

PACKAGED HEAT PUMPS

CHP20R**ELITE® SERIES - RESIDENTIAL**

2 to 5 Ton (7.0 to 17.6 kW)

SEER - up to 12.65

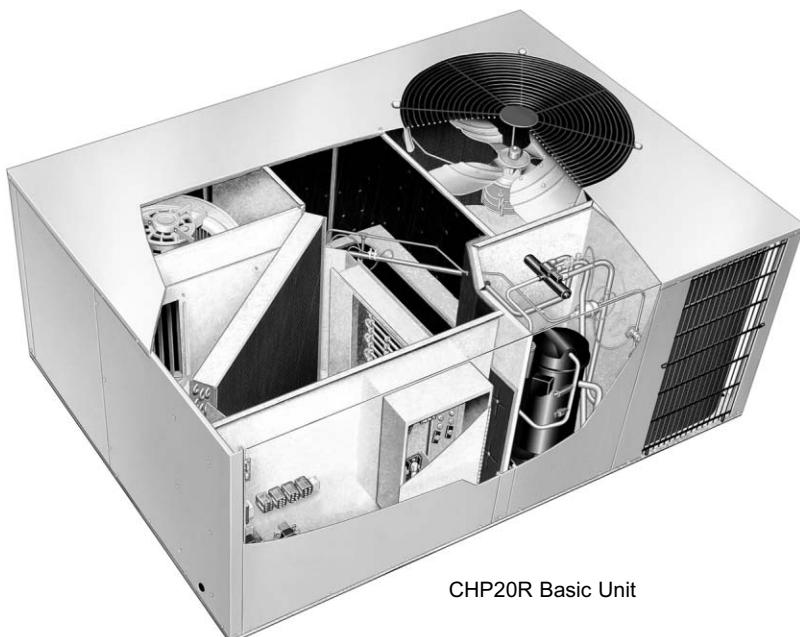

Net Cooling Capacity - 24,000 to 59,000 Btuh (7.0 to 17.3 kW)

Heating Capacity - 24,200 to 56,000 (7.1 to 16.4 kW)

Optional Electric Heat - 5 to 25 kW

Bulletin No. 210359

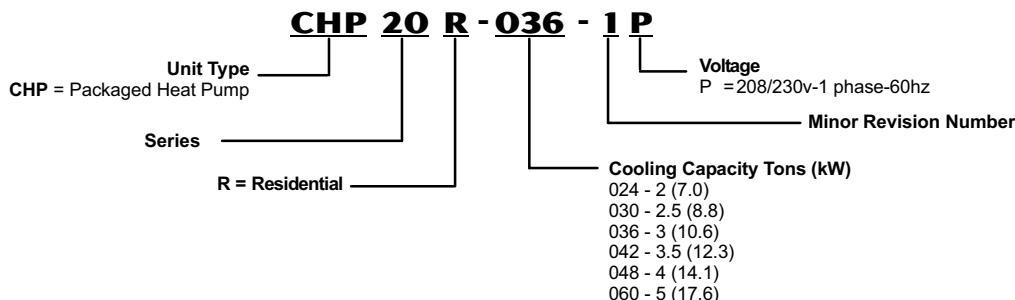

May 2002

CHP20R Basic Unit

MODEL NUMBER IDENTIFICATION

FEATURES

Application

- SEER of up to 12.65.
- 2 through 5 ton (7.0 through 17.6 kW).
- Single phase power supply.
- Bottom (down-flow) or horizontal supply and return air.
- Designed for outdoor rooftop or ground level installations in residential applications.

Approvals

- Certified in accordance with the USE certification program, which is based on ARI Standard 210/240-94.
- Sound rated in the Lennox reverberant sound test room in accordance with test conditions included in ARI Standard 270-95.
- Tested in the Lennox Research Laboratory environmental test room.
- Rated according to U.S. Department of Energy (DOE) test procedures.
- Units and components within are bonded for grounding to meet safety standards for servicing required by CSA, NEC and CEC.
- Blower data is from unit tests conducted in the Lennox Laboratory air test chamber.
- Optional electric heaters are UL and ULC listed and are rated and tested according to DOE test procedures and FTC labeling regulations.
- Developed in accordance with ISO 9002 quality standards.

NOTE - Due to Lennox' ongoing commitment to quality, Specifications, Ratings and Dimensions subject to change without notice and without incurring liability.
Improper installation, adjustment, alteration, service or maintenance can cause property damage or personal injury.

Installation and service must be performed by a qualified installer and servicing agency.

©2002 Lennox Industries Inc.

FEATURES

Equipment Warranty

- Compressor - limited warranty for ten years in residential applications, 5 years in non-residential applications.
- All other covered components - limited warranty for five years in residential applications, one year in non-residential applications.
- Refer to Lennox Equipment Limited Warranty certificate for specific details.

Refrigeration System

- All models include: check/expansion valve, reversing valve, filter drier, suction and liquid line service gauge ports and full refrigerant charge.
- Freezestat prevents coil freeze-up during low ambient operation or loss of air flow.
- Low ambient operation down to 30°F (-1°C) in cooling mode without additional controls.

Cabinet

- Heavy gauge, galvanized steel cabinet with five station metal wash process.
- Powder enamel paint, electrostatically bonded to the metal, provides superior rust and corrosion protection.
- Control box is conveniently located with all controls factory wired.
- Large removable panels provide service access.
- Base section and cabinet panels exposed to conditioned air are lined with thick fiberglass insulation.
- Flanged supply and return air openings.
- Electrical inlets furnished for entry into the cabinet.
- Indoor coil drain pan constructed of painted, corrosion resistant galvanized steel with galvanized steel pipe drain outlet coupling.
- Lifting brackets factory installed.

Coil Guards

- PVC coated steel wire guards to protect outdoor coil.
- Not for use with optional Hail Guards.

Copeland Scroll™ Compressor

- Compressor features high efficiency with uniform suction flow, constant discharge flow and high volumetric efficiency and quiet operation.
- Compressor consists of two involute spiral scrolls matched together to generate a series of crescent shaped gas pockets between them.
- During compression, one scroll remains stationary while the other scroll orbits around it.
- Gas is drawn into the outer pocket, the pocket is sealed as the scroll rotates.
- As the spiral movement continues, gas pockets are pushed to the center of the scrolls. Volume between the pockets is simultaneously reduced.
- When pocket reaches the center, gas is now at high pressure and is forced out of a port located in the center of the fixed scrolls.
- During compression, several pockets are compressed simultaneously resulting in a smooth continuous compression cycle.
- Continuous flank contact, maintained by centrifugal force, minimizes gas leakage and maximizes efficiency.
- Scroll compressor is tolerant to the effects of slugging and contaminants. If this occurs, scrolls separate, allowing liquid or contaminants to be worked toward the center and discharged.
- Low gas pulses during compression reduces operational sound levels.
- Compressor motor is internally protected from excessive current and temperature.
- Compressor is installed in the unit on resilient rubber mounts for vibration free operation.

Outdoor Coil Fan

- Direct drive fan moves large air volumes uniformly through entire outdoor coil for high refrigerant cooling capacity.
- Vertical air discharge keeps air up and away from building.
- Permanently lubricated, permanent split capacitor (PSC) motor.
- Motor totally enclosed for maximum protection from weather, dust and corrosion.
- Corrosion resistant PVC (polyvinyl chloride) coated steel wire fan guard is furnished as standard.

Copper Tube/Enhanced Fin Coil

- Lennox designed and fabricated coil.
- Ripple-edged aluminum fins.
- Long life copper tubing for ease of field servicing.
- Copper tube construction, indoor coil tubes are rifled for improved efficiency.
- Lanced fins provide maximum exposure of fin surface to air stream resulting in excellent heat transfer.
- Fin collars grip tubing for maximum contact area.
- Flared shoulder tubing connections/silver soldering construction.
- Corrosion resistant PVC (polyvinyl chloride) coated steel coil guard furnished on all models.
- Coil is factory tested under high pressure to insure leakproof construction.

Defrost Control

- A solid-state defrost control board is furnished as standard equipment. It gives a defrost cycle (14 minutes) for every 30, 60 or 90 minutes (adjustable) of compressor "on" time at outdoor coil temperature below 35°F (1.7°C).
- A sensing element mounted on the low pressure side of the outdoor thermal expansion valve determines when the defrost cycle is required. Pressure switch mounted on discharge vapor line terminates defrost cycle.

Blower

- Multi-speed direct drive blowers.
- Each blower assembly statically and dynamically balanced.
- Multiple-speed permanent split capacitor (PSC) motor resiliently mounted.
- Blower speeds are easily changed on the blower motor.
- See blower performance tables.

Filter (Not Furnished)

- Filter and provisions for mounting must be field provided.

OPTIONAL ACCESSORIES - MUST BE ORDERED EXTRA

Ceiling Diffusers

- Aluminum grilles, large center grille, insulated diffuser box with flanges, hanging rings furnished, interior transition (even air flow), internally sealed (prevents recirculation), adapts to T-bar ceiling grids or plaster ceilings.
- Step-Down diffusers feature double deflection louvers.
- Flush diffusers have fixed blade louvers.

Ceiling Diffuser Transitions (Supply and Return)

- Used with diffusers and installs in roof mounting frame.
- Galvanized steel construction, flanges furnished for duct connection, fully insulated.

Electric Heat

- Helix wound nichrome elements, time delay for element staging, individual element limit controls, wiring harness, may be two-stage controlled.
- **ECH16R** - Supplemental thermal cutoff safety fuses and thermal relay sequencer.
- **ECH16** - Supplemental secondary limits, heating control relay, fuse block, thermal relay sequencer (20-25 kW 208/230v) and galvanized steel control box.

Electric Heat Single Point Power Source Sub-Fuse Box

- Use with ECH16R electric heaters in conjunction with ECH16 fuse box for single point power source applications.
- Installs internal to unit.
- Fuses furnished.
- Constructed of galvanized steel with prepunched mounting holes

Unit Single Point Power Source Sub Fuse Box

- Installs internal to unit, provides sub-fusing to the unit, used in conjunction with ECH16 or ECH16R for single point power source applications.
- Fuses furnished.
- Constructed of galvanized steel with prepunched mounting holes and electrical inlet and outlet holes, hinged box cover.

Hail Guards

- Heavy duty field installed coil guard protects coils from damage. Not for use with Coil Guards.

Low Ambient Control Kit

- Units operate down to 30°F (-1°C) outdoor air temperature in cooling mode without any additional controls.
- Low Ambient Kit can be field installed, enabling unit to operate properly down to 0°F (-17.7°C).

Outdoor Air Damper Section (Down-Flow)

- Damper assembly replaces blower access panel.
- Manually adjustable, 0 to 25% (fixed) outdoor air.
- Outdoor air hood with cleanable filter included.

Outdoor Thermostat Kit

- Used to lock out some of the electric heating elements on indoor units where two stage control is applicable.
- Outdoor thermostat maintains the heating load on the low power input as long as possible before allowing the full power load to come on line.

Roof Curb Power Entry Kit

- Allows power entry through roof mounting frame, knockouts provided in roof frame.
- Kit contains 40 in. (1016 mm) armored conduit and installation hardware.
- Two kits are required, one for low voltage and one for high voltage.
- See Dimension Drawing.

Roof Mounting Frame

- Nailer strip furnished, mates to unit, U.S. National Roofing Contractors Approved, shipped knocked down.
- RMF16-41 may be used on all sizes, with a slight unit overhang on CHP20R-036-042-048-060 units.
- Sound Reduction Plate must be ordered separately for field installation (US Only).

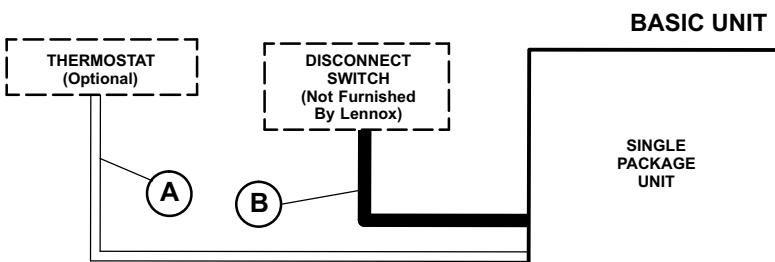

Timed Off Control

- Prevents compressor short-cycling and allows time for suction and discharge pressure to equalize, permitting the compressor to start in an unloaded condition.
- Automatic reset control provides a time delay between compressor shutoff and start-up.

Unit Stand-Off Mounting Kit

- Elevates horizontal application units above mounting surface.
- Includes six high impact polystyrene stand-off mounts.
- See dimension drawings.

FIELD WIRING

A — Five Wire Low Voltage (Electro-mechanical)

— Six Wire Low Voltage (Electronic)

B — Two Wire Power (See Electrical Data Table)

— Field Wiring Not Furnished —

NOTE - All wiring must conform to NEC or CEC and local electrical codes.
