INSTALLATION INSTRUCTIONS FOR DIRTY FILTER SWITCH KIT
(603364-33; 12P68) USED ON SG/SC UNITS

Shipping and Packing List
Package 1 of 1 contains:
1- Filter switch (S27)
1- Plastic tubing
2- Screws

Application
Filter switch kit is used on SG 036-240 (3 to 20 ton) packaged units.
The normally open filter switch will close with an increase in static pressure.
The Unit Controller will display and store an error code and energize a service output. See Unit Controller manual provided with unit.

WARNING
Improper installation, adjustment, alteration, service or maintenance can cause property damage, personal injury or loss of life. Installation and service must be performed by a licensed professional HVAC installer or equivalent, service agency, or the gas supplier

CAUTION
As with any mechanical equipment, contact with sharp sheet metal edges can result in personal injury. Take care while handling this equipment and wear gloves and protective clothing.

Installation
1- Disconnect all electrical power to unit. Open filter access door.
2- Install filter switch in location shown in figure 2 for 036-120 units and figure 3 for 240 units.
3- Connect one end of plastic tubing to the filter switch port. See figure 1. On 120 and 240 units, cut the 55" tubing (provided) to 42".
4- Route the other end of plastic tubing as shown in appropriate figure.
6- M3 Unit Controller Setup: Go to SETUP / INSTALL to enable the Dirty Filter Switch (S27). Navigate through the setup questions until Configuration ID 2 appears. Set position two to C if the dirty filter switch is installed on units equipped with an M3 Unit Controller. Set position two to D if the dirty filter switch is installed on units equipped with a DDC controller.
