

CBA38MV
 DAVE LENNOX SIGNATURE® COLLECTION
 R-410A Ready - Multi-Position - Variable Speed - 60 Hz

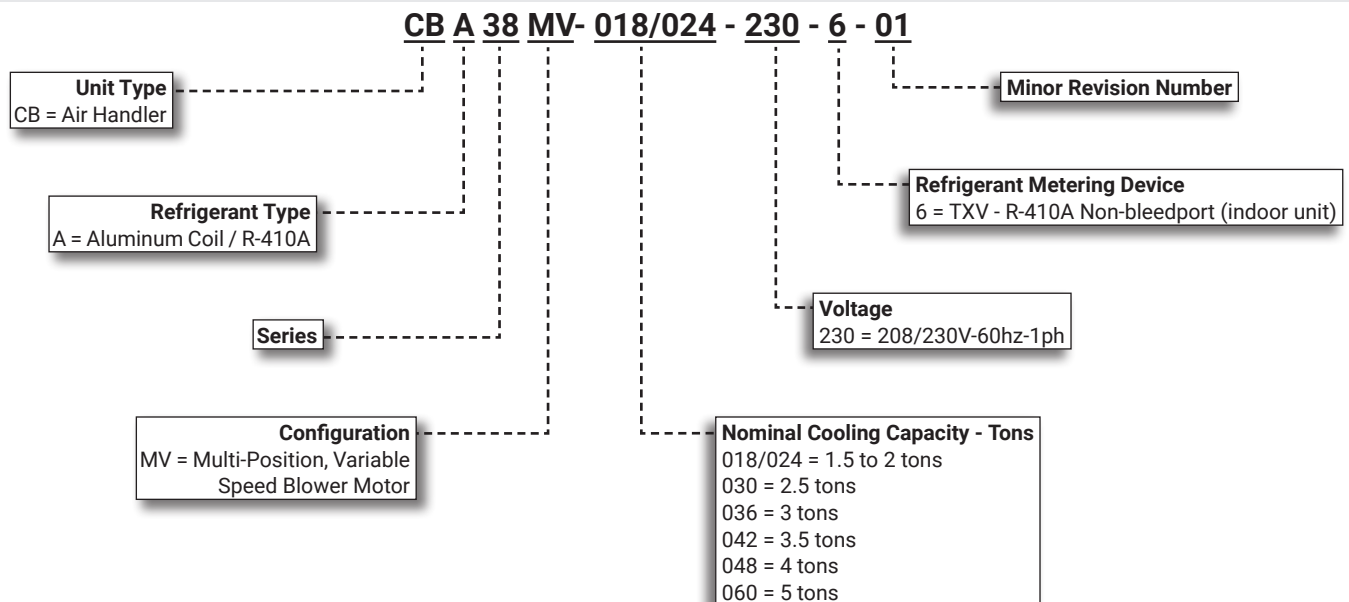

**RESIDENTIAL
 PRODUCT SPECIFICATIONS**

Bulletin No. 210803
 October 2020
 Supersedes August 2018

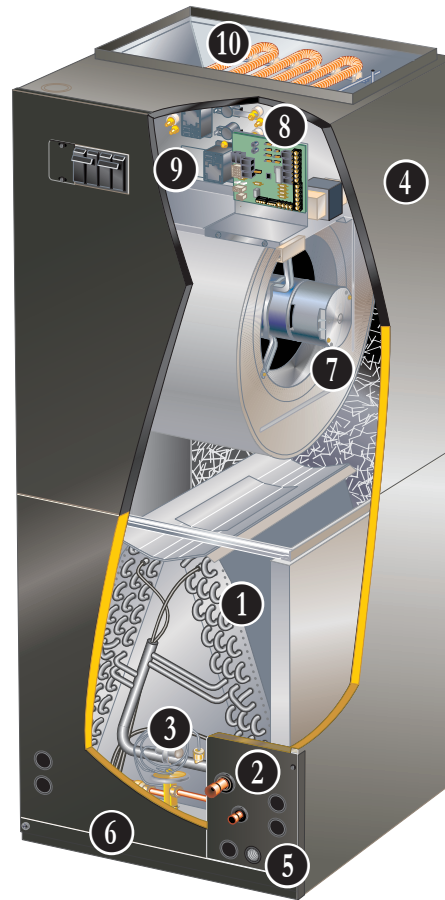

Nominal Capacity - 1.5 to 5 Tons
Optional Electric Heat - 4 to 25 kW

MODEL NUMBER IDENTIFICATION

FEATURE HIGHLIGHTS

1. Quantum™ Coil
2. Refrigerant Line Connections
3. Check and Expansion Valve
4. Heavy Gauge Steel Two-Piece Cabinet
5. Dual Position Drain Pans
6. Air Filter
7. Variable Blower Motor
8. iComfort® Communicating Control
9. Transformer
10. Electric Heat (option)

APPROVALS AND WARRANTY

APPROVALS

- Tested with matching air conditioners and heat pump units in the Lennox Research Laboratory environmental test room in accordance with AHRI Standard 210/240
- AHRI Certified system match-ups and expanded ratings, visit www.LennoxPros.com
- ETL Listed to US and Canadian safety standards and components within are bonded for grounding to meet safety standards for servicing required by NEC and CEC
- Optional electric heaters are ETL listed and rated in accordance with US Department of Energy (DOE) test procedures and Federal Trade Commission (FTC) labeling regulations
- Blower performance data according to unit tests conducted in Lennox air test chamber
- Approved for installation in manufactured housing and mobile homes
- ISO 9001 Registered Manufacturing Quality System

WARRANTY

- All covered components
 - Limited ten years in residential applications
 - Limited one year in non-residential applications

NOTE - Refer to Lennox Equipment Limited Warranty certificate included with unit for specific details.

FEATURES

APPLICATIONS

- 1.5 to 5 ton nominal sizes
- Multi-position (upflow, downflow or horizontal) applications
- Applicable to expansion valve systems in R-410A cooling applications and check and expansion valve systems in R-410A heat pump applications
- Wide-range check and expansion valve is factory installed
- Applicable to Lennox' iHarmony® Zoning System
- Optional field installed electric heaters available in several sizes for additive heating capacity

ZONING APPLICATIONS

- Units can be used with certain zoning systems. Zone control panel MUST be able to interface and communicate with the variable speed motor in the unit.
- Lennox iHarmony® Zoning System has this capability

REFRIGERANT SYSTEM

- 1 Quantum™ Coil**
 - Lennox designed and fabricated coil
 - Enhanced aluminum alloy tube/enhanced fin coil for superior corrosion resistance
 - Aluminum tubing, hairpins, distributor and header tubes.
 - Ripple-edged aluminum fins
 - Twin coil construction assembled in a "A" configuration for large surface area
 - Provides excellent heat transfer and low air resistance for maximum efficiency
 - Precise circuiting for uniform refrigerant distribution
 - Lanced fins provide maximum exposure of fin surface to air stream
 - Rifled tubing provides superior heat transfer

- Coil thoroughly factory tested under high pressure to ensure leakproof construction

- 2 Refrigerant Line Connections**

- Copper refrigerant sweat connections on both liquid and suction lines for easy brazing.
- Lines extend outside of the cabinet for ease of connection.
- See dimension drawings for locations

- 3 Check and Expansion Valve Furnished**

- For use with R-410A systems
- Wide range valve with Chatleff style fitting
- Factory installed on all models, internal to cabinet

CABINET

- 4**
 - Constructed of heavy-gauge galvanized steel
 - Completely insulated with thick fiberglass insulation
 - Pre-painted steel cabinets have mildly textured enamel finish with primer coat on unpainted side of all panels
 - Units are shipped in one piece but may be disassembled into two separate sections for ease of installation in tight applications
 - Thick rubber gasket between sections of the two piece cabinets provides an air tight seal
 - No external screw heads on sides of cabinet for tight installations without damage to walls or woodwork
 - Removable panels provide complete service access
 - Electrical inlets provided in sides and top of cabinet
 - See dimension drawings for locations

Low Leakage Cabinet

- All models have less than 2% air leakage and meet ANSI/ASHRAE Standard 193-2010 "Method of Test for Determining the Air Tightness of HVAC Equipment"

FEATURES

CABINET (continued)

Multi-Position Capability

- Shipped for upflow and horizontal right-hand discharge
- Quickly converted to downflow or left-hand, horizontal air discharge
- Easily converts to downflow position with furnished coil support rails and filter support rack

5 Dual Position Microbial Drain Pans

- Designed for upflow, downflow or horizontal applications
- Deep, corrosion resistant plastic drain pans have dual pipe drains
- Anti-Microbial additive resists growth of mold and mildew on drain pan which improves indoor air quality and reduces drain line blockage
- See dimension drawings

Optional Accessories

Downflow Combustible Flooring Base

- Base is required for models with electric heat installed in downflow position on combustible floors

Horizontal Support Frame Kit

- Provides support of unit in horizontal applications
- Consists of (2) 1 x 1-1/2 x 32-5/8 in. and (2) 1 x 3 x 53-7/8 in. painted heavy gauge cold rolled steel support channels with assembly and suspending holes
- Bolts and nuts furnished for field assembly
- Suspending rods must be field provided

Side Return Unit Stand (Upflow Only)

- Raises unit 16 in. above floor for side return air duct connection
- Eliminates need for wooden platform construction
- All aluminum construction
- Two adjustable frames fit all sizes

Wall Hanging Bracket Kit (Upflow Only)

- Allows unit to be hung on wall at any height
- Consists of heavy-gauge steel support brackets (one for air handler, one for wall mount)
- Screws furnished for fastening one bracket to unit
- Bolts for fastening one bracket to wall are field provided

High Performance Economizer (Commercial Applications Only)

- Designed for applications requiring outdoor air to be utilized in a commercial HVAC system
- Allows the entry of fresh outdoor air for free cooling, reducing the requirement for mechanical cooling
- Heavy gauge galvanized steel cabinet lined with thick fiberglass insulation
- Mixed air sensor, outdoor air sensor and 24VAC transformer furnished
- Approved for California Title 24 building standards
- ASHRAE 90.1-2010 compliant
- See separate Product Specifications bulletin for additional information and available control and sensor options

NOTE - Economizer is not iComfort® compatible.

FILTER

- 6** • Disposable 1 inch filter is furnished
- Filter rack furnished in cabinet for easy filter installation
- See Specifications tables for filter sizes

BLOWER

7 Variable-Speed Blower Motor

- High efficiency multi-speed blower motor maintains specified air volumes up to a maximum of 0.8 in. w.g. total external static
- Multi-speed operation is achieved by the use of an ECM (Electronically Commutated Motor) motor
- Allows cooling ramping profiles (field selectable) for enhanced dehumidification
- Motor accelerates and decelerates gradually, reducing start-up and shut-down sound
- Leadless blower motor features simple plug-in connections
- Motor is controlled by the iComfort® communicating control that allows blower to operate at two of eight air volumes or speeds available
- Speeds may be field selected on iComfort® communicating control depending on size of air handler and air volume desired
- See blower performance tables

Blower Assembly

- Lennox designed and built, direct drive blower
- Each blower is statically and dynamically balanced as an assembly before installation in the unit
- Blower motor is resiliently mounted to blower assembly
- Blower slides out of cabinet for servicing

FEATURES

CONTROLS

8 iComfort® Communicating Control

- Advanced control communicates information about various operating parameters in the air handler to the optional iComfort® Communicating Thermostat to constantly maintain the highest level of comfort, performance and efficiency available
- **Auto Configuration** - On start-up the control board automatically sends a description of the unit to the optional iComfort® Communicating Thermostat to automatically configure the number of stages and features available
- Connections for connecting a conventional heating/cooling thermostat are also provided on the board
- **Control also features:**
 - Lennox Humiditrol® Whole Home Dehumidification System (EDA) compatible
 - EEPROM storage of all local configurations
 - Non-volatile memory storage of 100 alarm codes with display of last 10 codes for troubleshooting
 - Connections for optional outdoor temperature sensor (communicates temperature on RSBUS to thermostat)
 - Controls evaporator humidity by controlling blower and compressor staging on two-stage outdoor units
 - **Two Stages** - HEAT and COOL (with four different air volume selections for each) are made by simple jumper pins on board
 - ADJUST jumper pin allows approximately 10% higher, normal or 10% lower motor speed selection within HEAT and COOL speeds selected for fine tuning air volume
 - DELAY jumper pin allows selection of blower motor dehumidification profiles during cooling mode
 - **Option 1** - Motor runs at 100% of capacity until demand met. Once demand is met, motor ramps down to stop.
 - **Option 2 Cooling** - When cool demand is initiated, motor ramps up to 100% and runs at 100% until demand is satisfied. Once demand is met, motor runs at 100% for 45 seconds, then ramps down to stop.
 - **Option 2 Heat Pump**: When heat pump demand is initiated, 30 second motor on delay starts. After the motor on delays expires, motor ramps up to 100% and runs at 100% until demand is satisfied. Once demand is met, motor runs at 100% for 45 seconds, then ramps down to stop.
 - **Option 3** - Motor runs at 82% of capacity for approximately 7.5 minutes, then 100% capacity (if needed) until demand is satisfied. Once demand is met, motor ramps down to stop.

- **Option 4** - Motor runs at 50% capacity for 30 seconds, then 82% capacity for approximately 7.5 minutes. If demand is not satisfied, motor runs at 100% capacity until demand is met. Once demand is met, motor runs at 50% capacity for 30 seconds, then ramps down to stop.

- **Display LED** - Seven segment LED displays alphanumeric information related to diagnostics as well as system operation and status
 - Diagnostic codes are held in non-volatile memory, immune from power interruptions
 - Holds up to ten diagnostic codes in order of occurrence for recall on demand
 - Port on blower door allows for easy viewing
 - **Dehumidification (Active or Humiditrol® Option)** - A jumper on the control board must be clipped to enable active dehumidification and/or operation with a Humiditrol Whole-Home Dehumidification System
 - During a call for cooling, air volume is automatically reduced, forcing humidity removal by the air conditioner or heat pump system
 - After the humidity has reached the desired set-point the cooling air volume returns to its designed rate
 - A dehumidification signal from the thermostat reduces the cooling cfm to 70% of the requested cooling cfm
- NOTE** - A humidity controlling thermostat or device is also required.
- **Electric Heat Operation** - Control for up to three electric heat stages
 - **EvenHeater® Electric Heat Control** - Up to four electric heat stages are available when utilizing the EvenHeater® control feature furnished on the iComfort® Communicating control
 - EVENHEAT jumper position on control board determines target discharge air temperature of 85°F, 100°F, 115°F or 130°F
 - Default setting is 85°F

NOTE - Optional Discharge Air Sensor is required.

- **Heat Pump Operation** - A jumper on the control board must be clipped to enable operation with a single or two-stage heat pump
 - The indoor blower is started without delay when a call for heat is received
 - **Two-Stage Cooling Operation** - A jumper on the control board must be clipped to enable operation with a two-stage air conditioner
 - The cooling blower speeds for first and second stage cooling will be dictated by the applicable DIP switch settings
 - **Lennox System Operations Monitor Connection** - Monitors outdoor unit operation. (communicating mode)
 - **Continuous Blower Speed** - Adjustable continuous blower speed is a percentage of the high cooling speed selection. There are four selectable options (via DIP switch settings) of 28%, 38% (default setting), 70% and 100%
- 9 • **Transformer** - 70VA transformer furnished as standard. Factory installed in the unit control box

FEATURES

CONTROLS (continued)

iComfort® Communicating Control (continued)

- **Accessory Terminal** - One 24 volt humidifier output is furnished for non-powered humidifiers
- Control board is factory installed in the unit control box

Optional Accessories

iComfort® S30 Ultra-Smart Wi-Fi Thermostat (part of the iComfort® Residential Communicating Control System)

- Recognizes and connects to all iComfort® Communicating products to automatically configure and control the heating/cooling system (based on user-specified settings) for the highest level of comfort, performance and efficiency
- Recognizes model and serial number information for iComfort® Communicating products to simplify system setup
- Wi-Fi remote temperature monitoring and adjustment through a home wireless network for desktop PCs, laptops and apps for smartphones or tablets
- Smart home automation compatible with Apple HomeKit™, Amazon Alexa®, Google Assistant and IFTTT
- Service alerts and reminders sent via text message or e-mail
- Service Dashboard features online real-time monitoring of installed iComfort® Communicating systems
- Simple easy-to-use touchscreen allows complete system configuration
- Scheduled maintenance alerts, system warnings and troubleshooting are also displayed on thermostat screen
- Easy to read 7 inch high definition color display (measured diagonally)
- Conventional outdoor units (not iComfort® Communicating) can easily be added and controlled by the iComfort® S30 Thermostat
- Installer setup screens allow quick and simple system configuration without a manual, Installer can also run tests on complete system or individual components for easy maintenance and troubleshooting
- Serial communications bus (RSBus), with less wiring than a conventional heating/cooling system, allows system communication
- Uses 4-wire, standard thermostat wiring
- High Definition Color Display with Subbase, Smart Hub Controller, wallplate (for retrofit installations) furnished for easy installation

Remote Outdoor Temperature Sensor

- Used with the iComfort® S30 Smart Wi-Fi Thermostat
- Outdoor sensor allows thermostat to display outdoor temperature
- Automatically detected when connected to thermostat

NOTE - Sensor is required for the Enhanced Dehumidification Accessory (EDA).

NOTE - Sensor is furnished as standard with iComfort® Communicating outdoor units, optional for conventional units.

Thermostat

- Thermostat is not furnished with unit
- See Lennox Price Book for selection

Hot Water Heat Kit

- Controls a third-party hot water boiler with a hot water heating coil installed downstream from the air handler
- Kit contains all necessary relays and plug-in wiring harness to control boiler

NOTE - This kit is only approved for use in systems using an iComfort® Communicating thermostat ComfortSense® 7500 thermostat

NOTE - See the iComfort® S30 Thermostat Product Specifications bulletin in the Controls section for more information

FEATURES

10 **OPTIONAL ELECTRIC HEAT**

- ETL listed
- Field install internal to unit cabinet
- Available in several voltages and kW sizes
- See Electric Heat tables
- Helix wound nichrome heating elements exposed directly in air stream resulting in instant heat transfer, low element temperatures and long service life
- Each element equipped with accurately located limit control with fixed temperature off setting and automatic reset
- Supplemental thermal cutoff limit control, provides positive protection in case of excessive temperatures
- Thermal sequencer relay brings elements on and off line, in sequence and equal increments, with time delay between each
- Initiates and terminates blower operation
- Heating control relay(s) furnished as standard
- Control box and access cover constructed of heavy gauge galvanized steel
- Factory assembled with controls installed and wired
- Electric heat low voltage controls plug-in to air handler

Circuit Breaker (CB) Models

- All "CB" model heaters are equipped with circuit breakers for overload and short circuit protection
- Factory wired and mounted on electric heat unit
- Current sensitive and temperature actuated
- Manual reset
- Circuit breakers qualify as disconnect means at unit in many areas, eliminate the need for field provided disconnect
- Consult local electrical code in your area

Optional Accessories

Circuit Breaker Cover Kit

- Flexible plastic cover protects circuit breaker
- Recommended in areas with high humidity or unconditioned areas to prevent nuisance tripping

Single-Point Power Source Control Box

- Control Box may be used with optional electric heat when single power supply is connected to multi-circuit electric heat
- Field installs external to the unit cabinet on either side or top
- Constructed of heavy gauge steel, baked enamel finish, pre-punched mounting holes, electrical inlet knockouts, and terminal strip
- Removable cover provides easy access
- Dimensions (H x W x D) - 7 x 7 x 4 in.

SPECIFICATIONS

High Performance Economizer (Commercial Only)		10U53	10U53	10U53

¹ Disposable frame type filter.

² HACR type circuit breaker or fuse.

³ Refer to National or Canadian Electrical Code manual to determine wire, fuse and disconnect size requirements. Use wires suitable for at least 167°F.

⁴ Remote Outdoor Temperature Sensor is used with conventional (non-iComfort® Communicating) outdoor units (sensor is furnished with iComfort® Communicating outdoor units). Allows the thermostat to display outdoor temperature. Required in dual-fuel and Humiditrol® applications.

⁵ Optional for EvenHeater® electric heat operation and service diagnostics.

INSTALLATION CLEARANCES WITH ELECTRIC HEAT

Cabinet	0 inch (0 mm)
To Plenum	0 inch (0 mm)
To Outlet Duct within 3 feet (914 mm)	0 inch (0 mm)
Floor	See Note #1
Service / Maintenance	See Note #2

¹ Units installed on combustible floors in the downflow position with electric heat require optional downflow combustible flooring base.

² Front service access - 24 inches (610 mm) minimum.

NOTE - If cabinet depth is more than 24 inches (610 mm), allow a minimum of the cabinet depth plus 2 inches (51 mm).

		240	25.0	85,300	6.9	52	44	44	60	45	45	140	150

NOTE - Circuit 1 Minimum Circuit Ampacity includes the Blower Motor Full Load Amps.

¹ Electric heater capacity only - does not include additional blower motor heat capacity.

² Amps shown are for blower motor only.

³ Refer to National or Canadian Electrical Code manual to determine wire, fuse and disconnect size requirements. Use wires suitable for at least 167°F.

⁴ Bold text indicates that the circuit breaker on "CB" circuit breaker models must be replaced with size noted. See Replacement Circuit Breakers on page 9.

⁵ HACR type circuit breaker or fuse.
