1 – Handy box
1 – L bracket
1 – Bag assembly containing:
   4-1#10-32 x 1/2 TFS screws

**WARNING**
Improper installation, adjustment, alteration, service or maintenance can cause property damage, personal injury or loss of life. Installation and service must be performed by a licensed professional HVAC installer or equivalent, service agency, or the gas supplier.

**CAUTION**
As with any mechanical equipment, contact with sharp sheet metal edges can result in personal injury. Take care while handling this equipment and wear gloves and protective clothing.

**WARNING**
Electric Shock Hazard! – Disconnect all power supplies before servicing. Replace all parts and panels before operating. Failure to do so can result in death or electrical shock.

**APPLICATION**
The GFI Kit is used on LGM/LCM/LGH/LCH036−074, LG/LC 248−360, KG/KC/KH 024−300S, ELS 072-240 and ELP 090-120 units.

**INSTALLATION**
1 - Disconnect all power to the unit.
2 - Open or remove compressor access panel. For ELS and ELP units, remove the control box cover.
3 - B and C Box Units – NO Wiring Make−Up Box –
Use L−bracket as a guide to mark and drill holes on mullion as shown in figures 1 and 2. Install L−bracket on inside of mullion. Secure bracket from outside of unit.
4 - ELS072-240 and ELP090-120 units only:
Remove the control box cover mullion. Place the handy box on the power entry panel as shown in figure 6. Drill holes and secure the handy box using #10 screws provided.
5 - All other units: Install handy box in the following locations: (See figure 3.)
   • Figure 1 B Box units
   • Figure 2 KG C Box units NO wiring make−up box
   • Figure 4 A Box units
   • Figure 5 C and D Box units with wiring make−up box

**NOTE** – Use #10 screws to secure handy box to unit. Make sure screws do not damage wiring.
