Field Repair of 1/2" Compressor Discharge Elbows

In order to use one part on all units with 1/2" compressor discharge elbows, Lennox Commercial began using the **68J30 Long Radius Street Elbow** in production in June of 2015. Should you need to replace one of these elbows in the field, Lennox suggests using the new part number.

If the 68J30 is not readily available, the dimensions are shown below:
