LENNOX

SL280UHNV DAVE LENNOX *SIGNATURE®* COLLECTION Upflow / Horizontal - Two-Stage Heat - Variable Speed Blower - 60Hz

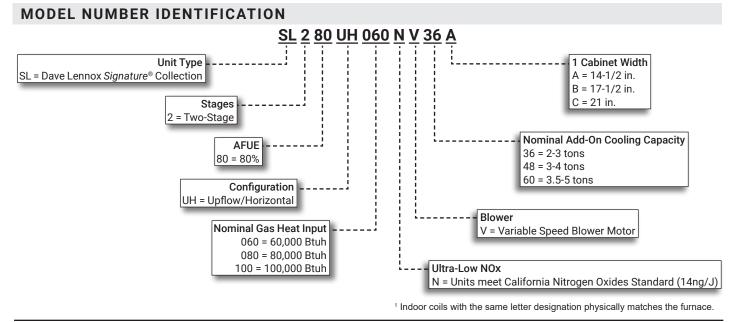

RESIDENTIAL PRODUCT SPECIFICATIONS Bulletin No. 210793 September 2019 Supersedes July 2019

GAS FURNACES

AFUE - 80% Meets NO_x Limit of 14 ng/J Input - 60,000 to 100,000 Btuh Nominal Add-on Cooling - 2 to 5 Tons

- 1. Heat Exchanger Assembly
- 2. Burner Orifice/Air Intake Assembly
- 3. SureLight® Hot Surface Ignitor
- 4. Modulating Gas Control Valve
- 5. Variable-Speed Combustion Air Inducer
- 6. Thermal Switch
- 7. Variable Speed Direct Drive Blower
- 8. SureLight[®] Integrated Furnace Control
- 9. Variable Speed Direct Drive Blower
- 10. Insulated Cabinet
- 11. Safety Interlock Switch
- 12. Gas Piping And Electrical Inlets

NOTE - SL280UHNV FURNACES ARE NOT AVAILABLE IN CANADA! NOTE - SL280UHNV 100K FURNACES ARE NATURAL GAS ONLY! NOTE - SL280UHNV FURNACES CANNOT BE TWINNED! NOTE - NOT AVAILABLE IN ALL AREAS! CONTACT YOUR NEAREST LENNOX SALES OFFICE FOR DETAILS.

Specifications

APPROVALS AND WARRANTY

APPROVALS

- AHRI Certified
- Tested and rated according to US DOE test procedures and FTC labeling regulations
- Approved by the California Energy Commission and meets California Nitrogen Oxides Standard (NOx) limits of 14 ng/J
- Units are approved for installations from 0 4500 ft.
- ISO 9001 Registered Manufacturing Quality System
- · Blower data from unit tests conducted in Lennox Laboratory air test chamber

WARRANTY

- Heat Exchanger:
 - · Limited twenty years in residential applications
 - Limited ten years in non-residential applications
- All other covered components:
 - · Limited ten years in residential installations
 - · Limited one year in non-residential installations

NOTE - Refer to Lennox Equipment Limited Warranty certificate included with unit for specific details.

FEATURES

APPLICATIONS

- Input capacities of 60,000, 80,000 and 100,000 Btuh
- Energy efficiency (AFUE) 80%
- Compact cabinet for upflow, horizontal-left or horizontalright applications
- Utility room, alcove, closet, crawl space, basement or attic installation
- Lennox add-on indoor coils, high-efficiency air cleaners and humidifiers can easily be added to furnace
- Shipped factory assembled with all controls installed and wired
- Ready for installation in upflow or horizontal right-hand position without any modifications
- Horizontal left-hand requires repositioning of pressure switch
- Removable bottom seal panel shipped in place for side return air is easily removed for bottom/end return air applications
- Each unit factory test operated to ensure proper operation

ZONING APPLICATIONS

- The SL280V furnace is designed to work with the Lennox iHarmony[®] Zoning System with the iComfort[®] Communicating Thermostat
- The iHarmony[®] Zoning System provides direct feedback to the furnace, controlling both airflow and heat output to precisely match the comfort requirements for up to four zones

HEATING SYSTEM

Heat Exchanger Assembly

- Heavy gauge aluminized steel heat exchanger
- Tubular design
- Designed for normal expansion and contraction

- Round surfaces create minimum resistance to air flow for excellent heat transfer
- Laboratory life cycle tested in excess of industry standards
- Compact size permits low overall design of furnace cabinet

- 2 Burner Orifice/Air Intake Assembly
 - Burner assembly has a single orifice located between the gas valve and the air intake assembly
 - Orifice is precisely matched to the burner input
 - Burner can be removed for servicing

3 SureLight[®] Hot Surface Ignitor

- Tough, reliable, long-life, trouble-free performance
- Silicon nitride ignitor
- 120 volt
- Cemented to steatite block for protection against current leakage
- Ignition leads are constructed of nickel plated copper and are enclosed in high temperature Teflon[®] insulation for dependable operation

4 Modulating Gas Control Valve

• 24 volt redundant combination modulating gas control valve combines manual shut off switch (On-Off), automatic electric valve (dual) and gas pressure regulation into a compact combination control

5 Variable-Speed Combustion Air Inducer

- Heavy duty variable-speed blower prepurges heat
 exchanger and safely vents flue products
- Pressure switch (low fire/high fire) proves blower operation before allowing gas valve to open
- · Operates only during heating cycle

HEATING SYSTEM (continued)

6 Thermal Switch

- Factory installed on air/fuel intake assembly
- Automatic reset
- Switch provides protection from abnormal operating conditions

Limit Controls

- Primary limit is accurately located on vestibule panel on all units
- Automatic reset

Optional Accessories

Natural Gas to LPG/Propane Conversion Kit (60K and 80K Input Furnaces Only)

- Required for field changeover from natural gas to LPG/ Propane
- Includes gas and air orifices

Vent Adaptor (Upflow Applications Only)

- Allows venting through a masonry chimney without the need of a flue liner
- Manual reset temperature sensor protects against abnormal operating conditions
- Sensor wiring may be routed from either side of adaptor
- Minimum winter design temperatures:
 - -10°F when used with interior masonry chimneys
- +5°F when used with exterior masonry chimneys
- **NOTE** Refer to Winter Design Temperatures Map on page 8 for application information. Also refer to the installation instructions for detailed information.

BLOWER

Variable Speed Direct Drive Blower

- Each blower assembly statically and dynamically balanced
- · Blower assembly easily removed for servicing

Variable Speed Blower Motor

- Variable speed motor maintains specified air volume from 0 though 0.8 in. w.g. (heating) and 0 through 1.0 in. w.g. (Cooling) static range
- Variable speed operation is achieved by the use of an ECM (Electronically Commutated Motor) motor
- Motor is controlled by furnace control
- Change in blower speed is easily accomplished by simple DIP switch change on furnace control
- See Blower Data tables
- Motor is resiliently mounted
- **NOTE** When furnaces are used with the iHarmony[®] Zoning System and the iComfort[®] Communicating Thermostat, the blower motor operates from

predetermined minimum - maximum air volumes to satisfy zone requirements.

CONTROLS

8 SureLight[®] Control (iComfort[®] Communicating)

- Advanced control communicates information about various operating parameters in the furnace to the optional iComfort® Communicating Thermostat to constantly maintain the highest level of comfort and performance available
- Auto Configuration On startup the control automatically sends a description of the unit to the optional iComfort[®] Communicating Thermostat to automatically configure the number of stages and features

- number of stages and features available
- Terminals for connecting a conventional heating/cooling thermostat are also provided on the control
- Control also features Innovative AirFlex™ technology which allows custom blower settings based on the application
- **NOTE** For optimal performance, the use of a high-quality, digital two-stage thermostat with adjustable settings for first stage/second stage, on/off differentials and adjustable stage timers is recommended.

Furnace Input Staging Options

Thermostat Type	Input Staging Available
iComfort [®] Thermostat	
Two-Stage (Conventional)	Two-Stage (65 and 100%)
Single-Stage (Conventional)	
0 () 0) 1	

- Safety Controls Flame sensor utilizes flame rectification for safe and reliable operation
- Should flame fail to ignite, control will initiate 4 reattempts at ignition before locking out unit operation for 60 minutes
- Watchguard type circuit automatically resets ignition control after one hour of continuous thermostat demand after unit lockout, eliminating nuisance calls for service
- Display LED Seven segment LED displays alphanumeric information related to diagnostics as well as system operation and status
- Diagnostic codes are held in non-volatile memory, immune from power interruptions
- Holds up to ten diagnostic codes in order of occurrence for recall on demand
- Port on blower door allows for easy viewing

CONTROLS (continued)

DIP Switch Settings

- Select Thermostat Used Single-Stage or Two-Stage
- Two selectable second stage recognition times (7 and 12 minutes) are available on the control when the furnace is used with a single-stage thermostat
- When used with a two-stage thermostat, furnace will only initiate second stage operation with a second stage thermostat demand
- Heating Speeds A combination of DIP switch settings allow the following motor speed selection settings within the heating speed selected for fine tuning air volume:
 - Factory default
 - 6%, 12%, 18% or 24% increase
 - 6%, 12% or 18% decrease
- See Blower Performance tables
- **Cooling Speeds** A combination of DIP switch settings allow the following motor speed selection settings within the cooling speed selected for fine tuning air volume:
 - Factory default
 - 10% increase
 - 10% decrease
- See Blower Performance tables
- Blower Speed Ramping (Cooling Mode) DIP switch settings allow one of four blower speed profiles during cooling operation.
 - Profile A (factory setting) Motor runs at 50% for 30 seconds, then at 82% for 7-1/2 minutes, then at 100% (if needed) until demand is satisfied. Once demand is met, motor runs at 50% for 30 seconds, then ramps down to stop
 - **Profile B** Motor runs at 82% for 7-1/2 minutes and then at 100% (if needed) until demand is satisfied. Once demand is met, motor ramps down to stop
 - **Profile C** Motor runs at 100% until demand is satisfied. Once demand is met, motor runs at 100% for 60 seconds, then ramps down to stop
 - **Profile D** Motor runs at 100% until demand is satisfied. Once demand is met, motor ramps down to stop
- Dehumidification (Active or Humiditrol® Option) A jumper on the control must be clipped to enable active dehumidification and/or operation with a Humiditrol® Whole-Home Dehumidification System
- A humidity controlling thermostat or device is also required
- During a call for cooling, air volume is automatically reduced, forcing humidity removal by the air conditioner or heat pump system (single stage units or two-stage units running at 2nd stage)
- After the humidity has reached the desired set-point the cooling air volume returns to its designed rate
- A dehumidification signal from the thermostat reduces the cooling cfm to 70% of the requested cooling cfm

- Dual-Fuel Operation A jumper on the control must be clipped to enable operation with a single or two-stage heat pump
- The indoor blower is started without delay when a call for heat is received
- Two-Stage Compressor Operation A jumper on the control must be clipped to enable operation with a two-stage compressor
- The cooling blower speeds for first and second stage cooling will be dictated by the applicable DIP switch settings
- Lennox System Operations Monitor Connection -Monitors outdoor unit operation (communicating mode)
- Blower On/Off Time (Heating) Blower on time is fixed at 30 seconds, blower off time is adjustable from 60, 90, 120 and 180 seconds (factory setting - 90 seconds)
- Blower On/Off Time (Cooling) For air-conditioning applications, blower on time is 2 seconds following thermostat demand for cooling
- See "Blower Speed Ramping (Cooling Mode)" profiles for various blower off details
- Controls evaporator humidity by controlling blower and compressor speed on two-stage outdoor units when used with the iComfort[®] Communicating Thermostat
- Continuous Blower Speed Adjustable continuous blower speed is a percentage of the high cooling speed selection
- Four selectable options (via DIP switch settings) of 28%, 38% (default setting), 70% and 100%
- Accessory Terminal One accessory terminal furnished for additional power supply requirements for 120 volt (less than 1 amp) powered IAQ accessories
- One un-powered pair of contacts are provided for humidifier connections and may be connected to 24V or 120V
- Control is factory installed in the unit control box

24 Volt Transformer

- Furnished and factory installed in control box
- 40VA transformer has circuit breaker wired in series

Field Wiring Make-Up Box

- Furnished for line voltage wiring
- Factory installed internally on left side of furnace
- Box may be installed internally or externally on either side of furnace

CONTROLS (continued)

Optional Accessories

iComfort® S30 Ultra-Smart Wi-Fi Thermostat (part of the iComfort® Residential Communicating Control System)

Recognizes and connects to all iComfort[®]
 Communicating products to automatically configure

and control the heating/ cooling system (based on user-specified settings) for the highest level of comfort, performance and efficiency

 Recognizes model and serial number

information for iComfort® Communicating products to simplify system setup

- Wi-Fi remote temperature monitoring and adjustment through a home wireless network for desktop PCs, laptops and apps for smartphones or tablets
- Smart home automation compatible with Apple HomeKit[™], Amazon Alexa[®], Google Assistant and IFTTT
- Service alerts and reminders sent via text message or e-mail
- Dealer Dashboard features online real-time monitoring of installed iComfort® Communicating systems
- Simple easy-to-use touchscreen allows complete system configuration
- Scheduled maintenance alerts, system warnings and troubleshooting are also displayed on thermostat screen
- Easy to read 7 inch high definition color display (measured diagonally)
- Conventional outdoor units (not iComfort[®] Communicating) can easily be added and controlled by the iComfort[®] S30 Thermostat
- Installer setup screens allow quick and simple system configuration without a manual, Installer can also run tests on complete system or individual components for easy maintenance and troubleshooting
- Serial communications bus (RSBus), with less wiring than a conventional heating/cooling system, allows system communication
- Uses 4-wire, 18-gauge standard thermostat wiring
- High Definition Color Display, Mag-Mount, Smart Hub Controller, wallplate (for retrofit installations) furnished for easy installation
- **NOTE** See the iComfort[®] S30 Thermostat Product Specifications bulletin in the Controls section for more information.

Remote Outdoor Temperature Sensor

- Used with the iComfort[®] S30 Smart Wi-Fi Thermostat
- Outdoor sensor allows thermostat to display outdoor temperature
- Automatically detected when connected to thermostat
- **NOTE** Sensor is required for the Enhanced Dehumidification Accessory (EDA).

NOTE - Sensor is furnished as standard with iComfort[®] Communicating outdoor units, optional for conventional units.

Thermostat

- · Thermostat is not furnished with unit
- Lennox Price Book for selection

CABINET

- **NOTE** Flue outlet is on top of cabinet only! If furnace is installed horizontally, the flue must be vented vertically after exiting the top of the cabinet (upflow furnace position) or end of the cabinet (horizontal furnace position)!
- Low-profile, narrow width cabinet allows easy installation
- · Heavy-gauge, cold rolled steel construction
- Pre-painted cabinet finish
- Flanges provided on supply air opening for ease of plenum connection or alignment with indoor coil
- Insulated cabinet with foil faced insulation on sides and back of heating compartment and mat faced insulation in blower compartment
- · Sealed blower compartment
- Inner blower compartment access panel seals blower compartment from air leakage

10 · Cabinet door can be removed without any tools

- Complete service access
- Safety interlock switch automatically shuts off power to unit when inner blower compartment access panel is removed
- Gas piping and electrical inlets are provided in both sides of cabinet on "B" and "C" width models.
 - **NOTE** Gas piping is only available on the left side of the cabinet on "A" width models.

Bottom/Side Return Air Entry:

- · Upflow/horizontal with bottom return air entry:
 - · Remove furnished bottom seal panel from cabinet
- · Upflow only with side return-air entry:
- Corners are marked on either side of cabinet for return air cut-out
- See dimension drawings
- **NOTE** 60C size units that require air volumes over 1800 cfm must have one of the following:
 - Single side return air and Optional Return Air Base with transition that must accommodate required $20 \times 25 \times 1$ inch air filter to maintain proper velocity
 - Bottom return air
 - Return air from both sides
- Bottom and one side return air
- See Blower Performance Tables for additional information

Coil Match-Up

- All furnaces exactly match Lennox cased upflow indoor coils and horizontal indoor coils with same letter designation (A, B, C, D) in model number
- No adaptor required
- Engaging holes furnished on cabinet for alignment
- Lennox uncased coils match furnaces without any overhang but require an optional adaptor base or field fabricated transition to match furnace opening

· See coil bulletin for additional information

Low Leakage Cabinet

- All models have less than 2% air leakage
- Meets ANSI/ASHRAE Standard 193-2010 "Method of Test for Determining the Air Tightness of HVAC Equipment"

Optional Accessories

Horizontal Suspension Kit

- Provides suspension of unit and indoor coil in horizontal applications
- Allows complete service access
- Consists of corner mounted hanging brackets with vibration isolators, return air end support rail and hardware for assembly
- Metal hanging straps must be field provided

Return Air Base

- **NOTE** On furnaces with side return air and condensate trap on the same side of the cabinet, a field fabricated transition or Return Air Base is required when using an IAQ product higher than 14-3/16 inches installed next to the unit and serviced from the front. IAQ products higher than 20 inches require a field fabricated transition.
- **NOTE** Must be used for 60C size models with air volumes over 1800 cfm in upflow applications when only one side return is required.
- · Cabinet is shipped flat for easy field assembly
- · Pre-painted steel to match the furnace
- · See Dimension Drawing

FILTER (not furnished)

• Filter and provisions for external mounting must be field provided

Optional Accessories

Air Filter and Rack Kit for Horizontal Return Air (End) Applications

- Washable or vacuum cleanable polyurethane frame type filter and external end return air rack
- · Rack has filter door for servicing
- Flanges on rack for duct connection
- Field installed
- See dimension drawing

Air Filter and Rack Kit for Upflow Side Return Air NOTE - Not for use with Return Air Base

- Washable or vacuum cleanable polyurethane frame type filter and external side return air rack available for field installation
- Available in single and ten pack kits
- Rack has filter door for servicing
- Flanges on rack for duct connection
- · Field installs on either side of unit cabinet
- See dimension drawing

99% WINTER DESIGN TEMPERATURES FOR THE CONTIGUOUS UNITED STATES

This map is a necessarily generalized guide to temperatures in the contiguous Unites States. Temperatures shown for areas such as mountainous regions and large urban centers may not be accurate. The data used to develop this map was taken from the 1993 ASHRAE Fundamentals Handbook (Chapter 24, Table 1: Climate Conditions for the United States). Reprinted with permission from NFPA 54: National Fuel Gas Code 1999, National Fire Protection Association, Quincy, MA 02269. This reprinted material is not the complete and official position of the National Fire Protection Association on the referenced subject, which is represented only by the standard in its entirety.

DIMENSIONS - UNIT - HORIZONTAL POSITION

Optional Return Air Base (Upflow Applications Only - For use with A, B and C width cabinets)

NOTE- Optional Side Return Air Filter Kits are not for use with Optional Return Air Base.

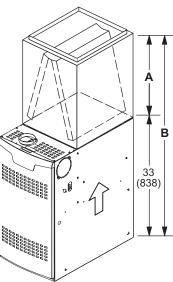

¹ Both the unit return air opening and the base return air opening must be covered by a single plenum or IAQ cabinet. Minimum unit side return air opening dimensions for units requiring 1800 cfm or more of air (W x H): 23 x 11 in. (584 x 279 mm). The opening can be cut as needed to accommodate plenum or IAQ cabinet while maintaining dimensions shown. Side return air openings must be cut in the field. There are cutting guides stenciled on the cabinet for the side return air opening. The size of the opening must not extend beyond the markings on the furnace cabinet.

² To minimize pressure drop, the largest opening height possible, up to 14 in. (356 mm), is preferred.
