

Use scissors to cut along this horizontal line

Conduit location for  
80AF1UH, ML180UH, EL280UH and  
SL280UH with B size cabinet models:  
80AF1UH090P12B/16B  
ML180UH090P36B/48B  
EL280UH090P36B/48B  
SL280UH090V36B/48B

Conduit location for 80AF1UH  
and ML180UH models:  
-045, -070, -110, -135

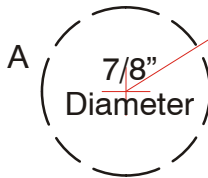

Use scissors to remove area inside  
dashed u-shape.

Place edge of semicircle against front  
of flue adapter.

Front of template should be parallel  
with front of furnace top cap.

Drill 7/8" diameter hole in appropriate  
location.

Conduit locations for  
EL280UH and SL280UH models:  
-070, 090V60C, -110, -135

Edge should be parallel with front of furnace top cap.

*IMPORTANT – The conduit hole must be positioned  
carefully to avoid contact between the blocked vent  
switch wiring and the combustion air inducer or hot*
