INSTALLATION INSTRUCTIONS FOR INTAKE EXTENSION KITS USED ON LG/KG/TG/SG/ZG PACKAGED GAS UNITS

Shipping and Packing List

Package 1 of 1 contains:

1- Intake extension
1- Extension back (89L97, 89L98, & 20X99)
1- Patch plate (89L98 kits only)

Bag assembly containing:
16- #10 Screws (8 in 19W51)
10- #8 Screws (none in 19W51)

**WARNING**

Improper installation, adjustment, alteration, service or maintenance can cause property damage, personal injury or loss of life. Installation and service must be performed by a licensed professional HVAC installer or equivalent, service agency, or the gas supplier.

**CAUTION**

As with any mechanical equipment, contact with sharp sheet metal edges can result in personal injury. Take care while handling this equipment and wear gloves and protective clothing.

Check packaging for shipping damage. Contact the last carrier immediately if any shipping damage is found.

Application

The intake extension kit is used on gas packaged units to extend the combustion air intake above the unit.

Installation LGA/LGC 036-072 Units

1- Remove and discard the hood over combustion air intake opening on -1 units.
2- 036-075-1 Units Only-

Install patch plate over right side of combustion air intake as shown in figure 1. Secure in place with all three screws. Discard patch plate when installing extension on -2 units.

![Figure 1](image1)

![Figure 2](image2)
3- Install intake extension over combustion air intake louvers. See figure 1 for -1 units and figure 2 for -2 units. Align top of intake extension flange just under unit top flange. See figure 3. Secure in place with screws provided.

![FIGURE 3](image)

**FIGURE 3**

**Installation LGM/LGH/KG 024-150, TG 024-072 Units**

1- Remove internal rain hood as shown in figure 4.
2- Install extension on unit. Position bottom of extension 7” (178mm) above bottom of heat section access panel. See figure 5.
