

088 and 100 MODELS
“LCA” PACKAGED COOLING & ELECTRIC HEAT
“LGA” PACKAGED COOLING & GAS HEAT
“LHA” PACKAGED HEAT PUMP

LCA/LGA/LHA

LCA/LGA - 7.5 & 8.5 Ton
 (26.4 & 29.9 kW)
 LHA - 7.5 Ton
 (26.4 kW)

*Net Cooling Capacity - 76 000 to 84 000 Btuh (22.3 to 24.6 kW) (19 200 to 21 200 kcal)
 Gas Input Heating Capacity - 73 000 to 160 000 Btuh (21.4 to 46.8 kW) (18 400 to 40 300 kcal)
 *Heat Pump Heating Capacity - 77 000 Btuh (22.6 kW) (19 400 kcal)
 Optional Electric Heat - 5 to 35 kW (4300 to 30 100 kcal)

Bulletin #490079
 October 1998

FEATURES - ALL MODELS			
Item	LCA/LGA088	LCA/LGA100	LHA088
Air Flow Choice — Bottom (down-flow) or *horizontal (side) supply and return air	Standard	Standard	Standard
Bottom Power Entry — For electrical and gas lines	Standard	Standard	Standard
Cabinet — Heavy gauge galvanized steel, fully insulated, powdered enamel paint finish, large removeable access panels, electrical inlets in cabinet base and electric heat end panel (LCA/LHA only), easy access control area with factory installed controls, low voltage terminal strip, unit lifting holes in base rail	Standard	Standard	Standard
Cabinet Access Panels (Hinged) — 1 compressor/controls access panel, 1 heating area access panel, 1 blower access panel and 1 air filter/economizer access panel hinged with tool-less access handles, gaskets on all edges for tight seal, blower access panel has steel panel inner liner with insulation sandwiched in-between and air filter/economizer access panel is insulated with fiberglass insulation.	Standard	Standard	Standard
Coil Construction — Copper tube construction, ripple-edged enhanced aluminum fins, flared shoulder tubing connections, silver soldered construction, factory tested, evaporator coil face split with separate circuits, indoor coil drain connection extends outside of unit cabinet	Standard	Standard	Standard
Compressor Crankcase Heater(s) - Two on LCA/LGA models and one on LHA models	Standard	Standard	Standard
Filters — Disposable 2 inch (51 mm) pleated commercial grade	Standard	Standard	Standard
Filter Access — Hinged filter door with tool-less access handles	Standard	Standard	Standard
Integrated Modular Control (IMC) — Solid-state board contains all controls and control relays to operate unit Built-in Functions Include: <ul style="list-style-type: none"> - Blower On/Off Delay - Built-in Control Parameter Defaults, ensure proper unit operation when power is restored after power failure - Service Relay Output - Defrost Control - Dirty Filter Switch Input - Economizer Control, four modes of operation (outdoor enthalpy, differential enthalpy, temperature and global) - Electric Heat Staging, regulates electric heat during building warm-up - ETM Compatible, various modules (see factory or field installed accessories) - Extensive Unit Diagnostics, (80 diagnostic codes) - Permanent Diagnostic Code Storage - Field Changeable Control Parameters, (65 different parameters) - Gas Valve Delay Between First and Second Stage - Indoor Air Quality Input, monitors CO₂ levels, adjusts economizer dampers as needed (four modes of operation), requires optional field installed Indoor Air Quality (CO₂) Sensor - Low Ambient Controls — Allows unit cooling operation down to 0°F (-17.8°C) - Minimum Run Time - Night Setback Mode, adjusts setpoint, closes outdoor air dampers and operates blower on demand, may be customized for special requirements - Smoke Alarm Mode, (four modes of operation) - “Strike Three” Low Pressure Control, protects system from low suction pressure while eliminating nuisance faults - Thermostat Bounce Delay - Three Digit Display, (Displays: outdoor temperature, supply air temperature, return air temperature, economizer damper position, Indoor Air Quality, control parameters) - Two Stage Thermostat Compatible - Warm-up Mode, (four modes of operation) 	Standard	Standard	Standard
ISO 9002 Quality Standard - Developed in accordance with International Standards Organization (ISO) quality standards	Standard	Standard	Standard
Outdoor Coil Fan — PVC coated fan guard furnished	Standard	Standard	Standard
Outdoor Coil Fan Motor — Overload protected, permanently lubricated, equipped with ball bearings, shaft up, wire basket mount	Standard	Standard	Standard
Ratings — Rated test conditions are those included in Air Conditioning and Refrigeration Institute (ARI) Standard 210/240-95 while operating at rated voltage and air volumes. Sound rating number rated at test conditions included in Air Conditioning and Refrigeration Institute (ARI) Standard 270-96.	Standard	Standard	Standard
Supply Air Blower — Belt drive, forward curved blades, blower wheel statically and dynamically balanced, ball bearings, adjustable pulley (allows speed change), blower assembly slides out of unit for servicing	Standard	Standard	Standard
Supply Air Motor (Standard Efficiency) — Overload protected, equipped with ball bearings	Standard	Standard	Standard
Transformer — 70VA transformer with built-in circuit breaker	Standard	Standard	Standard

*Requires Optional Horizontal Conversion Kit.

FEATURES - LCA MODELS		
Item	LCA088	LCA100
Compressors — Reciprocating type, resiliently mounted on rubber grommets	“S” Models	Not Available
Compressors — Copeland® Compliant Scroll™ for high efficiency, resiliently mounted on rubber grommets	“H” Models	“S” Models
Outdoor Coil Construction — Formed type	Standard	Standard
Refrigeration System — Consists of: compressors, condenser coils and direct drive fans, evaporator coil and belt drive blowers, expansion valves, high capacity driers, high pressure switches, low pressure switches, full refrigerant charge, crankcase heaters, freezestats (prevent coil freeze-up during low ambient operation or loss of air), low ambient switches, independent refrigerant circuits (allows staging)	Standard	Standard
FEATURES - LGA MODELS		
Item	LGA088	LGA100
Compressors — Reciprocating type, resiliently mounted on rubber grommets	“S” Models	Not Available
Compressors — Copeland® Compliant Scroll™ for high efficiency, resiliently mounted on rubber grommets	“H” Models	“S” Models
Fan and Limit Controls — Factory installed, 90 second fan “on” time delay, dual limit controls (primary and secondary) with fixed temperature setting	Standard	Standard
Heat Exchanger — Tubular construction, aluminized steel, life cycle tested	Standard	Standard
Outdoor Coil Construction — Formed type	Standard	Standard
Heating System — Aluminized steel inshot burners, direct spark ignition, electronic flame sensor, redundant automatic dual gas valve with manual shut-off, induced draft blower, flame rollout switch	Standard	Standard
Refrigeration System — Consists of: compressors, condenser coil and direct drive fans, evaporator coil and belt drive blowers, expansion valves, high capacity driers, high pressure switches, low pressure switches, full refrigerant charge, crankcase heaters, freezestats (prevent coil freeze-up during low ambient operation or loss of air) independent refrigerant circuits (allows staging)	Standard	Standard
FEATURES - LHA MODELS		
Item	LHA088S	
Compressors — Copeland® Compliant Scroll™ for high efficiency, resiliently mounted on rubber grommets	Standard	
Defrost Control — Furnished on Integrated Modular Control, defrost control provides a defrost cycle, if needed, every 30 or 60 or 90 minutes (adjustable) of compressor “on” time at outdoor coil temperature below 32°F (0°C). Pressure switch mounted on outdoor coil vapor line terminates defrost cycle.	Standard	
Outdoor Coil Construction — Formed type	Standard	
Refrigeration System — Consists of: compressor, outdoor coil and direct drive fan, indoor coil and belt drive blower, check and expansion valves (indoor and outdoor), high capacity drier, high pressure switch, low pressure switch, reversing valve, defrost control, full refrigerant charge, crankcase heater, freezestat (prevent coil freeze-up during low ambient operation or loss of air), and accumulator.	Standard	
REQUIRED OPTIONS - ITEMS MUST BE ORDERED AND FACTORY INSTALLED		
Air Flow Configuration — specify horizontal or down-flow when ordering base unit		
Supply Air Motor - Standard efficiency, overload protected, equipped with ball bearings (See Blower Data Table for specifications)		
Drive Kit — Order one, see Drive Kit Specifications Table		
Dual Gas Input (LGA Models Only) — Order one:		
73 000 or 110 000 Btuh (21.4 or 32.2 kW) (18 400 or 27 700 kcal) Standard Heat Gas Input		
106 000 or 160 000 Btuh (31.0 or 46.8 kW) (26 700 or 40 300 kcal) High Heat Gas Input		

OPTIONAL ACCESSORIES			
FACTORY INSTALLED ONLY			
Item	LCA/LGA088	LCA/LGA100	LHA088
Condensate Traps — PVC or copper condensate trap factory installed in unit	Factory		
Corrosion Protection — Phenolic epoxy coating, applied to condenser coils (with painted base section) and evaporator coils (with painted evaporator base section and painted blower housings), factory applied to either section or both sections	Factory		
Stainless Steel Heat Exchanger (LGA Models)	Factory	N/A	
Service Valves — Fully serviceable brass valves installed in discharge and liquid lines	Factory	NA	
FACTORY OR FIELD INSTALLED			
Item	LCA/LGA088	LCA/LGA100	LHA088
Electric Heat — Factory or field installed, helix wound nichrome elements, time delay for element staging, individual element limit controls, wiring harness, may be two-stage controlled, requires Fuse Block and Terminal Block (LHA/LCA Models)	See Electric Heat Data Tables Page 13		
Electric Heat Fuse Block — Required with Electric Heat. Mounting screws furnished (LCA/LHA Models)	See Optional Electric Heat Accessories Table (LCA/LHA Models), Page 10		
Electric Heat LTB2 Terminal Block — Required with electric heat			
Control Systems — See pages 6-7 for complete listing	See pages 6-7		
Economizer — Opposing gear driven recirculated air and outdoor air dampers, plug-in connections to unit, nylon bearings, neoprene seals, 24 volt fully modulating spring return motor, adjustable minimum damper position, damper assembly slides in unit, outdoor air hood must be ordered separately (see below), optional down-flow gravity exhaust dampers available (see below), choice of economizer controls (see below) - Net Weight	LAREMD08/10 - 43 lbs. (20 kg)		
Economizer Control Choice — Sensible Control — Furnished on IMC board in unit, uses outdoor air sensor furnished with unit to measure outdoor air temperature and control damper position (Furnished) Global Control — Furnished on IMC board in unit, used with Direct Digital Control (DDC) systems, uses global air sensor to control damper position, determines when to use outdoor air for cooling or set damper at minimum position (Furnished) Outdoor Enthalpy Control — Adjustable enthalpy sensor, senses outdoor air enthalpy for economizer control, 0 to 100% outdoor air Differential Enthalpy Control — Two solid-state enthalpy sensors allow selection between outdoor air and return air (whichever has lowest enthalpy)	(16K96) Outdoor (16K97) Differential		
Down-Flow Gravity Exhaust Dampers — Aluminum blade dampers prevent blow back and outdoor air infiltration during off cycle, bird screen furnished - Net Weight	LAGED08/10 - 8 lbs. (4 kg)		
Hood for Down-Flow Gravity Exhaust Dampers	24L15		
Outdoor Air Damper Section — Linked mechanical dampers, 0 to 25% (fixed) outdoor air adjustable, installs in unit for down-flow applications, outdoor air hood must be ordered separately (see below) - Net Weight	Automatic — fully modulating spring return damper motor with plug in connection	LAOADM08/10 - 28 lbs. (13 kg)	
	Manual	LAOAD10/15 - 26 lbs. (12 kg)	
Outdoor Air Hood — Required with LAREMD08/10 Economizer, LAOAD10/15 and LAOADM08/10 Outdoor Air Damper Sections, two cleanable aluminum mesh fresh air filters furnished - Net Weight	LAOAH08/10 - 11 lbs. (5 kg)		
Power Exhaust Fan — Installs in unit for down-flow applications only with economizer option, provides exhaust air pressure relief, interlocked to run when return air dampers are closed and supply air blower is operating, fan runs when outdoor air dampers are 50% open (adjustable), motor is overload protected, requires optional down-flow gravity exhaust dampers (see above)	Model Number - Net Weight	LAPEF08/10 - 28 lbs. (13 kg)	
	Diameter - in. (mm) Number of Blades	20 (508) - 5	
	Total air volume - cfm (m ³ /s)	3500 (1.65) @ 0 in. .wg. (0 Pa)	
	Motor Horsepower (W)	1/3 (249)	
	Total Watts Input	230	
Smoke Detector — Photoelectric type, installed in supply air section or return air section or both sections	70K87 - Supply 70K86 - Return		

OPTIONAL ACCESSORIES - CONTINUED

FIELD INSTALLED ONLY

Item		LCA/LGA088	LCA/LGA100	LHA088
LPG/Propane Kits (LGA Models Only)		19K52		----
Diffusers Aluminum grilles, large center grille, insulated diffuser box with flanges, hanging rings furnished, interior transition (even air flow), internally sealed (prevents recirculation), adapts to T-bar ceiling grids or plaster ceilings - Net Weight	Step-Down - double deflection louvers	RTD11-95 - 88 lbs. (40 kg)		
	Flush - fixed blade louvers	FD11-95 - 75 lbs. (34 kg)		
Transitions (Supply and Return) — Used with diffusers, installs in roof mounting frame, galvanized steel construction, flanges furnished for duct connection, fully insulated - Net Weight		LASRT08/10 - 30 lbs. (14 kg)		
Horizontal Conversion Kit — Two piece duct cover in kit blocks off unit down-flow supply air opening, horizontal return air opening panel (on unit) is moved to block off down-flow return air opening for horizontal applications.		17L25		
¹ Horizontal Gravity Exhaust Dampers — Aluminum blade dampers prevent blow back and outdoor air infiltration during off cycle, field installed in return air duct, bird screen and hood furnished - Net Weight		LAGEDH10/15 - 8 lbs. (4 kg)		
Indoor Air Quality (CO₂) Sensor — Monitors CO ₂ levels, reports to Integrated Modular Control (IMC) board which adjusts economizer dampers as needed		93J69		
Aspiration box — for duct mounting of Indoor Air Quality Sensor		47N18		
Roof Mounting Frame — Nailer strip furnished, mates to unit, U.S. National Roofing Contractors Approved, shipped knocked down - Net Weight	14 inch (356 mm) height	LARMF08/10-14 - 118 lbs. (54 kg)		
	24 inch (610 mm) height	LARMF08/10-24 - 162 lbs. (74 kg)		
Hail Guards — Constructed of heavy gauge steel, painted to match cabinet, helps protect outdoor coils from hail damage. Not used with Coil Guards		24L54		
Coil Guards — Galvanized steel wire guards to protect outdoor coil. Not used with Hail Guards.		24L55		
IMC Software and PC Interface Kit		86K84		
IMC Software and Manual Only		32K22		
PC Interface Kit Only		28K56		

¹ Field installs in return air duct. Two dampers furnished per order no.

OPTIONAL DDC TEMPERATURE CONTROL SYSTEMS (FACTORY OR FIELD INSTALLED)

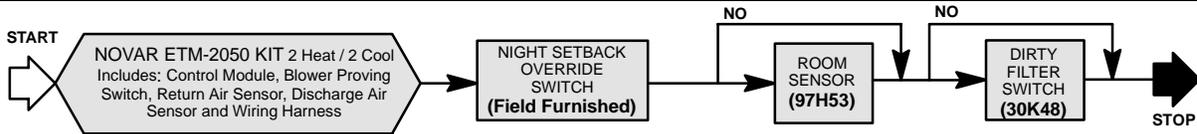

NOVAR ETM-2050 KIT	—
Electronic Thermostat Module (ETM)/Blower Proving Switch/Return Air Sensor/Discharge Air Sensor/Wiring Harness — Module monitors unit operation from different sensors installed in unit, has outputs for 2 stage heat/2 stage cool, automatic or continuous blower operation, economizer damper operation and night setback, features: day/occupied mode with low enthalpy (outdoor air damper open), high enthalpy (outdoor air damper closed) or night/unoccupied mode (outdoor air damper closed), network communication (RS-485, shielded pair twisted wire), local override (1 to 255 minutes), watchdog function, fail-safe operation, ETM allows units to be “daisy chained” together (up to 31 units) to be operated from one central location with an “executive” type control processor (onsite or offsite), built-in time delays, built-in unit operating defaults, diagnostic LED’s indicate various operating functions, surge suppression protects ETM against lightning or voltage spikes, Blower Proving Switch monitors blower operation and locks out unit in case of blower failure, Return Air Sensor provides input to ETM module to determine heating or cooling operation and number of stages required, Discharge Air Sensor monitors leaving air temperature during unit operation	48K87
Dirty Filter Switch — Senses static pressure increase indicating a dirty filter condition	30K48
Room Temperature Sensor — Provides input to ETM module to determine heating or cooling operation and number of stages required (ordered separately)	97H53
Night Setback Override Switch — Allows momentary override of night setback during unoccupied mode	Field Furnished

OPTIONAL CONVENTIONAL TEMPERATURE CONTROL SYSTEMS (FIELD INSTALLED)

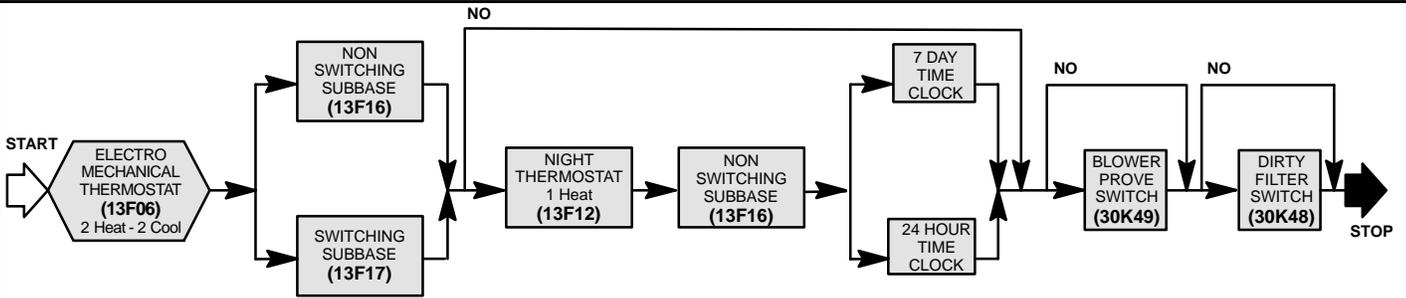

System and Component Description	Catalog No.
ELECTRO-MECHANICAL THERMOSTAT	—
Thermostat — Two stage heat & two stage cool with dual temperature levers, subbase choice	13F06
Subbase — Manual system switch (Off-Heat-Auto-Cool), fan switch (Auto-On)	13F17
Subbase — Non-switching	13F16
Night Setback Operation — Order components below	—
Heating Thermostat — Single stage heat	13F12
Subbase — Non-switching	13F16
Time Clock — 7 day operation, indicates day and night periods, 2 hour increments, battery back-up	See Price Book for Selection
Time Clock — 24 hour night setback operation, 15 minute increments, battery back-up	See Price Book for Selection
Blower Proving Switch — Monitors blower operation, locks out unit in case of blower failure	30K49
Dirty Filter Switch — Senses static pressure increase indicating a dirty filter condition	30K48
HONEYWELL T7300 THERMOSTAT	—
Thermostat — Programmable, internal or optional remote temperature sensing (sensor required), touch sensitive keyboard, automatic switching, °F or °C readout, no anticipator, droop/no droop selection, indicator LED’s, hour/day programming, override capabilities, time and operational mode readout, stage status indicators, battery back-up, subbase choice	81G59
Subbase — Selectable staging up to two stage heat & two stage cool, manual system switch (Heat-Off-Auto-Cool), fan switch (Auto-On), indicator LED’s, auxiliary relay output for economizer operation	81G60
Sensor — Room temperature	58C92
Sensor — Room temperature with 3 hour override and setpoint adjustment	86G67
Sensor — Return air temperature	27C40
Blower Proving Switch — Monitors blower operation, locks out unit in case of blower failure	30K49
Dirty Filter Switch — Senses static pressure increase indicating a dirty filter condition	30K48

COMMERCIAL TEMPERATURE CONTROL SELECTION FLOWCHARTS

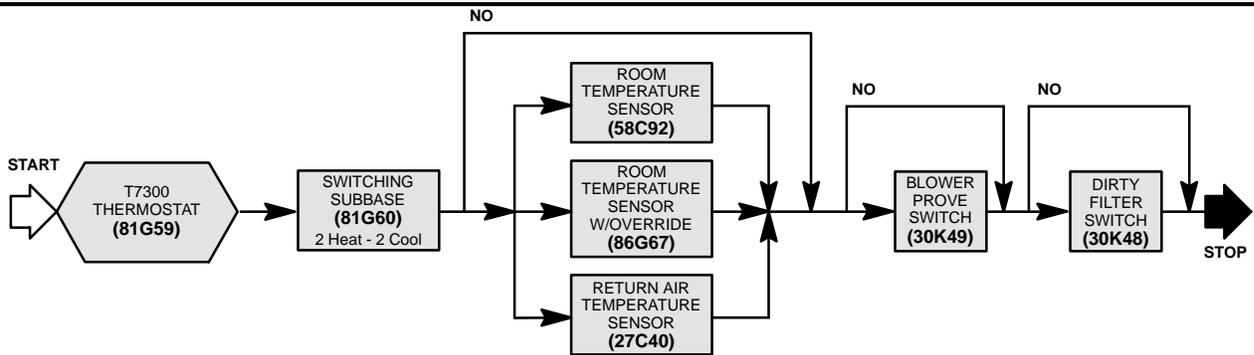

NOVAR ETM-2050

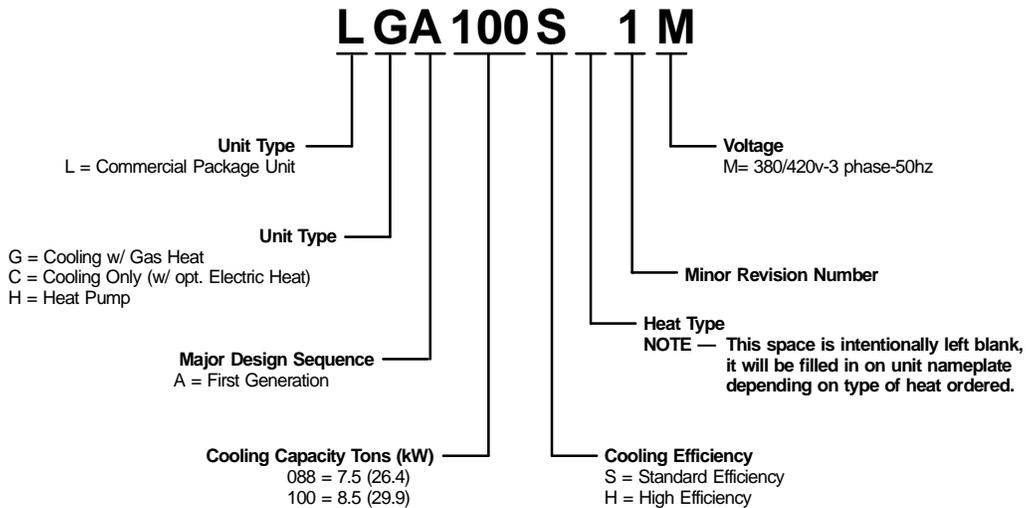

ELECTRO-MECHANICAL THERMOSTAT

HONEYWELL T7300 THERMOSTAT

MODEL NUMBER IDENTIFICATION

HIGH ALTITUDE DERATE (LGA MODELS)

Units may be installed at altitudes up to 2000 feet (610 m) above sea level without any modification. At altitudes above 2000 feet (610 m), units must be derated to match gas manifold pressures shown in table below.

NOTE — This is the only permissible derate for these units.

Altitude - ft. (m)	Gas Manifold Pressure - in. w.g. (kPa)
2001 - 3000 (610 - 915)	3.6 (0.90)
3001 - 4000 (915 - 1220)	3.5 (0.87)
4001 - 5000 (1220 - 1525)	3.4 (0.85)
5001 - 6000 (1525 - 1830)	3.3 (0.82)
6001 - 7000 (1830 - 2135)	3.2 (0.80)
7001 - 8000 (2135 - 2440)	3.1 (0.77)

	Number and size — in. (mm)		(4) 18 x 20 x 2 (457 x 508 x 51)			
Electrical characteristics		380/420v-50hz-3 phase with neutral				

☐ Rated test conditions are those included in Air Conditioning and Refrigeration Institute (ARI) Standard 360-86 while operating at rated voltage and air volumes. **Cooling Ratings:** 95°F (35°C) outdoor air temperature and 80°F (27°C) db/67°F (19°C) wb entering evaporator air; minimum external duct static pressure.

☑ Integrated Part Load Value rated at 80°F (27°C) outdoor air temperature.

☑ Sound rating number rated at test conditions included in Air Conditioning and Refrigeration Institute (ARI) Standard 270-96.

NOTE — Net capacity includes evaporator blower motor heat deduction. Gross capacity does not include evaporator blower motor heat deduction.

Filters (furnished)	Type of filter		Disposable Commercial Grade Pleated
	Number and size — in. (mm)		(4) 18 x 20 x 2 (457 x 508 x 51)
Electrical characteristics		380/420v-50hz-3 phase with neutral	

☐ Rated test conditions are those included in Air Conditioning and Refrigeration Institute (ARI) Standard 340-86 while operating at rated voltage and air volumes. **Cooling Ratings**— 95°F (35°C) outdoor air temperature and 80°F (27°C) db/67°F (19°C) wb entering indoor coil air.

High Temperature Heating Ratings— 47°F (8°C) db/43°F (6°C) wb outdoor air temperature and 70°F (21°C) entering indoor coil air.

Low Temperature Heating Ratings— 17°F (-8°C) db/15°F (-9°C) wb outdoor air temperature and 70°F (21°C) entering indoor coil air.

☑ Sound rating number rated at test conditions included in Air Conditioning and Refrigeration Institute (ARI) Standard 270-96.

NOTE — Net capacity includes evaporator blower motor heat deduction. Gross capacity does not include evaporator blower motor heat deduction.

WEIGHT DATA - ALL MODELS

Model Number	Description	Weight	
		lbs.	kg
Net Weights			
LCA088S	Net weight (Base unit)	1065	483
LCA088H	Net weight (Base unit)	1065	483
LCA100S	Net weight (Base unit)	1105	502
LGA088S	Net weight (Base unit with low fire heat exchanger)	1125	510
LGA100S	Net weight (Base unit with low fire heat exchanger)	1165	528
LGA088H	Net weight (Base unit with low fire heat exchanger)	1125	510
LHA088S	Net weight (Base unit)	980	445
Shipping Weights (Add Factory Installed Options Weights To Base Unit Weights For Total Shipping Weight)			
LCA088S	Base unit	1140	501
LCA088H	Base unit	1140	501
LCA100S	Base unit	1180	535
LHA088S	Base unit	1055	478
LCA/LHA Models Only	Electric Heat (add to Base unit)	See Electric Heat Rating Tables	
LGA088S	Base unit with low fire heat exchanger	1200	544
LGA088H	Base unit with low fire heat exchanger	1200	544
LGA100S	Base unit with low fire heat exchanger	1240	562
LGA Models Only	High Fire Heat Exchanger (add to Base unit)	30	14
All Models	Economizer (add to Base unit)	66	30
	Outdoor Air Damper (add to Base unit)	40	18
	Power Exhaust (add to Base unit)	28	13
	LTL Packaging (less than truck load) (add to Base unit)	95	43

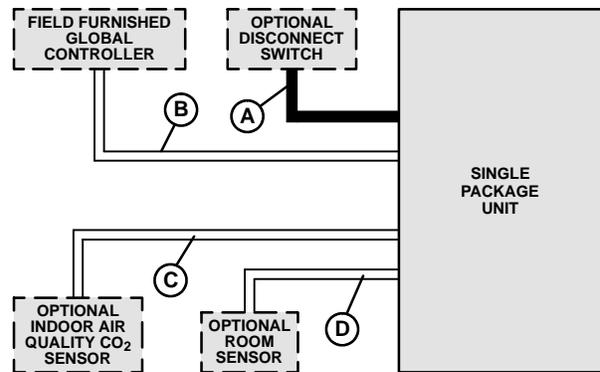

FIELD WIRING

NOVAR ETM-2050 CONTROL SYSTEM

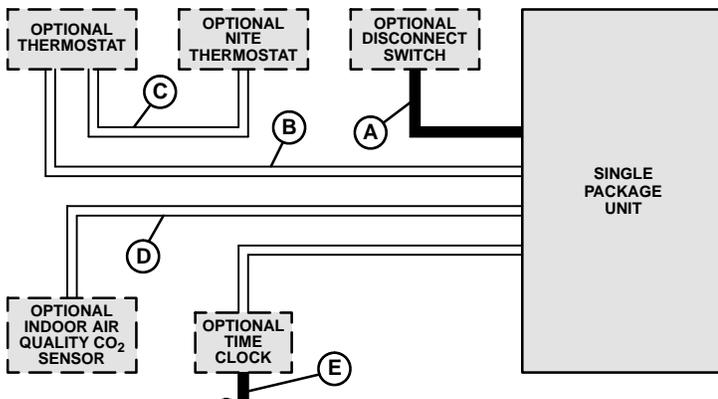

- A — Three wire power (See Electrical Data Table)
- B — RS-485 shielded pair twisted wire
- C — Four wire low voltage
- D — Two wire low voltage

— Field wiring not furnished —

NOTE — All wiring must conform to local electrical codes.

ELECTRO-MECHANICAL, ELECTRONIC OR HONEYWELL T7300 THERMOSTAT CONTROL SYSTEM

- A — Three wire power (See Electrical Data Table)
- B — Six wire low voltage (Electro-Mechanical)
Seven wire low voltage (Electronic)
Nine wire low voltage (Honeywell T7300)
Ten wire low voltage (Honeywell T7300 with Service LED)
- C — Two wire low voltage (Electro-Mechanical Only)
- D — Four wire low voltage (All Systems)
- E — Two wire power

— Field wiring not furnished —

NOTE — All wiring must conform to local electrical codes.

ELECTRICAL DATA - LCA/LGA088						
Model Number			LCA/LGA088			
Line voltage data — 50 Hz — 3 phase with neutral			380/420v			
Efficiency type			Standard (S)		High (H)	
Compressors (2)	Rated load amps each (total)		7.1 (14.2)		6.4 (12.8)	
	Locked rotor amps each (total)		46 (92.0)		44.0 (88.0)	
Outdoor Fan Motor	Full load amps		1.5		1.5	
	Locked rotor amps		3.0		3.0	
Indoor Blower Motor	Motor Output	hp	2	3	2	3
		kW	1.5	2.2	1.5	2.2
	Full load amps		3.0	4.7	3.0	4.7
	Locked rotor amps		22.1	27.0	22.1	27.0
Optional Power Exhaust Fan	(Number) Horsepower (W)		(1) 1/3 (249)			
	Full load amps		1.3		1.3	
	Locked rotor amps		2.4		2.4	

Refer to local electrical codes to determine wire, fuse and disconnect size requirements. Use wires suitable for at least 167°F (75°).
Service Factor = 1.15

ELECTRICAL DATA - LCA/LGA100S & LHA088S						
Model Number			LCA/LGA100S		LHA088S	
Line voltage data — 50 Hz — 3 phase with neutral			380/420v		380/420v	
Efficiency Type			Standard (S)			
Compressors (2 - LCA/LGA) (1 - LHA)	Rated load amps each (total)		6.7 (13.4)		14.7 total	
	Locked rotor amps each (total)		47.5 (95.0)		95.0 total	
Outdoor Fan Motor	Full load amps		1.5		1.5	
	Locked rotor amps		3.0		3.0	
Indoor Blower Motor	Motor Output	hp	2	3	2	3
		kW	1.5	2.2	1.5	2.2
	Full load amps		3.0	4.7	3.0	4.7
	Locked rotor amps		22.1	27.0	22.1	27.0
Optional Power Exhaust Fan	(Number) Horsepower (W)		(1) 1/3 (249)			
	Full load amps		1.3		1.3	
	Locked rotor amps		2.4		2.4	

Refer to local electrical codes to determine wire, fuse and disconnect size requirements. Use wires suitable for at least 167°F (75°).
Service Factor = 1.15

OPTIONAL ELECTRIC HEAT ACCESSORIES - LCA/LHA MODELS					
UNIT FUSE BLOCKS WITH ELECTRIC HEAT					
Unit Model Number		LCA088S	LCA088H	LCA100S	LHA088S
Electric Heat	Model Number	EHA (see Electric Heat Data tables for additional information)			
	kW Input Range	7.5 - 15 - 30 - 45			
Unit Fuse Block (3 phase)	Without Power Exhaust Fans	56K52	56K52	56K52	25K09
		25K08	56K52	56K52	25K09
	With Power Exhaust Fans	56K52	56K52	56K52	25K09
		56K52	56K52	56K52	25K09
LTB2 ELECTRIC HEAT TERMINAL BLOCK					
LTB2-175 (30K75) 175 amps (Required For Units <u>Without</u> Disconnect/Circuit Breaker But <u>With</u> Single Point Power Source)					
LTB2 Terminal Block (3 phase)		30K75	30K75	30K75	30K75

NOTE — Terminal Block is factory installed in units with factory installed electric heat without disconnect/circuit breaker but with single point power source.

OPTIONAL ELECTRIC HEAT DATA (REQUIRES UNIT FUSE BLOCK AND TERMINAL BLOCK)

kW Size	Electric Heat Model Number (see footnote) Net Weight	Number of Elements	Volts Input	Total Heating Capacity - 50hz			Total Unit & Electric Heat (With Power Exhaust) Minimum Circuit Ampacity (A)	
				kW	kcal	Btuh	2 hp (1.5 kW)	3 hp (2.2 kW)

		*2	420	34.4	26 600	117 600		

NOTE - (H) indicates high efficiency units. (S) indicates standard efficiency units.

*May be used with two stage control.

NOTE - Fuse block must be ordered extra. Factory installed heaters will have the fuse block factory installed. Fuse block must be installed in unit with field installed heaters. Also requires LTB2 Terminal Block.

COOLING RATINGS - LCA/LGA MODELS

NOTE - For Temperatures and Capacities not shown in tables, see bulletin — Cooling Unit Rating Table Correction Factor Data in Miscellaneous Engineering Data section.

BLOWER DATA - BASE UNIT

BLOWER TABLE INCLUDES RESISTANCE FOR LCA088 BASE UNIT ONLY WITH DRY INDOOR COIL AND AIR FILTERS IN PLACE.

FOR ALL UNITS ADD:

- 1 - Wet indoor coil air resistance of selected unit.
- 2 - Any factory installed options air resistance (heat section, economizer, etc.)
- 3 - Any field installed accessories air resistance (duct resistance, diffuser, etc.)

Then determine from blower table blower motor output and drive required.

See Page 16 for wet coil and option/accessory air resistance data and blower motors and drives.

MINIMUM AIR VOLUME REQUIRED FOR USE WITH OPTIONAL ELECTRIC HEAT

- LCA/LHA models require 3000 cfm (1.41 m³/s) minimum air with electric heat in horizontal applications
- LCA/LHA models require 2600 cfm (1.23 m³/s) minimum air with electric heat in downflow applications

BOLD ITALICS INDICATE FIELD FURNISHED DRIVE.

	3375	1.60	30 - 37	9 - 11	28 - 34	9 - 10
	3750	1.75	34 - 41	10 - 12	31 - 38	9 - 12

*Throw is the horizontal or vertical distance an airstream travels on leaving the outlet or diffuser before the maximum velocity is reduced to 50 ft. (15 m) per minute. Four sides open.

GUIDE SPECIFICATIONS - ALL MODELS

Prepared for the guidance of architects, consulting engineers and mechanical contractors.

General — Furnish and install a single package air to air DX mechanical cooling system, cooling and gas fired heating system or heat pump system, complete with automatic controls. The single package unit shall be a standard product of a firm regularly engaged in the manufacture of heating-cooling equipment.

The installed weight shall not be more than _____ lbs. (kg). Entire unit shall have a width of not more than _____ inches (mm), a depth of not more than _____ inches (mm) and an overall height of not more than _____ inches (mm). The equipment shall be shipped completely factory assembled, precharged, piped and wired internally ready for field connections. In addition, manufacturer shall test operate system at the factory before shipment.

Air Distribution — Equipment shall be capable of bottom (down-flow) or side (horizontal) handling of conditioned air. Horizontal air shall require optional horizontal conversion kit. All air distribution ducts shall be fiberglass or _____ ga. galvanized steel insulated with _____ inch (mm) thick lb./ft.³ (kg/m³) density fiberglass or equivalent.

Integrated Modular Control (IMC) — Solid state control board shall be provided to operate unit. Built-in functions shall include: blower on/off delay, built-in control parameter defaults, service relay output, defrost control, dirty filter switch input, economizer control, electric heat staging, ETM compatible, unit diagnosis, diagnostics code storage, gas valve delay between stages, indoor air quality input, low ambient controls, minimum run time, night setback mode, smoke alarm mode, low pressure control, thermostat bounce delay, three digit display, two stage thermostat compatible and warm up mode.

Cooling System — The total certified cooling capacity shall not be less than _____ Btuh (kW) with an indoor coil air volume of _____ cfm (m³/s), an entering wet bulb air temperature of _____ °F (°C), an entering dry bulb air temperature of _____ °F (°C) and an outdoor coil entering temperature of _____ °F (°C). The compressor power input shall not exceed _____ kW at these conditions.

The coils shall be non-ferrous construction with aluminum fins mechanically bonded to durable copper tubes. Coils shall be pressure leak tested. Coil face area shall be not less than _____ sq. ft. (m²) (indoor coil) and _____ sq. ft. (m²) (outdoor coil). Outdoor coils shall be slab coil construction.

Compressor(s) shall be resiliently mounted, have overload protection and crankcase heater(s). The refrigeration system shall have discharge suction and liquid line gauge ports, high pressure switch(es), low pressure switch(es), drier(s), freestat, defrost control (LHA), check and expansion valve (LHA), reversing valve (LHA), accumulator (LHA) and full refrigerant charge. Optional service valves shall be available (LCA/LGA only). All models shall have low ambient operation down to 0°F (-17.7°C).

Heating System (LGA Models) — The heating capacity output shall be _____ Btuh (kW) with a gas input of _____ Btuh (kW).

Tubular heat exchanger and inshot type gas burners shall be constructed of aluminumized steel. Controls shall consist of direct spark ignition, electronic flame sensor controls, flame rollout switch, limit controls and automatic redundant dual gas valve with staging control and combustion air proving switch on induced draft blower. Unit shall be available for use with LPG/propane as an option. Heat exchanger shall be removable for servicing. Complete service access shall be provided for controls and wiring.

Heating System (LHA Models) — The total certified heating capacity shall not be less than _____ Btuh (kW) with an indoor coil air volume of _____ cfm (m³/s), an entering dry bulb temperature of _____ °F (°C) and an outdoor coil entering air temperature of _____ °F (°C). The total compressor power input shall not exceed _____ kW at the above conditions.

Cabinet — Shall be galvanized steel with a powdered enamel paint finish electrostatically bonded to the metal. Cabinet panels where conditioned air is handled shall be fully insulated to prevent sweating and minimize sound. Openings shall be provided for power connection entry. Indoor coil condensate drain extended outside cabinet shall be provided. Lifting holes shall be provided for rigging. Bottom power and gas (LGA) entry shall be furnished.

Service Access — Cabinet panels shall be hinged with tool-less access for compressor/heating/controls, blower and air filter/economizer compartments.

Supply Air Blower — Centrifugal supply air blower shall have ball bearings and adjustable belt drive. Blower assembly shall slide out of unit for servicing. Motor mount base shall permit ease of motor changeover and belt tension adjustment. Blower wheel shall be statically and dynamically balanced. Blower shall be capable of delivering _____ cfm (m³/s) at an external static pressure of _____ inches water gauge (Pa) requiring _____ bhp (W) and _____ Rev/Min.

Outdoor Coil Fan — Direct drive propeller type outdoor coil fan shall discharge vertically and be direct driven by a _____ hp (W) motor. Fan motor shall have ball bearings and be permanently lubricated and inherently protected. Fan shall have a safety guard.

Air Filters — Disposable 2 inch (51 mm) thick pleated filters furnished shall have not less than _____ sq. ft. (m²) of free area.

OPTIONAL ACCESSORIES

Additive Electric Heaters (LCA/LHA Models) — The certified total heating capacity output shall be _____ Btuh with _____ kW input at _____ volts power supply.

Electric heaters shall be available for factory or field installation. Heating elements shall be nichrome bare wire exposed directly to the air stream. Time delays shall bring the elements on and off in sequence with a time delay between each element. Limit controls shall provide overload and short circuit protection.

Unit Fuse Block (LCA/LHA Models) — Shall be required for units with single point power supply and electric heat.

Terminal Block (LCA/LHA Models) — Shall be required for units without disconnect switch but with single point power supply and electric heat.

Roof Mounting Frame — Furnish and install a steel roof mounting frame for bottom discharge and return air duct connection. It shall mate to the bottom perimeter of the equipment. When flashed into the roof it shall make a unit mounting curb and provide weatherproof duct connection and entry into the conditioned area. Height of frame shall be _____ inches (mm). Flashing shall be the responsibility of the roofing contractor.

Economizer Section — Furnish and install economizer complete with recirculated air dampers, outside air dampers and controls. Low leakage dampers shall ride in nylon bearings. The economizer section shall provide for the introduction of outdoor air for minimum ventilation and free cooling. Integrated economizer control shall allow compressors to cycle for additional cooling, as needed. Damper actuator shall be opposing gear driven, 24 volt, fully modulating design. Plug-in control board (on unit IMC board) shall consist of adjustable minimum positioner, enthalpy setpoint and DIP switches for setting type of control logic used. Economizer control options shall consist of sensible temperature, global, outdoor enthalpy and differential enthalpy (outdoor and return air). Optional outdoor air hood (required) with filters shall be galvanized steel with a powdered enamel paint finish electrostatically bonded to the metal. Economizer shall be available for factory or field installation.

Gravity Exhaust Dampers — Pressure operated dampers shall be available for factory or field installation. Extruded aluminum dampers shall prevent blow-back and outdoor air infiltration during off cycle.

Power Exhaust Fan — Shall be available for all models with economizer (down-flow applications only). Direct drive propeller type fan shall exhaust air through optional gravity exhaust damper (required). Motor shall be overload protected. Fan shall be factory or field installed between economizer and gravity exhaust dampers.

Horizontal Conversion Kit — Shall be available for all models to provide duct covers to block off unit down-flow supply air opening, horizontal return air opening panel (on unit) is moved to block off down-flow return air opening for horizontal applications.

Horizontal Gravity Exhaust Dampers — Pressure operated dampers shall be available for field installation in the return air duct. Extruded aluminum dampers shall prevent blow-back and outdoor air infiltration during off cycle.

Outdoor Air Damper Section — Optional outdoor dampers shall be available to provide outdoor air requirements of up to 25%. Models shall be available for manual or automatic operation. Dampers shall be opposing gear driven design. Motorized damper section shall install internal to the unit. Optional outdoor air hood (required) with filters shall be galvanized steel with a powdered enamel paint finish electrostatically bonded to the metal. Dampers shall be available for factory or field installation.

Ceiling Diffusers — Furnish and install a (flush or stepdown) optional combination ceiling supply and return air diffuser. It shall be capable of not less than _____ ft. (m) radius of effective throw. Supply and return transitions shall be available, for field installation in the roof mounting frame, to provide duct connection to the diffuser.

Control Systems — Shall provide a selection of control systems to automatically operate the mechanical equipment through the heating or cooling and ventilating cycles as required.

Coil Guards — Furnish and install galvanized steel coil guards.

Hail Guards — Furnish and install heavy gauge, painted steel hail guards.

Dirty Filter Switch — Furnish and install pressure switch that indicates dirty filter, relays information to Integrated Modular Control.

Blower Proving Switch — Furnish and factory install air pressure switch to monitor blower operation.

High Efficiency Blower Motor — Furnish and factory install high efficiency blower motor.

Indoor Air Quality Sensor — Furnish and field install sensor to monitor CO₂ levels, relays information to Integrated Module Control which adjusts economizer dampers proportionately to the pollutant level.

Service Valves (LCA/LGA) — Furnish and factory install fully serviceable brass service valves in discharge and liquid lines. Shall allow refrigerant pump down to high side of system for servicing of low side.

Smoke Detectors — Furnish and factory install photoelectric type smoke detector in either or both return air section and supply air section.

Corrosion Protection — Furnish and factory apply phenolic epoxy coating to either or both of the following:

Outdoor coils with painted outdoor base section. Indoor coil with painted indoor base section and painted blower housings.
