Installation

The MODBUS cables were designed for use with the LCM/LGM 156-300U roof top units.

1. Disconnect all power to the roof top unit.
2. Open compressor access panel.
3. (LG models only) Remove ignition controller enclosure cover.
4. Remove old set of MODBUS cables from unit. Install and route new set of cables in the unit (see “Figure 1. LG Models” on page 2 and “Figure 2. LC Models” on page 3).
5. Replace damage wire ties (field-provided).
6. Install ignition controller enclosure cover.

CAUTION

Electrostatic discharge can affect electronic components. Take precautions during unit installation and service to protect the unit’s electronic controls. Precautions will help to avoid control exposure to electrostatic discharge by putting the unit, the control and the technician at the same electrostatic potential. Neutralize electrostatic charge by touching hand and all tools on an unpainted unit surface before performing any service procedure.

IMPORTANT

Improper installation, adjustment, alteration, service or maintenance can cause personal injury, loss of life, or damage to property.
Installation and service must be performed by a licensed professional installer (or equivalent) or a service agency.

WARNING

ELECTRICAL SHOCK HAZARD
STOP! Before you continue, make sure that power to the VFD has been off for at least 10 minutes. The capacitor in the VFD holds high voltage power for up to 10 minutes after power has been disconnected.

WARNING

ELECTRICAL SHOCK HAZARD
Can cause injury or death. Unit must be grounded in accordance with national and local codes.
Line voltage is present at all components when unit is not in operation on units with single-pole contactors. Disconnect all remote electrical power supplies before opening access panel. Unit may have multiple power supplies.
NOTE1: GAS IGNITION CONTROLLER ENCLOSURE COVER NOT SHOWN FOR CLARITY PURPOSES

NOTE2: AFTER REPLACING MOD BUS CABLES, INSTALL IGNITION CONTROLLER ENCLOSURE COVER BACK TOGETHER

IMPORTANT: ROUTE MOD BUS CABLE 106647-01 ACCORDINGLY, REPLACE BROKEN/DAMAGED WIRE TIES TO MAKE SURE CABLE IS PROPERLY SECURED AND ROUTED.
