SL297UHNV

LENNOX

DAVE LENNOX SIGNATURE® COLLECTION

Upflow / Horizontal - Two-Stage Heat - Variable Speed Blower - 60 Hz

RESIDENTIAL PRODUCT SPECIFICATIONS

Bulletin No. 210811 November 2020 Supersedes September 2019

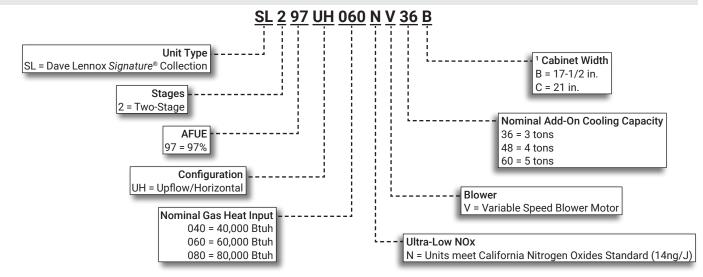

AFUE - 97.5% Meets NOx Limit of 14 ng/J Input - 40,000 to 80,000 Btuh Nominal Add-on Cooling - 2 to 5 Tons

MODEL NUMBER IDENTIFICATION

¹ Indoor coils with the same letter designation physically matches the furnace.

FEATURE HIGHLIGHTS

- 1. Heat Exchanger Assembly
- 2. Secondary Heat Exchanger
- 3. SureLight® Hot Surface Ignitor
- 4. Modulating Gas Control Valve
- 5. Variable-Speed Combustion Air Inducer
- 6. Thermal Switch
- 7. SureLight® Integrated Furnace Control
- 8. Variable Speed Direct Drive Blower
- 9. Insulated Cabinet
- 10. Safety Interlock Switch
- 11. Gas Piping And Electrical Inlets

NOTE - SL297UHNV 40K INPUT FURNACES ARE NATURAL GAS ONLY!

NOTE - SL297UHNV FURNACES CANNOT BE TWINNED!

NOTE - NOT AVAILABLE IN ALL AREAS!

CONTACT YOUR NEAREST LENNOX SALES OFFICE FOR DETAILS.

Vent Lengths - Uninsulated Exhaust Pipe In Unconditioned Space

APPROVALS AND WARRANTY

APPROVALS

- · AHRI Certified
- · CSA International Certified
- Tested and rated according to US DOE test procedures and FTC labeling regulations
- Approved by the California Energy Commission and meets California Nitrogen Oxides Standard (NOx) limits of 14 ng/J
- Units are approved for installations from 0 4500 ft.
- ENERGY STAR® certified units are designed to use less energy, help save money on utility bills, and help protect the environment
- · ISO 9001 Registered Manufacturing Quality System
- · Blower data from unit tests conducted in Lennox Laboratory air test chamber

California Only

 These furnaces meet the South Coast Air Quality Management District (SCAQMD) Rule 1111 and San Joaquin Valley Air Pollution Control District (SJVAPCD) Rule 4905 NOx emission limit (14 ng/J) and can be installed within the SCAQMD and SJVAPCD areas

WARRANTY

- · Heat Exchanger:
- · Limited twenty years in residential applications
- · Limited ten years in non-residential applications
- · All other covered components:
- Limited five years in residential installations
- · Limited one year in non-residential installations

NOTE - Refer to Lennox Equipment Limited Warranty certificate included with unit for specific details.

FEATURES

APPLICATIONS

- Input capacities of 40,000, 60,000 and 80,000 Btuh
- Energy efficiency (AFUE) 97.5%
- · Upflow, horizontal-left or horizontal-right applications
- Utility room, alcove, closet, crawl space, basement or attic installation
- Lennox add-on indoor coils, high-efficiency air cleaners and humidifiers can easily be added to furnace
- Shipped factory assembled with all controls installed and wired
- Removable bottom seal panel shipped in place for side return air is easily removed for bottom/end return air applications
- Each unit factory test operated to ensure proper operation

Zoning Applications

- May be used with the Lennox iHarmony® Zoning System with an iComfort® Communicating Thermostat
- iHarmony® Zoning System provides direct feedback to the furnace, controlling both airflow and heat output to match the comfort requirements for up to four zones

HEATING SYSTEM

- 1 Heat Exchanger Assembly
 - Heavy gauge aluminized steel heat exchanger
 - Tubular type design
 - Designed for normal expansion and contraction with maximum efficiency and minimum resistance to air flow
 - Secondary heat exchanger condenser coil constructed of aluminum fins fitted to stainless steel tubes
 - Coil is factory tested for leaks
 - Condensate drain header box assembly located on front of coil
 - Laboratory life cycle tested in excess of industry standards
 - Compact size permits low overall design of furnace cabinet

Header Box

- Header box on end of condenser coil collects flue condensate for disposal through condensate drains
- Drains are located on each side of the cabinet for easy field installation of condensate drain trap
- Only one drain is used, the other drain is sealed
- Condensate drain trap is included for field installation

HEATING SYSTEM (continued)

Flue Condensate Trap Assembly

- Field installed outside the conditioned air stream
- Assembly can be mounted on either side of cabinet in upflow applications
- Assembly is mounted below the cabinet in horizontal applications
- Can also be mounted remotely (up to 5 ft. away) from
- · See Installation Instructions
- 90° street elbow furnished for ease of drain trap installation
- Drain connection can be made with field provided PVC pipe, PVC coupling, or vinyl tubing with hose clamp
- Drain cap on trap allows easy cleaning and winterizing

3 SureLight® Hot Surface Ignitor

- Tough, reliable, long-life, trouble-free performance
- · Silicon nitride ignitor
- Cemented to steatite block for protection against current leakage
- Ignition leads are constructed of nickel plated copper and are enclosed in high temperature Teflon® insulation for dependable operation

Modulating Gas Control Valve

 24 volt redundant combination modulating gas control valve combines manual shut off switch (On-Off), automatic electric valve (dual) and gas pressure regulation into a compact combination control

5 Variable-Speed Combustion Air Inducer

- Permanent split capacitor (PSC), heavy duty blower prepurges heat exchanger and safely vents flue products
- Dual pressure switches (low fire/high fire) prove blower operation before allowing gas valve to open
- Operates only during heating cycle

Thermal Switch

- Factory installed on air/fuel intake assembly
- Provides protection from abnormal operating conditions
- · Automatic reset

Limit Control

- Primary limit is accurately located on vestibule panel
- · Automatic reset

Optional Accessories

Natural Gas to LPG/Propane Conversion Kit (60K and 80K Input Furnaces Only)

- Required for field changeover from natural gas to LPG/ Propane
- · Includes gas and air orifices

Muffler (US Only)

- Significantly reduces outdoor operating sound levels
- · Installed vertically in the exhaust piping
- · See Optional Accessory Dimension Drawing

DIRECT VENT SEALED COMBUSTION SYSTEM

- Furnace features a "sealed combustion" system and can only be installed in Direct Vent applications
- In Direct Vent applications, combustion air is supplied from outdoors and flue gases are discharged outdoors

NOTE - Lennox has approved the use of DuraVent®
PolyPro® and Centrotherm InnoFlue® manufactured
vent pipe and terminations as an alternative to PVC
vent pipe. Must be ordered separately.
Tested and listed to the ULC S636 standard in
Canada

NOTE - The polypropylene venting system must follow the uninsulated and unconditioned space vent lengths listed in the table on Page 11. Refer to the Installation Instructions for additional details.

Optional Accessories

Flue Coupling

- Assists with exhaust flue piping connection and servicing
- Includes flexible one 2-inch rubber coupling and two adjustable bands
- Approved for all Lennox 90% furnaces

Vent Termination Kits

- Facilitates installation of combustion air intake pipe and flue exhaust pipe
- Refer to venting table in this bulletin to determine pipe size needed and proper termination kit required
- See Optional Accessories table and dimension drawings

Concentric Termination Kit

- 2 or 3 inch kit contains concentric termination assembly, reducer bushing and 45° elbow
- 2 inch kit for -070 model contains an outdoor exhaust accelerator
- Kit requires single hole penetration of roof or wall for installation
- Roof Termination Flashing Kit available for use 2 inch Kits
- · CSA certified

Flush-Mount Termination Kit

- Kit contains flush-mount termination, accelerator, mounting template and hardware
- Kit may be used with 2, 2-1/2 or 3 inch pipe

Wall Assembly Termination Kits

Close Couple (US Only)

- 2 or 3 inch kit consists of close-couple, side-by-side PVC piping with galvanized steel wall cover plate for
- Seals and isolates intake and exhaust piping penetration of wall
- Piping spacing and length is sized for proper wall installations
- · CSA certified

Close Couple WTK (Canada Only)

• 2 or 3 inch kit contains one insulated faceplate, one insulated exhaust pipe, elbow and fittings

DIRECT VENT SEALED COMBUSTION SYSTEM (continued)

Wall Ring

- 2 inch kit contains 2 stainless steel outside seal caps,
 2 galvanized steel inside seal caps, 4 seal rings for the caps and 18 inch insulation sleeve
- Seals and isolates intake and exhaust piping penetration of wall
- **NOTE** Maintain a maximum of 6 inches between the inlet and outlet openings in the installation of the pipes.

Roof Termination Flashing Kit

- · For vertical venting through a roof
- 3 inch kit contains two neoprene rubber roof flashings
- · Vent pipe and insulation not furnished
- Flashing Kit can also be used with 2 inch Concentric Vent Termination Kits used in vertical venting rooftop applications

CONTROLS

- Advanced control communicates information about various operating parameters in the furnace to the optional iComfort® Communicating Thermostat to constantly maintain the highest level of comfort and performance available
- Auto Configuration On startup the control automatically sends a description of the unit to the optional iComfort® Communicating Thermostat to automatically configure the
 - available
- number of stages and features available
- Terminals for connecting a conventional heating/cooling thermostat are also provided on the control
- Control also features Innovative AirFlex™ technology which allows custom blower settings based on the application
- NOTE For optimal performance, the use of a high-quality, digital two-stage thermostat with adjustable settings for first stage/second stage, on/off differentials and adjustable stage timers is recommended.

Furnace Input Staging Options

Thermostat Type	Input Staging Available
iComfort® Thermostat	
Two-Stage (Conventional)	Two-Stage (65 and 100%)
Single-Stage (Conventional)	

• Safety Controls - Flame sensor utilizes flame rectification for safe and reliable operation

- Should flame fail to ignite, control will initiate 4 reattempts at ignition before locking out unit operation for 60 minutes
- Watchguard type circuit automatically resets ignition control after one hour of continuous thermostat demand after unit lockout, eliminating nuisance calls for service
- **Display LED** Seven segment LED displays alphanumeric information related to diagnostics as well as system operation and status
- Diagnostic codes are held in non-volatile memory, immune from power interruptions
- Holds up to ten diagnostic codes in order of occurrence for recall on demand
- · Port on blower door allows for easy viewing

DIP Switch Settings

- · Select Thermostat Used Single-Stage or Two-Stage
- Two selectable second stage recognition times (7 and 12 minutes) are available on the control when the furnace is used with a single-stage thermostat
- When used with a two-stage thermostat, furnace will only initiate second stage operation with a second stage thermostat demand
- Heating Speeds A combination of DIP switch settings allow the following motor speed selection settings within the heating speed selected for fine tuning air volume:
 - Factory default
 - 6%, 12%, 18% or 24% increase
 - 6%, 12% or 18% decrease
- · See Blower Performance tables
- Cooling Speeds A combination of DIP switch settings allow the following motor speed selection settings within the cooling speed selected for fine tuning air volume:
 - Factory default
 - 10% increase
 - 10% decrease
- · See Blower Performance tables
- Blower Speed Ramping (Cooling Mode) DIP switch settings allow one of four blower speed profiles during cooling operation.
 - Profile A (factory setting) Motor runs at 50% for 30 seconds, then at 82% for 7-1/2 minutes, then at 100% (if needed) until demand is satisfied.
 Once demand is met, motor runs at 50% for 30 seconds, then ramps down to stop
 - Profile B Motor runs at 82% for 7-1/2 minutes and then at 100% (if needed) until demand is satisfied. Once demand is met, motor ramps down to stop
 - Profile C Motor runs at 100% until demand is satisfied. Once demand is met, motor runs at 100% for 60 seconds, then ramps down to stop
 - **Profile D** Motor runs at 100% until demand is satisfied. Once demand is met, motor ramps down to stop

CONTROLS (continued)

- Dehumidification (Active or Humiditrol® Option) A jumper on the control must be clipped to enable active dehumidification and/or operation with a Humiditrol® Whole-Home Dehumidification System
- A humidity controlling thermostat or device is also required
- During a call for cooling, air volume is automatically reduced, forcing humidity removal by the air conditioner or heat pump system (single stage units or two-stage units running at 2nd stage)
- After the humidity has reached the desired set-point the cooling air volume returns to its designed rate
- A dehumidification signal from the thermostat reduces the cooling cfm to 70% of the requested cooling cfm
- Dual-Fuel Operation A jumper on the control must be clipped to enable operation with a single or two-stage heat pump
- The indoor blower is started without delay when a call for heat is received
- Two-Stage Compressor Operation A jumper on the control must be clipped to enable operation with a two-stage compressor
- The cooling blower speeds for first and second stage cooling will be dictated by the applicable DIP switch settings
- Lennox System Operations Monitor Connection -Monitors outdoor unit operation (communicating mode)
- Blower On/Off Time (Heating) Blower on time is fixed at 30 seconds, blower off time is adjustable from 60, 90, 120 and 180 seconds (factory setting 90 seconds)
- Blower On/Off Time (Cooling) For air-conditioning applications, blower on time is 2 seconds following thermostat demand for cooling
- See "Blower Speed Ramping (Cooling Mode)" profiles for various blower off details
- Controls evaporator humidity by controlling blower and compressor speed on two-stage outdoor units when used with the iComfort® Communicating Thermostat
- Continuous Blower Speed Adjustable continuous blower speed is a percentage of the high cooling speed selection
- Four selectable options (via DIP switch settings) of 28%, 38% (default setting), 70% and 100%
- Accessory Terminal One accessory terminal furnished for additional power supply requirements for 120 volt (less than 1 amp) powered IAQ accessories
- One un-powered pair of contacts are provided for humidifier connections and may be connected to 24V or 120V
- · Control is factory installed in the unit control box

24 Volt Transformer

- · Furnished and factory installed in control box
- · 40VA transformer has circuit breaker wired in series

Field Wiring Make-Up Box

· Furnished for line voltage wiring

- · Factory installed internally on left side of furnace
- · May be installed on right side of furnace

Optional Accessories

iComfort® S30 Ultra-Smart Wi-Fi Thermostat (part of the iComfort® Residential Communicating Control System)

Recognizes and connects to all iComfort®
 Communicating products to automatically configure

and control the heating/ cooling system (based on user-specified settings) for the highest level of comfort, performance and efficiency

- Recognizes model and serial number information for iComfort® Communicating products to simplify system setup
- Wi-Fi remote temperature monitoring and adjustment through a home wireless network for desktop PCs, laptops and apps for smartphones or tablets
- Smart home automation compatible with Apple HomeKit™, Amazon Alexa®, Google Assistant and IFTTT
- Service alerts and reminders sent via text message or e-mail
- Dealer Dashboard features online real-time monitoring of installed iComfort® Communicating systems
- Simple easy-to-use touchscreen allows complete system configuration
- Scheduled maintenance alerts, system warnings and troubleshooting are also displayed on thermostat screen
- Easy to read 7 inch high definition color display (measured diagonally)
- Conventional outdoor units (not iComfort®
 Communicating) can easily be added and controlled by
 the iComfort® S30 Thermostat
- Installer setup screens allow quick and simple system configuration without a manual, Installer can also run tests on complete system or individual components for easy maintenance and troubleshooting
- Serial communications bus (RSBus), with less wiring than a conventional heating/cooling system, allows system communication
- Uses 4-wire, 18-gauge standard thermostat wiring
- High Definition Color Display, Mag-Mount, Smart Hub Controller, wallplate (for retrofit installations) furnished for easy installation

NOTE - See the iComfort® S30 Thermostat Product Specifications bulletin in the Controls section for more information.

Remote Outdoor Temperature Sensor

- Used with the iComfort® S30 Smart Wi-Fi Thermostat
- Outdoor sensor allows thermostat to display outdoor temperature

- · Automatically detected when connected to thermostat
- **NOTE** Sensor is required for the Enhanced Dehumidification Accessory (EDA).
- NOTE Sensor is furnished as standard with iComfort®

 Communicating outdoor units, optional for
 conventional units.

Thermostat

- Thermostat is not furnished with unit
- Lennox Price Book for selection

BLOWER

- 8 Variable Speed Direct Drive Blower
 - Each blower assembly statically and dynamically balanced
 - · Blower assembly easily removed for servicing

Variable Speed Blower Motor

- Variable speed motor maintains specified air volume from 0 though 0.8 in. w.g. (heating) and 0 through 1.0 in. w.g. (Cooling) static range
- Variable speed operation is achieved by the use of an ECM (Electronically Commutated Motor) motor
- Motor is controlled by furnace control
- Change in blower speed is easily accomplished by simple DIP switch change on furnace control
- · See Blower Data tables
- · Motor is resiliently mounted

NOTE - When furnaces are used with the iHarmony®
Zoning System and the iComfort® Communicating
Thermostat, the blower motor operates from
predetermined minimum - maximum air volumes
to satisfy zone requirements.

CABINET

- · Low-profile, narrow width allows easy installation
- · Heavy-gauge, cold rolled steel construction
- Pre-painted cabinet finish
- Flanges provided on supply air opening for ease of plenum connection or alignment with indoor coil
- Insulated with foil faced insulation on sides and back of heating compartment and mat faced insulation in blower compartment
 - Sealed blower compartment
 - Inner blower compartment access panel seals blower compartment from air leakage
 - · Cabinet door can be removed without any tools
 - Complete service access
- Safety interlock switch automatically shuts off power to unit when blower compartment access door is removed
- 11 · Gas piping inlet is provided on right side of cabinet
 - · Electrical inlets are provided on both sides of cabinet

Bottom/Side Return Air Entry

- Upflow/horizontal with bottom return air entry:
 - · Remove furnished bottom seal panel from cabinet
- Upflow only with side return-air entry:
 - Corners are marked on either side of cabinet for return air cut-out
- See dimension drawings

NOTE - 60C size units that require air volumes over 1800 cfm must have one of the following:

- Single side return air and Optional Return Air Base with transition that must accommodate required 20 x 25 x 1 inch air filter to maintain proper velocity
- Bottom return air
- · Return air from both sides
- · Bottom and one side return air
- See Blower Performance Tables for additional information

Coil Match-Up

- All furnaces exactly match Lennox cased upflow indoor coils and horizontal indoor coils with same letter designation (A, B, C, D) in model number
- · No adaptor required
- · Engaging holes furnished on cabinet for alignment
- Lennox uncased coils match furnaces without any overhang but require an optional adaptor base or field fabricated transition to match furnace opening
- · See coil bulletin for additional information

Low Leakage Cabinet

- All models have less than 2% air leakage
- Meets ANSI/ASHRAE Standard 193-2010 "Method of Test for Determining the Air Tightness of HVAC Equipment"

Optional Accessories

Condensate Drain Heat Cable Kits

- Self-limiting wattage heat cable prevents condensate drain from freezing in unconditioned areas
- Available in 6 or 24 ft. lengths

Horizontal Suspension Kit

- Provides suspension of unit and indoor coil in horizontal applications
- Allows complete service access
- Consists of corner mounted hanging brackets with vibration isolators, return air end support rail and hardware for assembly
- Metal hanging straps must be field provided

Crawl Space Vent Drain Kit

- Allows venting through a crawl space for upflow and horizontal applications
- Kit for Canada is certified to ULC S636
- Includes 2 or 3 inch sanitary tee, 2 inch PVC assembly, PVC boot and clamp

CABINET (continued)

Optional Accessories (continued)

Return Air Base

NOTE - On furnaces with side return air and condensate trap on the same side of the cabinet, a field fabricated transition or Return Air Base is required when using an IAQ product higher than 14-3/16 inches installed next to the unit and serviced from the front. IAQ products higher than 20 inches require a field fabricated transition.

NOTE - Must be used for 60C size models with air volumes over 1800 cfm in upflow applications when only one side return is required.

- Cabinet is shipped flat for easy field assembly
- Pre-painted steel to match the furnace
- See Dimension Drawing

High Performance Economizer (Commercial Applications Only)

- Designed for applications requiring outdoor air to be utilized in a commercial HVAC system
- Allows the entry of fresh outdoor air for free cooling, reducing the requirement for mechanical cooling
- Heavy gauge galvanized steel cabinet lined with thick fiberglass insulation
- Mixed air sensor, outdoor air sensor and 24VAC transformer furnished
- Approved for California Title 24 building standards. ASHRAE 90.1-2010 compliant
- See separate Product Specifications bulletin for additional information and available control and sensor options

NOTE - Economizer is not iComfort® compatible.

FILTER (not furnished)

 Filter and provisions for external mounting must be field provided

Optional Accessories

Air Filter and Rack Kit for Horizontal Return Air (End) Applications

- Washable or vacuum cleanable polyurethane frame type filter and external end return air rack
- · Rack has filter door for servicing
- Flanges on rack for duct connection
- Field installed
- · See dimension drawing

Air Filter and Rack Kit for Upflow Side Return Air NOTE - Not for use with Return Air Base

- Washable or vacuum cleanable polyurethane frame type filter and external side return air rack available for field installation
- · Available in single and ten pack kits
- · Rack has filter door for servicing
- Flanges on rack for duct connection
- Field installs on either side of unit cabinet
- See dimension drawing

¹ Remote Outdoor Temperature Sensor is used with conventional (non-iComfort® Communicating) outdoor units (sensor is furnished with iComfort® Communicating outdoor units). Allows the thermostat to display outdoor temperature. Required in dual-fuel and EDA applications.

NOTE - Termination Kits (44W92, 44W93, 30G28, 51W12, 81J20) and Crawl Space Vent Drain Kit (15Z70) are certified to ULC S636 standard for use in Canada only.

GAS HEAT ACCESSORIES					
Input	Natural Gas to LPG/Propane Kit 0 - 4500 ft.				
040	N/A				
060	19K05				
080	19K06				

NOTE - Natural Gas to LPG/Propane Kit is not available for 40K Input furnaces.

² Optional for service diagnostics.

³ Cleanable polyurethane, frame-type filter.

HIGH ALTITUDE OPERATION

NOTE - Units may be installed at altitudes up to 4500 ft. above sea level without any modification. No modifications are required. At altitudes above 2000 ft. the furnace will naturally derate approximately 10%.

NOTE - Concentric terminations are equivalent to 5 ft. of straight pipe and should be included when measuring total pipe length.

PolyPro® poly-propylene vent pipe is a registered trademark of DuraVent®.

Innoflue® is a registered trademark of Centrotherm Eco Systems.

¹ Requires field provided 1-1/2 in. outdoor exhaust accelerator.

² Concentric Kits **71M80** and **44W92** include 1-1/2 in. outdoor exhaust accelerator, required when used with 045 and 070 input models. Accelerator is not used with 090, 110, 135 input models.

³ Flush Mount Kit **51W11** and **51W12** includes 1-1/2 in. outdoor exhaust accelerator, required when used with 045, 070 and 090 input models. Accelerator is not used with 110 or 135 input models.

⁴ Termination Kits 30G28, 44W92, 44W93, 51W12 and 81J20 are certified to ULC S636 standard for use in Canada only.

¹ Refer to 99% Minimum Design Temperature table provided in the current edition of ASHRAE Handbook-Fundamentals.

INSTALLATION CLEARANCES						
Sides	¹ 1 inches (25 mm)					
Rear	1 inches (25 mm)					
Top/Plenum	1 inch (25 mm)					
Front	1 inches (25 mm)					
Front (service/alcove)	24 inches (610 mm)					
Floor	² Combustible					

NOTE – Air for combustion must conform to the methods outlined in the National Fuel Gas Code (NFPA 54/ANSI–Z223.1) or the National Standard of Canada CAN/CSA–B149.1 Natural Gas and Propane Installation Code".

NOTE – In the U.S. flue sizing must conform to the methods outlined in the current National Fuel Gas Code (NFPA 54/ANSI-Z223.1) or applicable provisions of local building codes. In Canada flue sizing must conform to the methods outlined in National Standard of Canada CAN/CSA-B149.1.

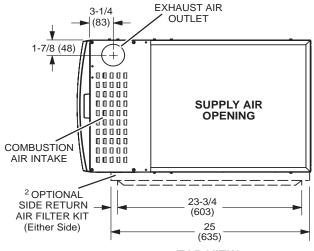

¹ Allow proper clearances to accommodate condensate trap and vent pipe installation.

 $^{^{2}}$ Do not install the furnace directly on carpeting, tile, or other combustible materials other than wood flooring.

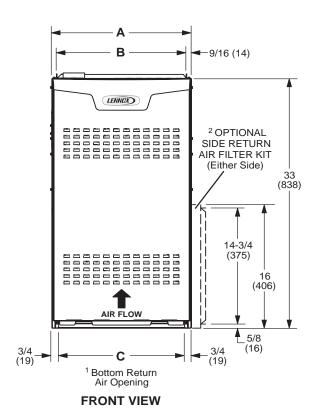

- ¹ NOTE 60C size units that require air volumes over 1800 cfm must have one of the following:
- Single side return air <u>and</u> Optional Return Air Base with transition that must accommodate required 20 x 25 x 1 inch (508 x 635 x 25 mm) air filter to maintain proper velocity.
- 2. Bottom return air.
- 3. Return air from both sides.
- 4. Bottom and one side return air.

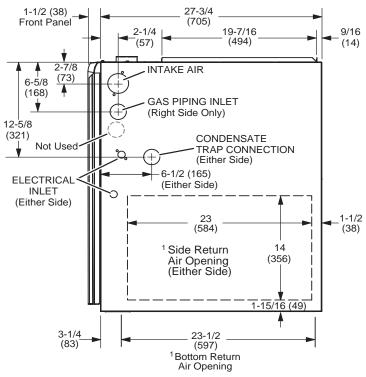

See Blower Performance Tables for additional information.

Optional Side Return Air Filter Kit is not for use with the Optional Return Air Base.

NOTE- Optional Side Return Air Filter Kits are not for use with Optional Return Air Base.

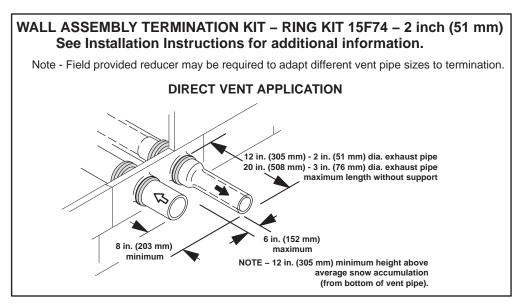

² To minimize pressure drop, the largest opening height possible, up to 14 in. (356 mm), is preferred.

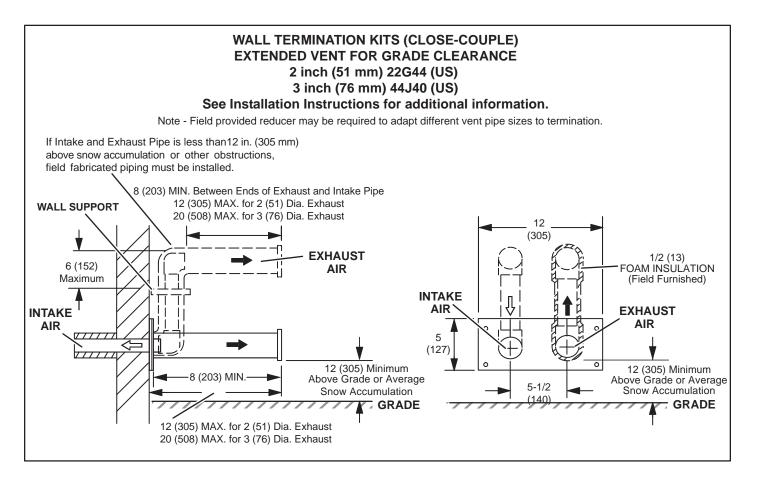

¹ Both the unit return air opening and the base return air opening must be covered by a single plenum or IAQ cabinet. Minimum unit side return air opening dimensions for units requiring 1800 cfm or more of air (W x H): 23 x 11 in. (584 x 279 mm). The opening can be cut as needed to accommodate plenum or IAQ cabinet while maintaining dimensions shown. Side return air openings must be cut in the field. There are cutting guides stenciled on the cabinet for the side return air opening. The size of the opening must not extend beyond the markings on the furnace cabinet.
