

**INSTALLATION INSTRUCTIONS FOR WALL MOUNT KIT (45K30)
USED WITH VARIOUS AIR HANDLERS**

Shipping & Packing List

Package 1 of 1 contains:

- 2 - Wall mounting brackets
- 6 - Screws

Application

Some applications need bottom return air without having the duct support the weight of the blower coil unit. This kit supports the unit by allowing it to be mounted to the wall.

Installation

1. Install one bracket to the back side of the unit cabinet with three of the screws provided. Top of bracket should be 6" from top of cabinet.
2. Install second bracket to wall at desired height with remaining screws. Bracket must be secured to studs to support weight of unit. Holes for 16" and 24" centers are provided on bracket.
3. Lift unit and rest it on wall bracket as shown in figure 1.
4. Refer to blower coil installation instructions for remaining installation procedures.
