

**ENGINEERING DATA****FEATURES****APPLICATIONS**

Designed for use in L Series® Packaged Rooftop Units.

The lamp emits ultra-violet (UV-C) energy, which has been proven to be effective in reducing microbes such as viruses, bacteria, yeasts, and molds. This process either destroys the organism or controls its ability to reproduce. UVC germicidal lamp greatly reduces the growth and proliferation of mold and other bioaerosols (bacteria and viruses) on illuminated surfaces (particularly coil and drain pan).

Lamps are field installed in the blower/evaporator coil section.

All necessary hardware for installation is included.

NOTE - Germicidal lamps are NOT intended to be used for removal of active mold growth. Existing mold growth must be appropriately removed prior to installation of the germicidal lamp.

APPROVALS

Approved by ETL for use in L Series rooftop units.

WARRANTY

All covered components have a limited warranty for one year.

ELECTRICAL

All lamps operate on 208/230V power supply.

Step-down Transformer provided on Control Section steps down unit line voltage to 230V for 460V and 575V models.

Protected by replaceable fuse.

SAFETY FEATURES

Magnetic safety interlock switch(es) (furnished) terminates the power from the unit when the front cover is removed.

LED status indicator (lit) when unit is operating.

LAMP(S)

Low power consumption, high UV output.

Annual lamp replacement recommended.
