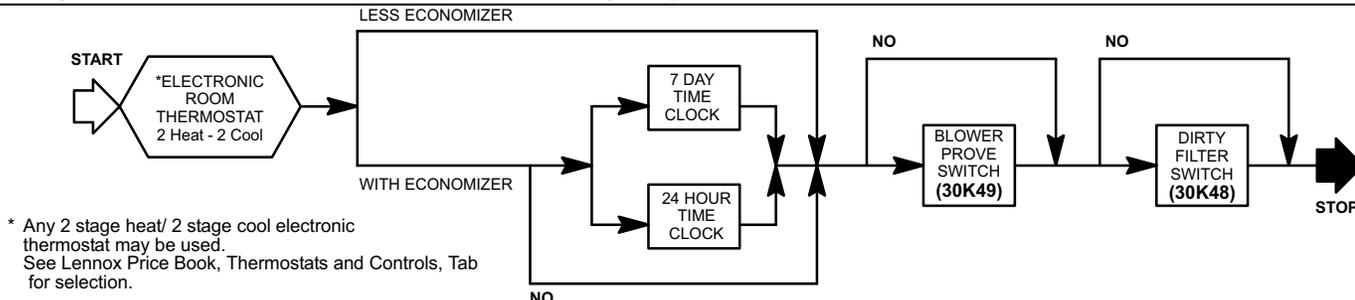

ELECTRO-MECHANICAL THERMOSTAT

| | |
|--|----------------|
| Thermostat - Two stage heat & two stage cool with dual temperature levers, subbase choice | 13F06 |
| Subbase - Manual system switch (Off-Heat-Auto-Cool), fan switch (Auto-On) | 13F17 |
| Subbase - Non-switching | 13F16 |
| Night Setback Operation - Order components below | |
| Heating Thermostat - Single stage heat / Single stage cool | 12F99 |
| Subbase - Non-switching | 13F16 |
| Time Clock - 7 day operation, indicates day and night periods, 2 hour increments, battery back-up | See Price Book |
| Time Clock - 24 hour night setback operation, 15 minute increments, battery back-up | See Price Book |
| Blower Proving Switch - Monitors blower operation, locks out unit in case of blower failure | 30K49 |
| Dirty Filter Switch - Senses static pressure increase indicating a dirty filter condition | 30K48 |

ELECTRONIC THERMOSTAT

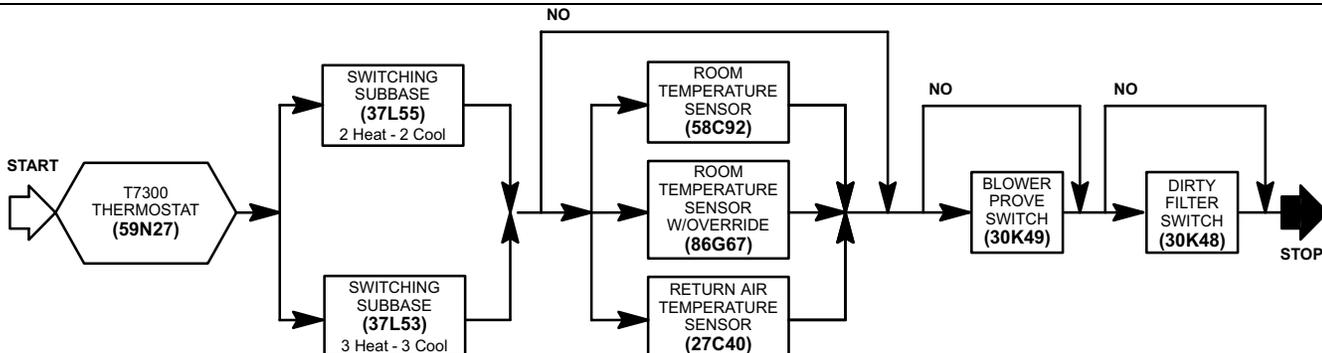

| | |
|--|----------------|
| Electronic Thermostat - Any two stage heat/ two stage cool electronic thermostat may be used. | See Price Book |
| Time Clock - 7 day operation, indicates day and night periods, 2 hour increments, battery back-up | See Price Book |
| Time Clock - 24 hour night setback operation, 15 minute increments, battery back-up | See Price Book |
| Blower Proving Switch - Monitors blower operation, locks out unit in case of blower failure | 30K49 |
| Dirty Filter Switch - Senses static pressure increase indicating a dirty filter condition | 30K48 |

* Any 2 stage heat/ 2 stage cool electronic thermostat may be used.
See Lennox Price Book, Thermostats and Controls, Tab for selection.

PROGRAMMABLE COMMERCIAL THERMOSTAT

| | |
|--|-------|
| Thermostat - Programmable, internal or optional remote temperature sensing (sensor required), touch sensitive keyboard, automatic switching, °F or °C readout, no anticipator, droop/no droop selection, indicator LED's, hour/day programming, override capabilities, time and operational mode readout, stage status indicators, battery back-up, subbase choice, manual system switch (Heat-Off-Auto-Cool), fan switch (Auto-On) | 59N27 |
| Subbase - Selectable staging, indicator LED's, auxiliary relay output for economizer operation | |
| 2 Heat / 2 Cool | 37L55 |
| 3 Heat / 3 Cool | 37L53 |
| Sensor - Room temperature | 58C92 |
| Sensor - Room temperature with 3 hour override and setpoint adjustment | 86G67 |
| Sensor - Return air temperature | 27C40 |
| Blower Proving Switch - Monitors blower operation, locks out unit in case of blower failure | 30K49 |
| Dirty Filter Switch - Senses static pressure increase indicating a dirty filter condition | 30K48 |

ACCESSORY SHIPPING WEIGHTS (add to base unit weight)

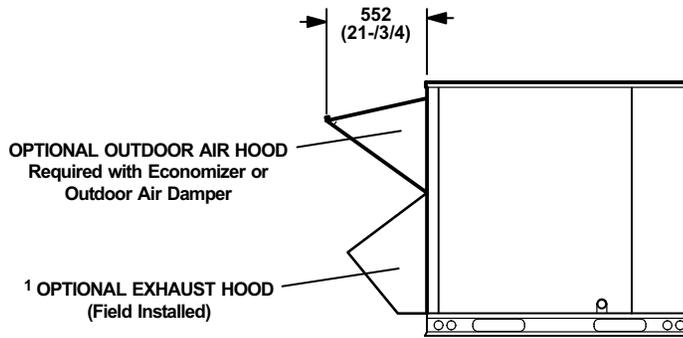

| | | | | | |
|---------------------------|---------------------------------|---------------|--------------------------|---------|----------|
| Electric Heat | See Electric Heat Rating Tables | Power Exhaust | 13 kg | 28 lbs. | |
| Economizer + Hood | 26 kg | 58 lbs. | Less than container load | 48 kg | 105 lbs. |
| Outdoor Air Damper + Hood | 19 kg | 42 lbs. | | | |

Base Unit - Unit with NO OPTIONS.
 Max. Unit - Unit with ALL OPTIONS installed. (Economizer, Power Exhaust Fans and Controls)

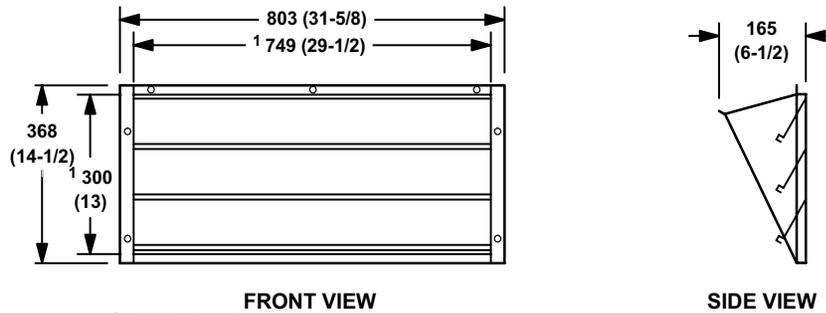

ACCESSORY DIMENSIONS - MM (INCHES)

OPTIONAL OUTDOOR AIR HOOD DETAIL

¹ NOTE — Field Installed in Return Air Duct for Horizontal Applications.

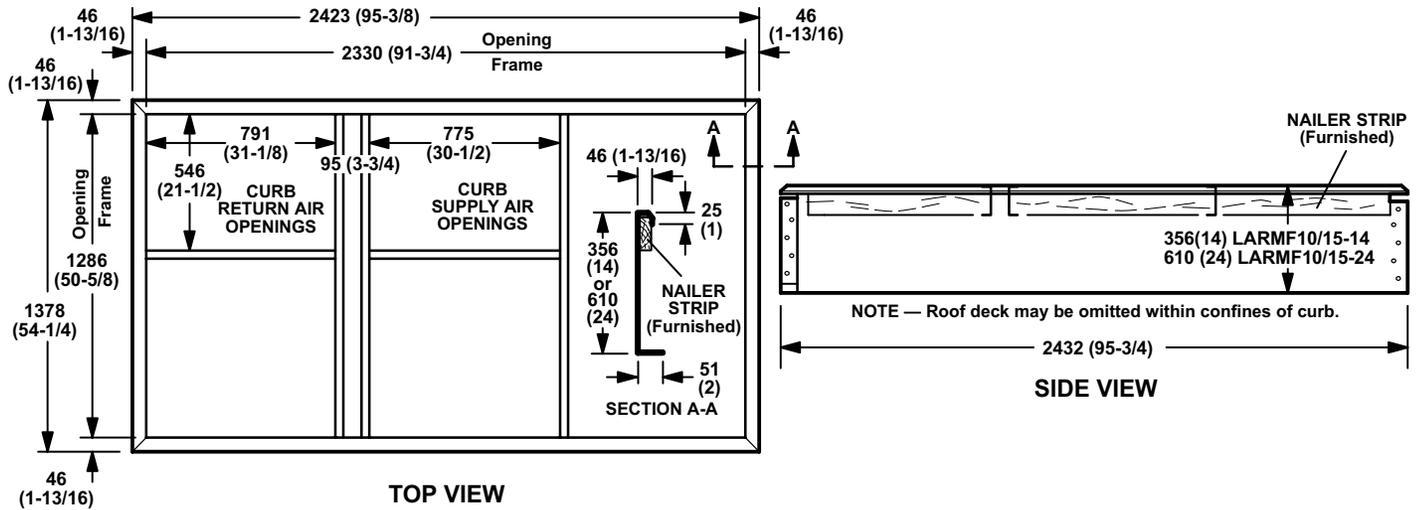

HORIZONTAL BAROMETRIC RELIEF DAMPERS (Field installed in horizontal return air duct adjacent to unit)

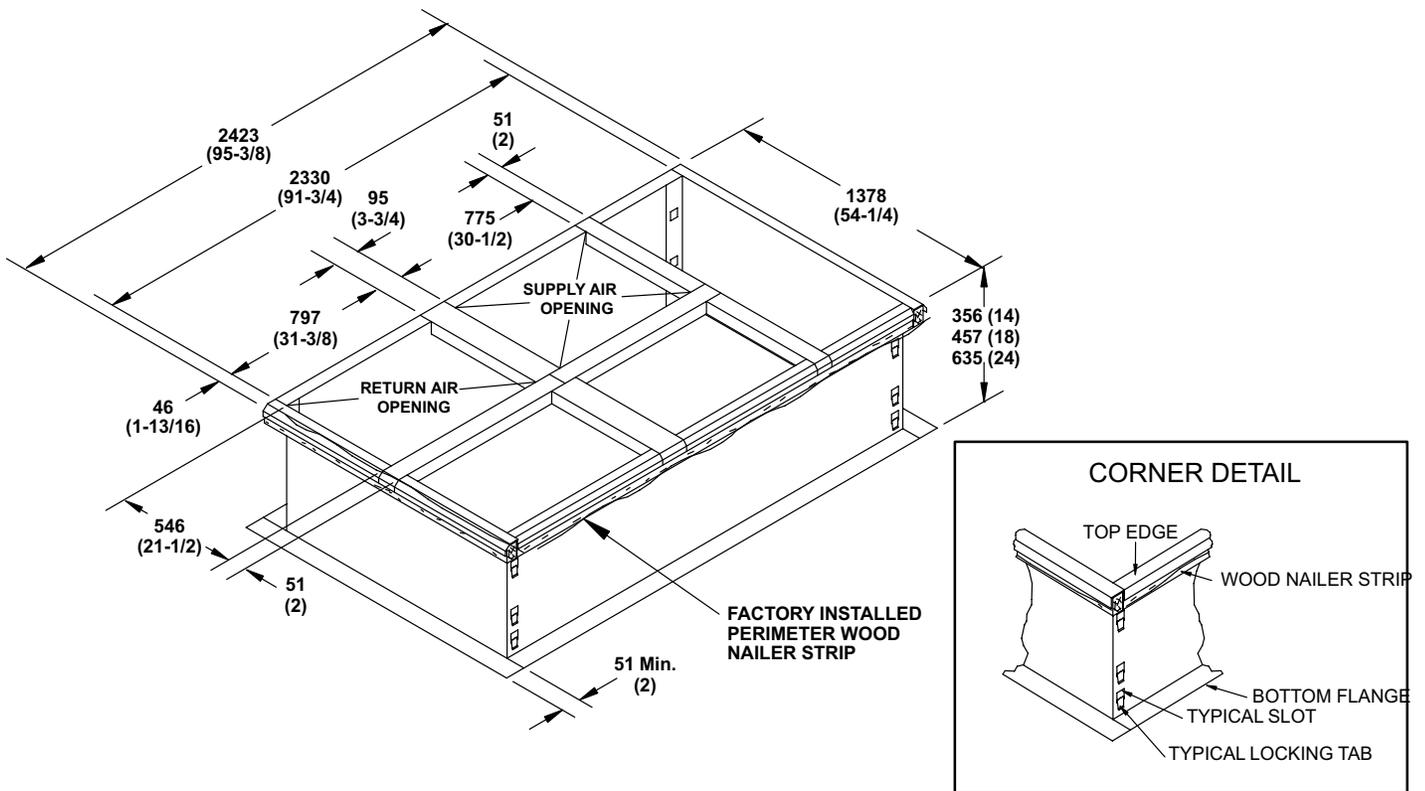

¹ NOTE - Opening size required in return air duct.

ACCESSORY DIMENSIONS - MM (INCHES)

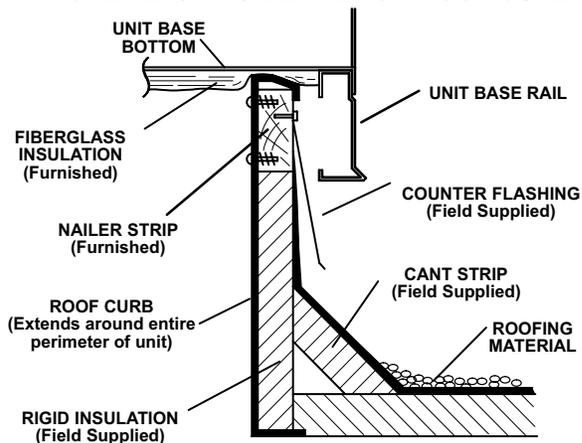

STANDARD ROOF CURBS - DOUBLE DUCT OPENING

CLIPLOCK 1000 ROOF CURBS - DOUBLE DUCT OPENING

TYPICAL FLASHING DETAIL FOR ROOF CURB

ROOF CURB SPECIFICATIONS

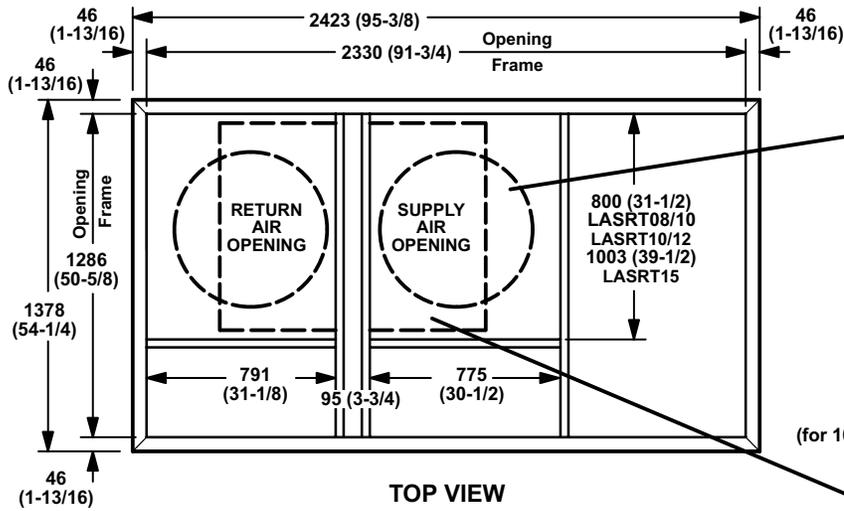

Roof Curb is rigid enough to be spanned over its entire length or cantilevered if supported on both sides of center of gravity.

| Roof Curb | LARMF10/15-14 | LARMF10/15-24 |
|--|------------------|------------------|
| ¹ Moment of inertia (I) (cm ⁴) (in. ⁴) | 1634 (39) | 6639 (160) |
| ¹ Section modulus $\frac{I}{C}$ (cm ³) (in ³) | 90 (5.5) | 512 (13.1) |
| Curb weight. (kg/m) (lb./ft.) of length | 8.2 (5.5) | 12.7 (8.5) |
| Design strength (kPa) (psi) | 137,900 (20,000) | 137,900 (20,000) |

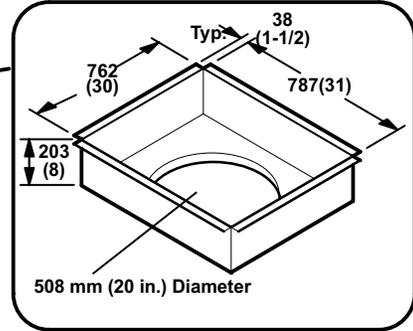

¹ Includes both sides of curb.

ACCESSORY DIMENSIONS - MM (INCHES)

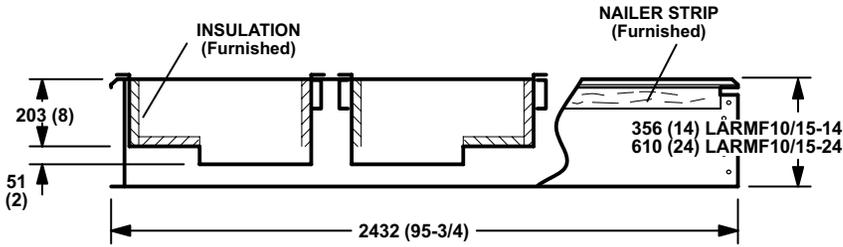

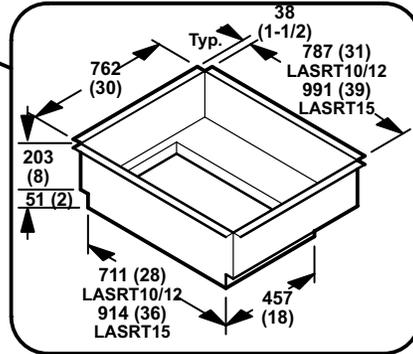

STANDARD ROOF CURBS WITH SUPPLY & RETURN AIR TRANSITIONS FOR CEILING DIFFUSERS

ROUND TRANSITIONS (for 090 models with FD11-95, RTD11-95 Diffusers)

RECTANGULAR TRANSITIONS (for 102 thru 150 models with FD11-135-185, RTD11-135-185 Diffusers)

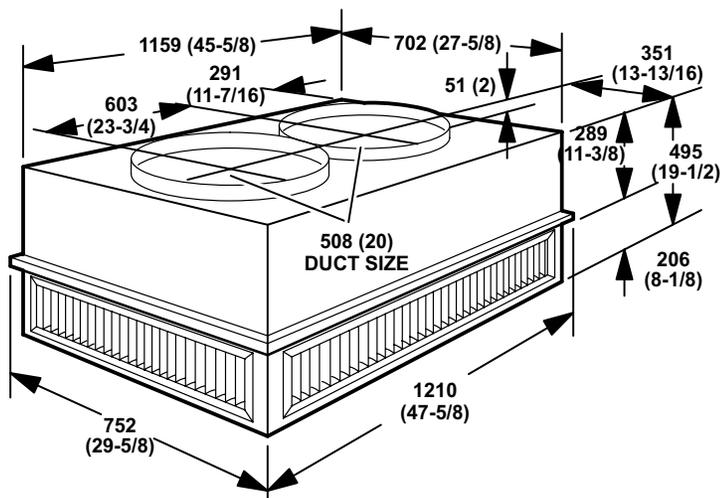

NOTE — Roof deck may be omitted within confines of curb.

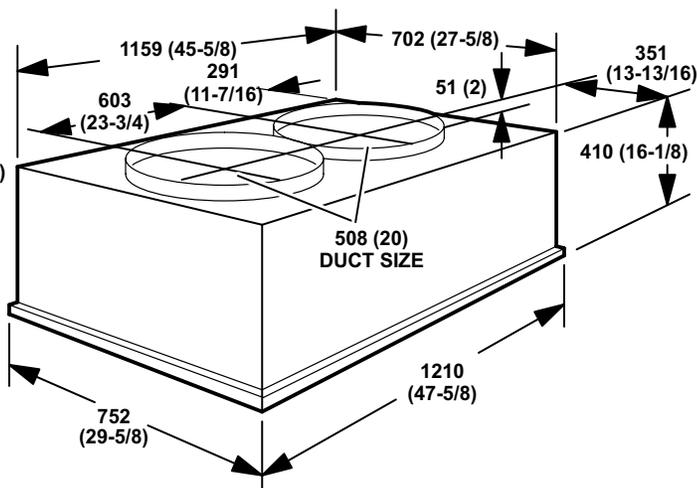

ACCESSORY DIMENSIONS - MM (INCHES)

COMBINATION CEILING SUPPLY AND RETURN DIFFUSERS
