

icomfort™ Residential Communicating Control System icomfort Touch® Communicating Thermostat

PRODUCT SPECIFICATIONS

Bulletin No. 210538
March 2012
Supersedes October 2011

The **icomfort Touch® Communicating Thermostat** recognizes and connects to all icomfort™-enabled products to automatically configure and control the system (based on user-specified settings) for the highest level of comfort, performance and efficiency. Also recognizes model and serial number information for icomfort™-enabled products to simplify system setup.

Advanced icomfort™ controls in specific heating and cooling units communicate information about various operating parameters to the thermostat to constantly maintain the most efficient operating conditions possible. Additional conventional (not icomfort™-enabled) indoor air quality comfort controls (PureAir™ Air Purification System, Healthy Climate® Humidifiers, Humiditrol® Enhanced Dehumidification Accessory, Healthy Climate® Energy/Heat Recovery Ventilators) can be added to the system for a complete total-comfort system.

Conventional outdoor units (not icomfort™-enabled) can easily be added and controlled by the icomfort Touch® Communicating Thermostat.

A simple easy-to-use menu-driven touchscreen allows complete system configuration. Scheduled maintenance alerts, system warnings and troubleshooting are also displayed in simple English on thermostat screen.

Easy to read 5.7 in. screen (measured diagonally).

A tabbed interface lists all programming options on the screen.

Installer setup screens allow quick and simple system configuration without a manual, Installer can also run tests on complete system or individual components for easy maintenance and troubleshooting.

Serial communications bus (RSBus), with less wiring than a conventional heating/cooling system, allows system communication. Uses 4-wire, 18-gauge standard thermostat wiring.

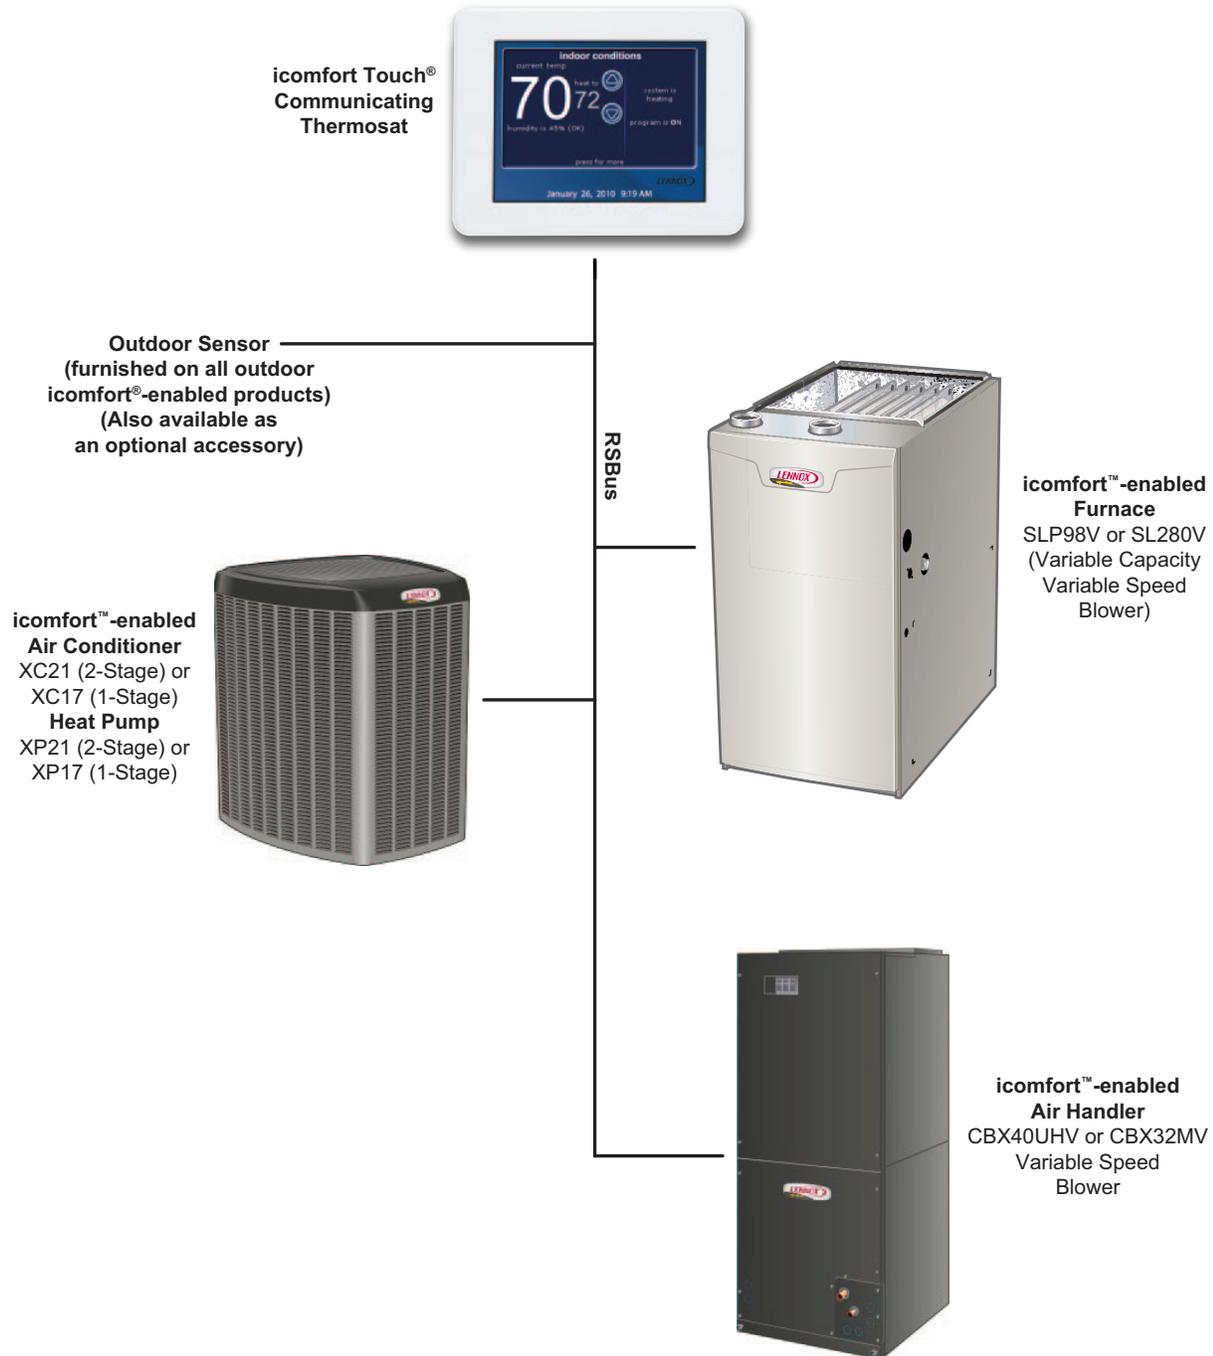

Thermostat can be recess mounted on a wall (3-gang electrical box required). Subbase with terminal strip is furnished for easy installation.

EQUIPMENT WARRANTY

Five years in residential installations and one year in non-residential installations.

Refer to Lennox Equipment Limited Warranty certificate included with unit for specific details.

SYSTEM COMPONENTS

CONTROL ORDERING INFORMATION

Description	Catalog No.
icomfort Touch® Communicating Thermostat Dimensions (H x W x D) - 5 x 6-3/8 x 1-1/4 in.	49W95
¹ Optional Outdoor Sensor	X2658
² Discharge Temperature Sensor	88K38

¹ The Optional Outdoor Sensor may be used with an icomfort™ equipped outdoor unit for a secondary (alternate) sensor reading. Optional Outdoor Sensor may be ordered for use with a conventional outdoor unit.

² Required with Air Handler applications when using EVENHEATER® option. Optional on all other applications for service diagnostics

RESIDENTIAL COMMUNICATING CONTROL SYSTEM

SYSTEM COMPONENTS

The complete icomfort™ control system consists of an icomfort Touch® Communication Thermostat paired with an icomfort™-enabled furnace and air conditioner or an icomfort™-enabled air handler and heat pump outdoor unit (or furnace for dual-fuel operation). Indoor units must contain the icomfort™ control. A non-communicating outdoor unit may be used (some system features will be reduced).

FEATURED SYSTEM PRODUCTS

icomfort Touch® Communicating Thermostat

Large full color touchscreen - no hidden buttons or doors.

Temperature and humidity control (humidify/dehumidify). Sophisticated control and scheduling.

Also controls conventional (not icomfort™-enabled) products (includes standard thermostat terminal designations).

Dave Lennox Signature® Collection SLP98V Variable-Capacity, Variable-Speed Furnaces

Energy Star® qualified.
98% AFUE energy efficiency.
Variable-capacity operation.
Multi-position design.
icomfort™ control.
Precise Comfort™ technology.
AirFlex™ technology.
Fully insulated cabinet.
SureLight® Control delivers

operation reliability.

Silicon nitride igniter.

Also available - SL280V Gas Furnace.

Dave Lennox Signature® Collection XC21 Two-Stage Air Conditioners (SunSource®-Ready)

Energy Star® qualified.
Up to 20.5 SEER cooling efficiency.

icomfort™ control.

SilentComfort™ technology.

Quiet operation, as low as 69 dB.

R-410A refrigerant.

Dependable and efficient two-stage scroll compressor.

SmartHinge™ louvered coil protection.

Optimized for use with the Humiditrol® whole-home dehumidification system.

Also available - XC17 Single-Stage Air Conditioner (SunSource®-Ready).

Dave Lennox Signature® Collection XP21 Two-Stage Heat Pumps (SunSource®-Ready)

Energy Star® qualified
Up to 19.0 SEER and 9.50 HSPF heating efficiency

icomfort™ control.

SilentComfort™ technology

Quiet operation, as low as 67 dB

R-410A refrigerant

Dependable and efficient two-stage scroll compressor

SmartHinge louvered coil protection

Optimized for use with the Humiditrol® whole-home dehumidification system

Also available - XP17 Single-Stage Heat Pump (SunSource®-Ready).

Dave Lennox Signature® Collection CBX40UHV Variable-Speed Air Handlers

4-way multi-position design.

icomfort™ control.

Variable-speed blower motor.

R-410A refrigerant compatible.

Automatic comfort control for lower, summertime humidity levels.

Anti-microbial drain pan resists the growth of mold and mildew.

Healthy Climate® MERV 16 high efficiency air filter factory installed.

Includes knock-out for easy installation of Healthy Climate® germicidal light.

Also available - CBX32MV Variable-Speed Air Handler.

FEATURES

USER SETTINGS

HOME SCREEN (PROGRAM ON)

Indoor Conditions

- Large display of current indoor temperature ($^{\circ}\text{F}$ or $^{\circ}\text{C}$)
- Current heating setpoint temperature (*heat to*)
- Current cooling setpoint temperature (*cool to*)
- Raise / Lower temperature setting arrows (*up / down arrows*) to set heating or cooling setpoints indefinitely (program off).

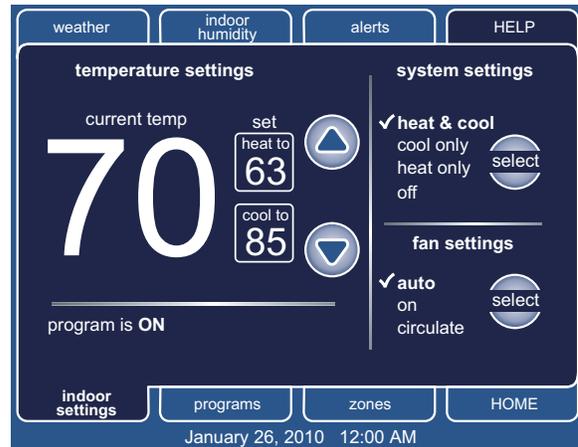

If program is "on" screen displays adjustable set hold time (1, 2, 8, 24 hours, until next program or custom set time)

Both setpoint temperatures and adjustment arrows are displayed if System is set to Heat/Cool mode.

- Humidity settings (humidity is 45% OK)
- System Mode (system is heating / cooling)
- Program Mode (*program is off*, *program is on*)
- Service Alerts (triangle symbol). Touch for details.

Press for more displays Indoor Settings (and dashboard) screen.

INDOOR SETTINGS AND USER DASHBOARD

Temperature Settings

- Large display of current indoor temperature ($^{\circ}\text{F}$ or $^{\circ}\text{C}$)
- Current heating setpoint temperature (*heat to*)
- Current cooling setpoint temperature (*cool to*)
- Raise / Lower temperature setting arrows (*up / down arrows*) to set heating or cooling setpoints indefinitely

System Settings

- Heat & Cool
- Cool Only
- Heat Only
- Emergency Heat (if air handler or dual fuel system)
- Off

Selecting Heat Only or Cool Only only displays those setpoints.

Fan Settings

- Auto
- On
- Circulate

Selecting other tabs on screen displays different Dashboard Tab screens.

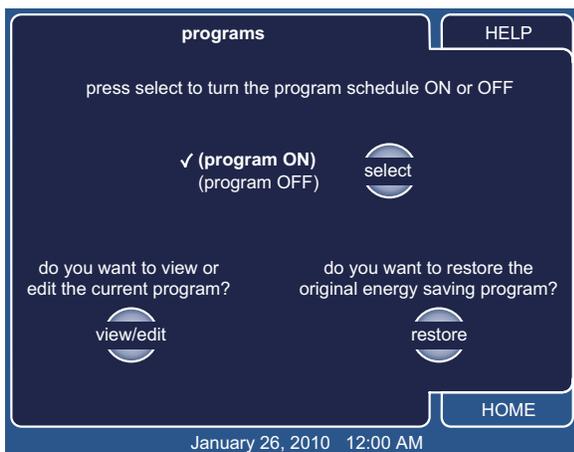

FEATURES

USER SETTINGS

USER DASHBOARD TABS

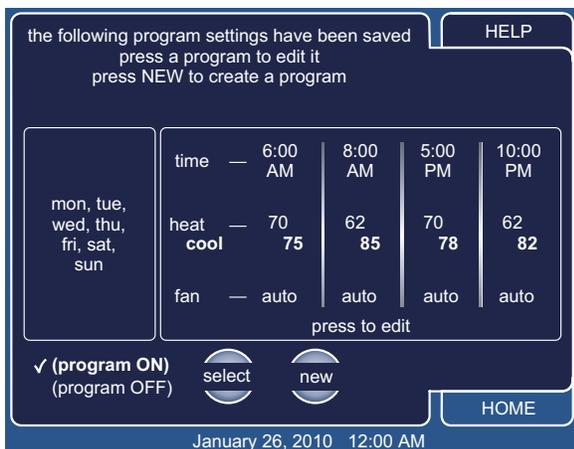

- Programs Tab
- Indoor Humidity
- Alerts
- HELP
- HOME
- Zones Tab (for future use)
- Weather Tab - Displays outdoor temperature if icomfort™-enabled outdoor unit or optional outdoor temperature sensor is enabled (set in user setup)

PROGRAMS

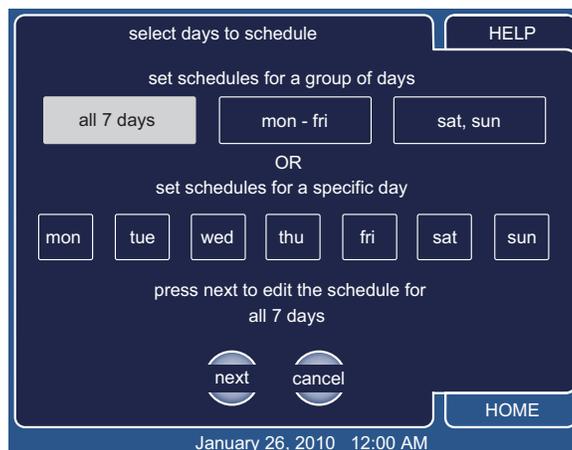

- Program (*Program On, Program Off*)
- Current Program (*View or Edit*)
- Restore ENERGYSTAR® Program (*Confirm or Cancel*)?

View Program

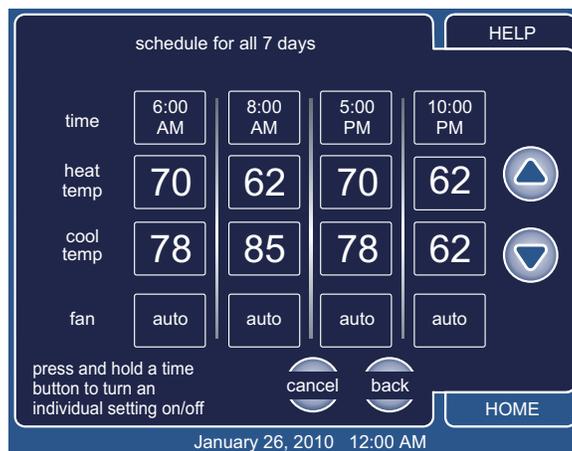

- Displays current program

Edit Program

- Set schedule for a group of days (*all 7 days, mon - fri, sat - sun*) or set schedule for each individual day

- Set time of day, heat temp., cool temp. and fan settings for days selected (four events per day)
- Skip an event if desired

Restore ENERGYSTAR® Program

- Restores program to ENERGYSTAR® default comfort settings:

Setting	Time	Heat Temp.	Cooling Temp.
Wake	6:00 am	< 70°F	> 78°F
*Day	8:00 am	Setback 8° F	Setup 7°F
Evening	6:00 pm	< 70°F	> 78°F
*Sleep	10:00 pm	Setback 8°F	Setup 4°F

*At least setback and setup temperatures.

HELP

- Left side of screen displays various help screens depending on which dashboard tab is selected first (*Indoor Settings, Programs, Indoor Humidity, Alerts*)
- Clean Screen (30 second timer for cleaning screen without affecting settings)
- Use Preferences (see User Preferences section for details)

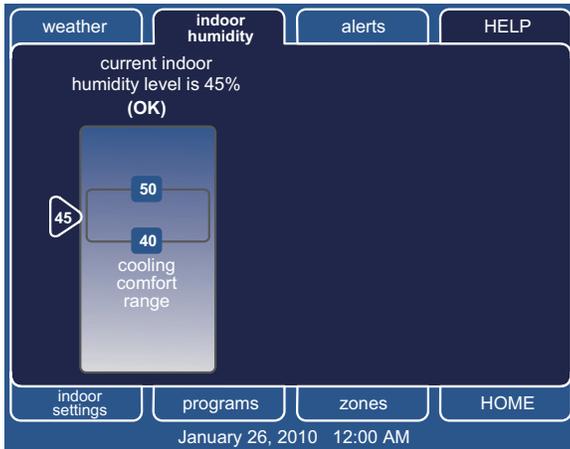

HOME

- Returns to home screen

FEATURES

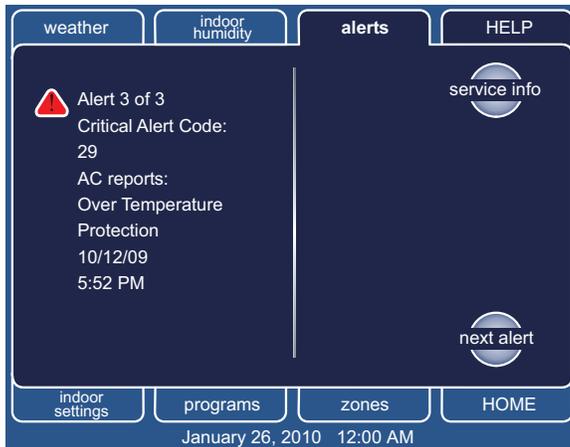

USER SETTINGS

INDOOR HUMIDITY

- Set humidity or dehumidify levels (if equipped)
- Humidity adjustable from 15 to 45% relative humidity (RH)
- Dehumidify adjustable from 40 to 60% relative humidity (RH)

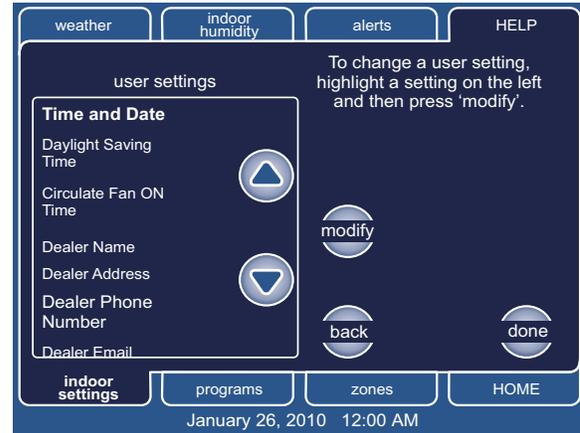

ALERTS

- Press the Alert Icon on Home Screen (if program is running) to display system or device active alerts
- If program is not running, press Alert Icon on Dashboard Screen to display alerts.

- A red **Critical Alert** indicates that service is required for a major system component as soon as possible
- A yellow **Service Alert** indicates required maintenance (filter replacement, humidifier pad replacement, UV light replacement, PureAir™ Air Purification System servicing and Maintenance)
- Next Alert scrolls through available system alerts
- Remind Later allows a Service Alert to be postponed (1 day, 1 week, 1 month, 3 months or a custom time)

USER PREFERENCES

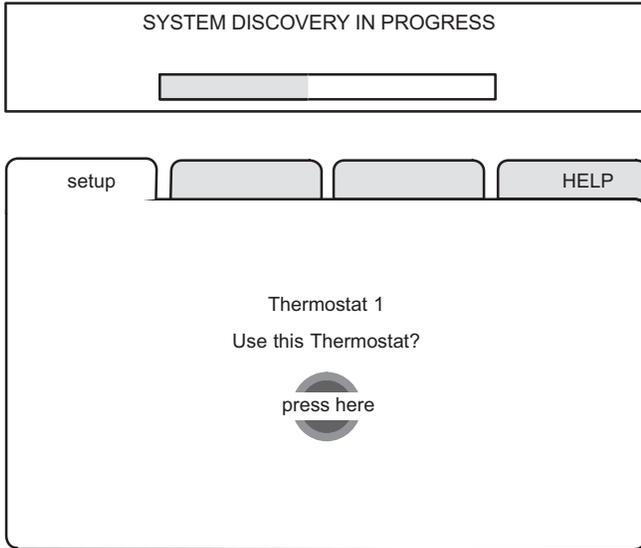

User Setting	Default Setting	Variable Settings
Time and Date		Time/date elements (screen)
Daylight Saving Time	Enabled	Enabled, Disabled
Circulate Fan ON Time	35%	15 to 45% (in 1% increments)

Dealer Address		
Dealer Phone		
Dealer Email		
Dealer Website		
Language Displayed	English	English
Temperature Display Scale	°F	Fahrenheit (°F) or Celsius (°C)
Clock Format	12 Hour	12 Hour, 24 Hour
Screen Lock-out	Unlocked	Unlocked, Partially Locked, Fully Locked
Backlight Setting	Always On	Power Save, Always On
Backlight Intensity	100%	20 to 100% (in 20% increments)
Outdoor Temp Display	Disabled	Disabled, Enabled
Indoor Humidity Display	Enabled	Disabled, Enabled
Filter 1 Timer	Disabled	Disabled, 3, 6, 12, 24 Months or Custom Time
Filter 2 Timer	Disabled	
Humidifier Pad Timer	Disabled	
UV Bulb Timer	Disabled	
Maintenance Timer	Disabled	
PureAir Timer	Disabled	

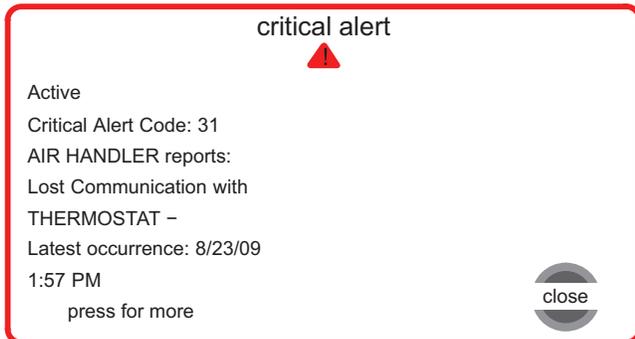

FEATURES

INSTALLER SETUP

SYSTEM DISCOVERY

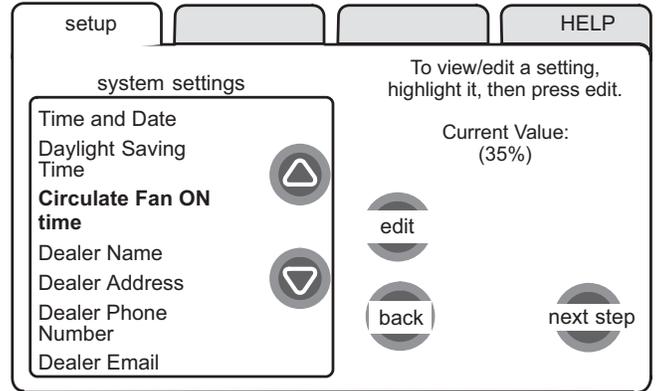

After power is applied to the thermostat for the first time, it checks the system for installed communicating devices, the “*System Discovery*” progress screen is displayed on the thermostat; followed by the “*Use this thermostat?*” screen.

During the setup process, alerts may be displayed to inform the installer of any information that affects the setup process.

SETUP - SYSTEM SETTINGS

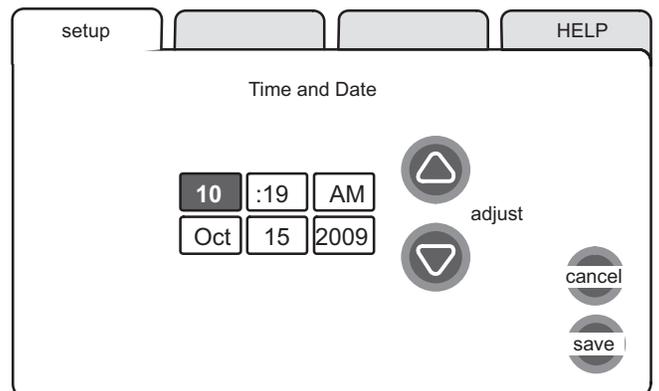

Use the up / down arrows to scroll through available settings. Right side of screen displays the current value of each setting.

Installer System Settings and Default Setting

System Setting	Range / Condition	Default Setting	Modify with
Time and Date	Time and Date Screen and arrow buttons (see example)		
Daylight Saving Time	Enabled/ Disabled	Enabled	Up / Down Arrows
Circulate Fan ON Time	15 to 45%	35%	
Dealer Name	alpha-numeric characters	Lennox	Keyboard tool
Dealer Address		- - -	
Dealer Phone Number		1-800-9-LENNOX	
Dealer Email		- - -	
Dealer Website		www.lennox.com	

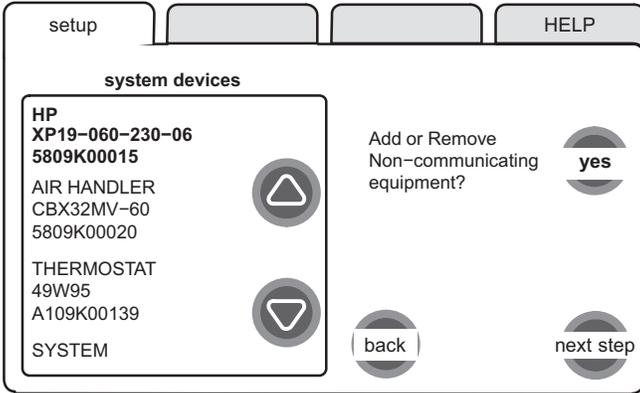

Time and Date Screen

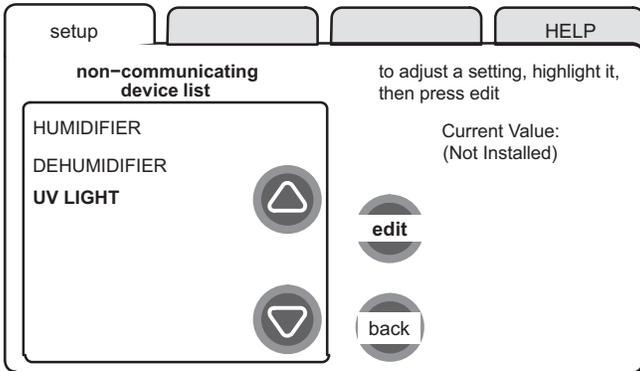

FEATURES

INSTALLER SETTINGS

Add / Remove / Modify Non-Communicating Devices

Press “yes” to access non-communicating device list screen

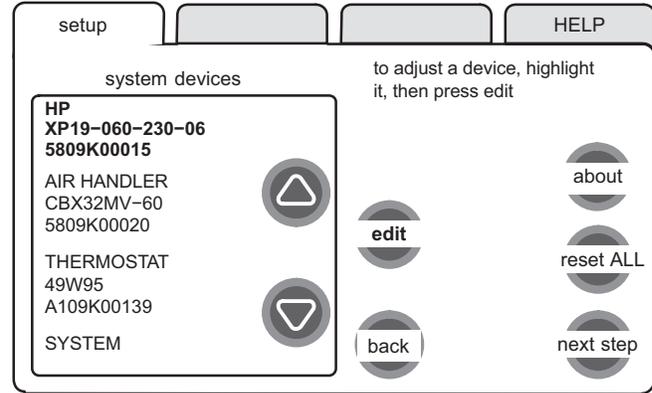

Use up/down arrow buttons to highlight and modify non-communicating device

- Outdoor Unit Type (*Not Installed, 1 Stage AC, 2 Stage AC*)
- Humidifier (*Not Installed, Bypass (24 VAC), Power (120 VAC), Bypass and Power*)
- Dehumidifier (*Not Installed, Humiditrol, Auxiliary Dehumidifier*)
- UV Light (*Not Installed, UV Light*)

 NOTE - If outdoor unit is non-communicating type, screen will display parameters to set (*Outdoor Unit Capacity, 18 to 60 kBtu in 1 kBtu increments, default is 60 kBtu*)

System Devices

Use *up / down arrow* buttons to select device. Press *edit* button to modify device settings.

Pressing “about” displays equipment information depending on type (*name, model, serial number, number of stages, cooling btuh, indoor blower cfm range, software version, outdoor air temp sensor installed, etc.*)

NOTE - “Reset ALL” resets all devices back to original factory default settings. Each individual device can be also reset to factory settings on the selected equipment screen.

Equipment Name - Press “edit” button to change equipment name, use keyboard tool to change

• Air Conditioner

- Equipment Name
- Compressor Short Cycle Delay (*60 to 300 sec. in 60 sec. increments, default is 300 sec.*)

• Heat Pump

- Equipment Name
- Compressor Short Cycle Delay (*60 to 300 sec. in 60 sec. increments, default is 300 sec.*)
- Defrost Termination Temp (*50 to 100°F in 10°F increments, default is 50°F*)
- Compressor Shift Delay (*On/Off*)

FEATURES

INSTALLER SETUP

System Devices (Continued)

• Furnace:

- Equipment Name
- Heating Airflow Control Type - Selections available if Discharge Air Temperature Sensor is installed (*Fixed cfm, fixed Discharge Air Temperature*)

With Discharge Air Temperature:

- Low Heating Discharge Air Temperature - Available if Discharge Air Temperature Sensor is installed (*110 to 140°F in 5°F increments, default is 120°F*)
- High Heating Discharge Air Temperature - Available if Discharge Air Temperature Sensor is installed (*120 to 150°F in 5°F increments, default is 135°F*)

With Fixed cfm:

- Low Heating Airflow (*325 to 1280 in 25 cfm increments*)
- High Heating Airflow (*300 to 1805 in 25 cfm increments*)
- Low Cooling Airflow (*300 to 1390 in 25 cfm increments*)
- High Cooling Airflow (*300 to 2190 in 25 cfm increments*)
- Airflow Profile Cooling:
 - A. On (*50% for 30 sec., 82% for 7.5 min.*); Off (*50% for 30 sec.*)
 - B. On (*82% for 7.5 min.*); Off (*No delays*)
 - C. No delays; Off (*45 sec. delay*)
 - D. No delays
- Low HP Airflow (*300 to 1400 cfm in 25 cfm increments*)
- High HP Airflow (*300 to 1400 cfm in 25 cfm increments*)
- Continuous Indoor Blower Airflow (*300 to 1400 in 25 cfm increments*)
- Humidification Airflow (*300 to 1400 cfm in 25 cfm increments, default is 500 cfm*)
- Dehumidification Airflow (*60 to 80% RH in 1% increments*)
- Heating Indoor Blower Off Delay (*60 to 80 sec. in 10 sec. increments default is 90 sec.*)
- Heating Indoor Blower On Delay (*15 to 45 sec. in 5 sec. increments, default is 45 sec.*)
- Cooling Indoor Blower Off Delay (*0 to 30 sec. in 2 sec. increments, default is 0 sec.*)
- Cooling Indoor Blower On Delay (*0 to 10 sec. in 5 sec. increments, default is 2 sec.*)
- HP Indoor Blower Off Delay (*0 to 60 sec. in 5 sec. increments, default is 45 sec.*)

- HP Indoor Blower On Delay (*0 to 30 sec. in 5 sec. increments, default is 0 sec.*)

All furnace default airflow settings are dependent on furnace capacity.

NOTE - Humidification and Dehumidification Airflow settings are only viewable if those non-communicating products are added during setup.

Air Handler

- Equipment Name
- Electric Heating Airflow (*1560 to 2150 cfm in 5 cfm increments*)
- Low Cooling Airflow (*450 to 2150 cfm in 5 cfm increments*)
- High Cooling Airflow (*450 to 2150 cfm in 5 cfm increments*)
- Airflow Profile Cooling:
 1. No Delays
 2. On (*No delays*); Off (*45 sec. delay*)
 3. On (*82% for 7.5 min.*); Off (*No delays*)
 4. On (*50% for 30 sec., 82% for 7.5 min.*); Off (*50% for 30 sec.*)
- Low HP Airflow (*450 to 2150 cfm in 5 cfm increments*)
- High HP Airflow (*450 to 2150 cfm in 5 cfm increments*)
- Continuous Indoor Blower Airflow (*450 to 2150 in 10 cfm increments*)
- Humidification Airflow (*450 to 2150 cfm in 5 cfm increments*)
- Dehumidification Airflow % (*60 to 80% RH in 1% increments*)
- Heating Indoor Blower OFF Delay (*0 to 10 sec. in 1 sec. increments, default is 10 sec.*)
- Heating Indoor Blower ON Delay (*0 to 5 sec. in 1 sec. increments, default is 0 sec.*)
- Cooling Indoor Blower OFF Delay (*0 to 30 sec. in 2 sec. increments, default is 0 sec.*)
- Cooling Indoor Blower ON Delay (*0 to 10 sec. in 1 sec. increments, default is 2 sec.*)
- HP Indoor Blower OFF Delay (*0 to 60 sec. in 5 sec. increments, default is 45 sec.*)
- HP Indoor Blower ON Delay (*0 to 30 sec. in 5 sec. increments, default is 0 sec.*)

All air handler default airflow settings are dependent on furnace capacity.

FEATURES

INSTALLER SETTINGS

- **Thermostat:**

- Temp. Reading Calibration (-5 to 5°F, default is 0°F)
- Humidity Reading Calibration (-10 to 10°F, default is 0°F)

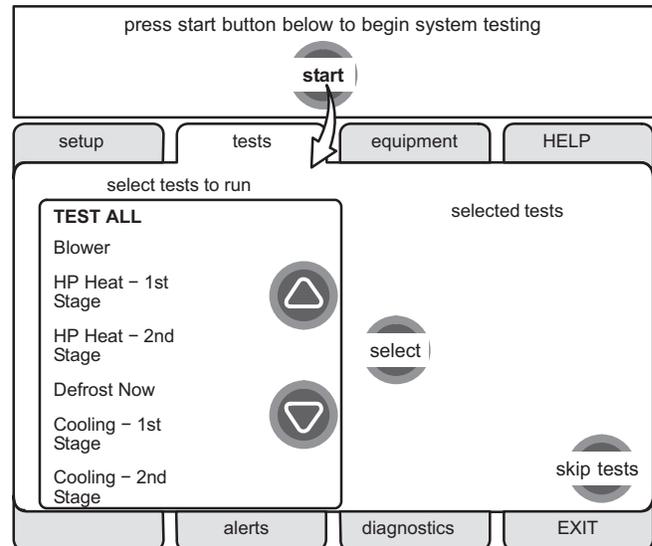

- **System**

- Equipment Name
- Filter 1 Timer Selection (*Calendar or Run Time*)
- Filter 2 Timer Selection (*Calendar or Run Time*)
- UV Bulb Timer Selection (*Calendar or Run Time*)
- Humidifier Pad Timer Selection (*Calendar or Run Time*)
- PureAir Timer Selection (*Calendar or Run Time*)
- Smooth Setback Recovery (*Enabled/Disabled*)
- Electric Heat Control Mode (*Standard/EvenHeat*)
- Gas Heat Control Mode (*Staged/Modulating*)
- Auto-Changeover Temp. Deadband (3 to 9°F, default is 5°F)
- Max. Heat Setpoint (40 to 90°F, default is 90°F)
- Min. Cool Setpoint (60 to 99°F, default is 60°F)
- Heat Cool Stages Locked In (*Enabled/Disabled*)
 - 1st Stage Differential (0.5 to 3°F, default is 0.5°F)
 - 2nd Stage Differential (0.5 to 8°F, default is 1.5°F)
 - 3rd Stage Differential (0.5 to 8°F, default is 2°F)
 - 4th Stage Differential (0.5 to 8°F, default is 2.5°F)
 - 5th Stage Differential (0.5 to 8°F, default is 3°F)
 - 6th Stage Differential (0.5 to 8°F, default is 3.5°F)
- Staged Delay Timers (*Enabled/Disabled*)
 - 2nd through 6th Stage Delays (5 to 120 min. in 5 min. increments, default is 20 min.)
- Locked in 2nd Stage HP by Outdoor Temp (*off, 40°F, 45°F, 50°F, 55°F*)
- Balance Point Control (*enabled/disabled*)
- Defrost Target Discharge Temp (50 to 60°F in 1°F increments, default is 55°F)
- EvenHeater® Discharge Temp (80 to 130°F in 1°F increments, default is 85°F)
- Dehumidification Control Mode (*Display Only, Basic, Precision*)
- Humidification Control Mode (*Display Only, Dewpoint Control*)
- OK/Humid Boundary (45 to 60°F in 1°F increments, default is 50°F)

 NOTE - Depending on type of system (conventional heating/cooling or heat pump system) not all system settings will be displayed.

TESTS

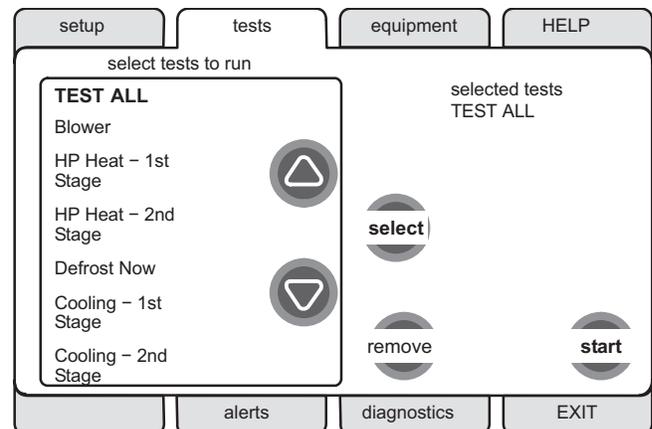

A variety of system tests can be performed by the installer. Press the *tests* tab, then press *start* to begin system testing.

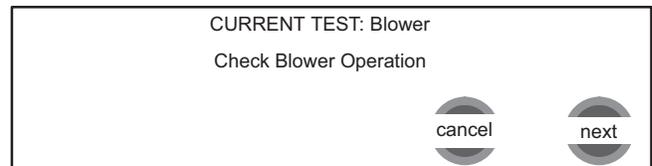

TEST ALL is the default.

You can also test equipment individually. Use *up / down arrow* buttons to select device.

Then press *select*, then *start* on the next screen to test all or individual equipment.

The *remove* button allows you to remove individual equipment from the TEST ALL list if you only want to test certain equipment. Press the *start* button to begin testing.

When a test is running, a status screen will show which test is being run. A *Testing Process is Finished* confirmation screen will appear when testing is complete.

 NOTE - The *tests* feature is not available until after setup has been completed at least once.

FEATURES

INSTALLER SETTINGS

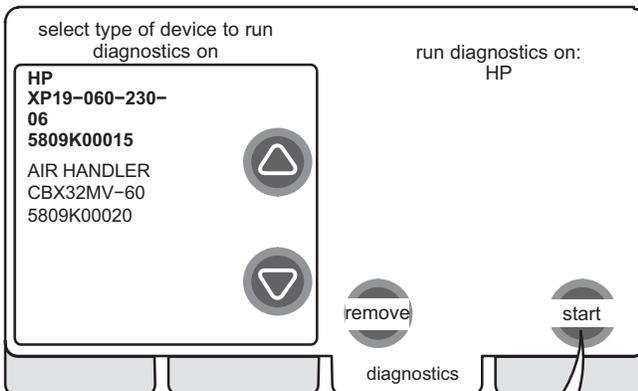

DIAGNOSTICS

Allows installer to run diagnostic tests on any icomfort™-enabled product.

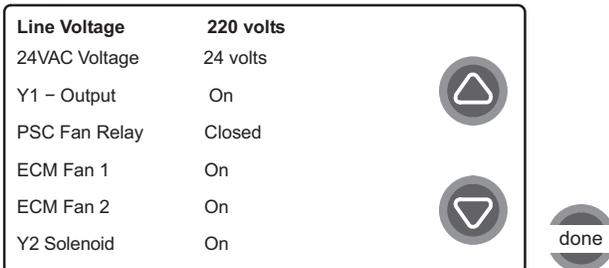

Use the up/down arrow buttons to highlight and press *select* and *start* to run diagnostics on selected equipment.

Screen will display “DIAGNOSTICS IN PROGRESS . . .” and will show a list of values and conditions.

HP
Diagnostics

Use the up/down arrow buttons to scroll through the available information.

EQUIPMENT

The *equipment* tab allows the same equipment setting adjustments as in the *setup* tab, see System Devices, page 4.
