

**PARAMETER SETTINGS FOR FIELD RETROFIT SUPPLY AIR VFD - NO UNIT CONTROLLER**

| VFD Parameters | Factory Settings    | Field Value | Description  |
|----------------|---------------------|-------------|--|
| Pr. 4          | 60 (same as Pr. 25) |             | Sets supply air fan speed for heating.                 |
| Pr. 5          | 40                  |             | Sets supply air fan speed for cooling stage 1.         |
| Pr. 6          | 30                  |             | Sets supply air fan speed for ventilation or occupied. |
| Pr. 24         | 60                  |             | Sets supply air fan speed for cooling stage 2.         |
| Pr. 25         | 60 (same as Pr. 4)  |             | Sets supply air fan speed for heating.                 |

**PARAMETER SETTINGS FOR FIELD RETROFIT SUPPLY AIR VFD - NO UNIT CONTROLLER**

| VFD Parameters | Factory Settings    | Field Value | Description  |
|----------------|---------------------|-------------|--|
| Pr. 4          | 60 (same as Pr. 25) |             | Sets supply air fan speed for heating.                 |
| Pr. 5          | 40                  |             | Sets supply air fan speed for cooling stage 1.         |
| Pr. 6          | 30                  |             | Sets supply air fan speed for ventilation or occupied. |
| Pr. 24         | 60                  |             | Sets supply air fan speed for cooling stage 2.         |
| Pr. 25         | 60 (same as Pr. 4)  |             | Sets supply air fan speed for heating.                 |

**PARAMETER SETTINGS FOR FIELD RETROFIT SUPPLY AIR VFD - NO UNIT CONTROLLER**

| VFD Parameters | Factory Settings    | Field Value | Description  |
|----------------|---------------------|-------------|--|
| Pr. 4          | 60 (same as Pr. 25) |             | Sets supply air fan speed for heating.                 |
| Pr. 5          | 40                  |             | Sets supply air fan speed for cooling stage 1.         |
| Pr. 6          | 30                  |             | Sets supply air fan speed for ventilation or occupied. |
| Pr. 24         | 60                  |             | Sets supply air fan speed for cooling stage 2.         |
| Pr. 25         | 60 (same as Pr. 4)  |             | Sets supply air fan speed for heating.                 |

**PARAMETER SETTINGS FOR FIELD RETROFIT SUPPLY AIR VFD - NO UNIT CONTROLLER**

| VFD Parameters | Factory Settings    | Field Value | Description  |
|----------------|---------------------|-------------|--|
| Pr. 4          | 60 (same as Pr. 25) |             | Sets supply air fan speed for heating.                 |
| Pr. 5          | 40                  |             | Sets supply air fan speed for cooling stage 1.         |
| Pr. 6          | 30                  |             | Sets supply air fan speed for ventilation or occupied. |
| Pr. 24         | 60                  |             | Sets supply air fan speed for cooling stage 2.         |
| Pr. 25         | 60 (same as Pr. 4)  |             | Sets supply air fan speed for heating.                 |

**PARAMETER SETTINGS FOR FIELD RETROFIT SUPPLY AIR VFD - NO UNIT CONTROLLER**

| VFD Parameters | Factory Settings    | Field Value | Description  |
|----------------|---------------------|-------------|--|
| Pr. 4          | 60 (same as Pr. 25) |             | Sets supply air fan speed for heating.                 |
| Pr. 5          | 40                  |             | Sets supply air fan speed for cooling stage 1.         |
| Pr. 6          | 30                  |             | Sets supply air fan speed for ventilation or occupied. |
| Pr. 24         | 60                  |             | Sets supply air fan speed for cooling stage 2.         |
| Pr. 25         | 60 (same as Pr. 4)  |             | Sets supply air fan speed for heating.                 |
