

**COMMERCIAL  
PRODUCT SPECIFICATIONS**

**LANDMARK®**

Performance Marked by Flexibility™

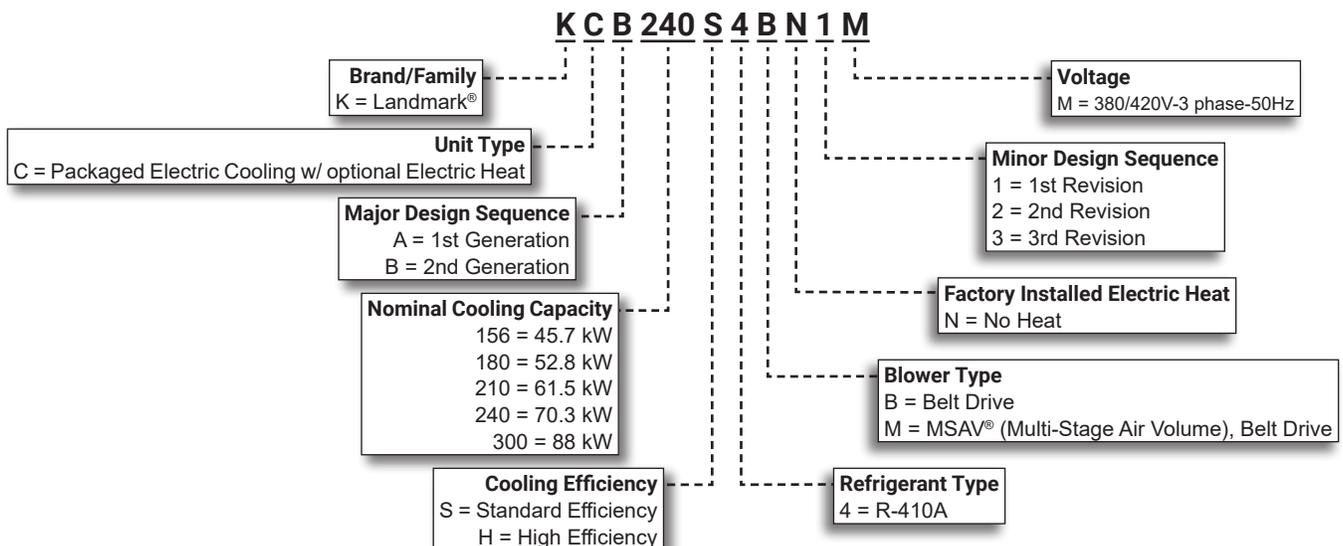

**45.7 to 88 kW (13 to 25 Tons)**

**Net Cooling Capacity - 37.1 to 68.6 kW (127 000 to 234 000 Btuh)**

**Optional Electric Heat - 11.5 to 45.9 kW**

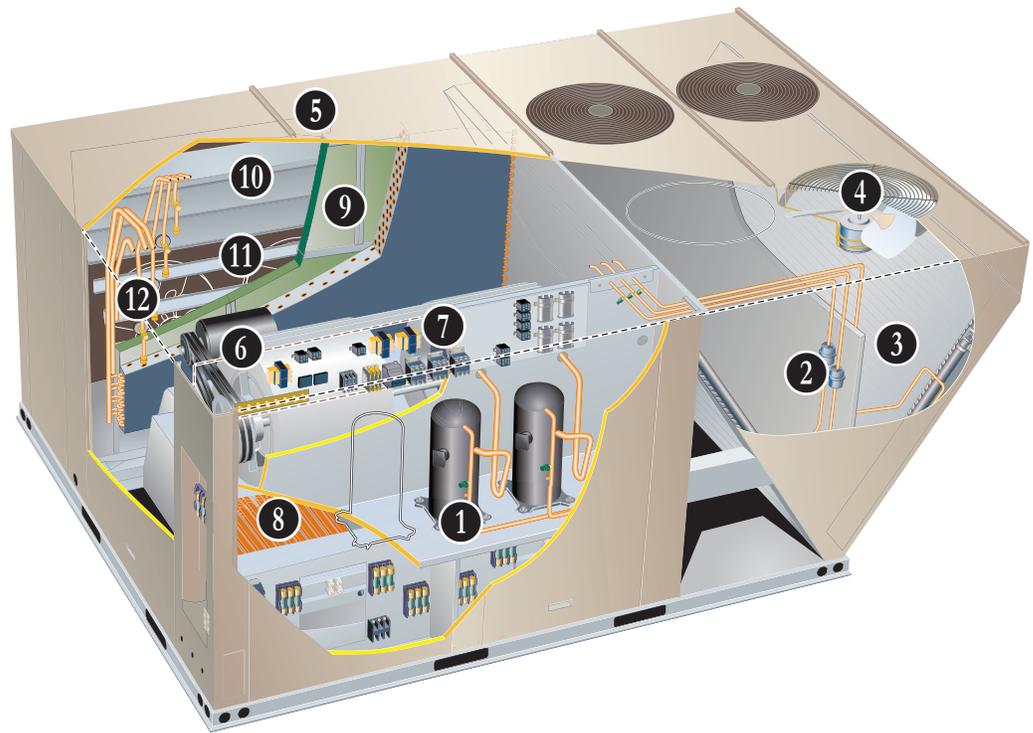

**MODEL NUMBER IDENTIFICATION**

## FEATURE HIGHLIGHTS

Landmark® rooftop units from Lennox are the new standard for reliable, efficient rooftop units built for long-lasting performance that can significantly improve indoor and outdoor environments.

1. Scroll Compressors
2. Filter/Driers
3. Coil System
4. Outdoor Coil Fan Motors
5. Heavy-Gauge Steel Cabinet
6. Blower
7. Unit Control
8. Electric Heat (option)
9. Air Filters
10. Economizer (option)
11. Downflow Barometric Relief Dampers With Exhaust Hood (option)
12. Power Exhaust Fan (option)

## APPROVALS

### PERFORMANCE/QUALITY

- Components bonded for grounding to meet safety standards for servicing required by Underwriters Laboratories (UL) and the International Electrotechnical Commission (IEC).
- Cooling performance is rated at test conditions included in Air-Conditioning, Heating and Refrigeration (AHRI) Standard 340/360 while operating at rated voltage and air volumes.
- International Organization for Standardization (ISO) 9001 Registered Manufacturing Quality System

## FEATURES AND BENEFITS

### COOLING SYSTEM

- Designed to maximize sensible and latent cooling performance at design conditions
- System can operate from  $-1^{\circ}\text{C}$  to  $52^{\circ}\text{C}$  without any additional controls

#### R-410A Refrigerant

- Non-chlorine
- Ozone friendly

#### 1 Scroll Compressors

- Scroll compressors on all models for high performance, reliability and quiet operation
- Resiliently mounted on rubber grommets for quiet operation

#### Compressor Crankcase Heaters

- Protect against refrigerant migration that can occur during low ambient operation

#### Thermal Expansion Valves (All High Efficiency Models, 300S Model)

- Assures optimal performance throughout the application range
- Removable element head

#### Refrigerant Metering Orifice (All Standard Efficiency Models except 300S Model)

- Accurately meters refrigerant in system
- Refrigerant control is accomplished by exact sizing of refrigerant metering orifice

#### 2 Filter/Driers

- High capacity filter/drier protects the system from dirt and moisture

#### High Pressure Switches

- Protects the compressor from overload conditions such as dirty condenser coils, blocked refrigerant flow, or loss of outdoor fan operation

#### Freezestats

- Protects the evaporator coil from damaging ice build-up due to conditions such as low/no airflow, or low refrigerant charge

#### 3 Lennox' Environ™ Coil System

Lightweight, all aluminum brazed fin construction

- Constructed of three components
  - A flat extrusion tube
  - Fins in-between the flat extrusion tube
  - Two refrigerant manifolds

#### Environ™ Coil System Features:

- Improved heat transfer performance due to high primary surface area (flat tubes) versus secondary surface (fins)
- Smaller internal volume (reduced refrigerant charge)
- High durability
- All aluminum construction
- Fewer brazed joints
- Compact design
- Reduced unit weight
- Easy maintenance/cleaning
- Face split design
- Mounting brackets with rubber inserts
- Angled cabinet design protects coil from damage

#### Evaporator Coil

- Copper tube construction
- Enhanced rippled-edge aluminum fins
- Flared shoulder tubing connections
- Silver soldered construction
- Factory leak tested
- Cross row circuiting with rifled tubing

#### Condensate Drain Pan

- Plastic, sloped drain pan
- Side or bottom drain connections

## FEATURES AND BENEFITS

### COOLING SYSTEM (continued)

#### 4 Outdoor Coil Fan Motors

- Thermal overload protected
- Totally enclosed
- Permanently lubricated ball bearings
- Shaft up
- Wire basket mount

#### Outdoor Coil Fans

- Polyvinyl chloride (PVC) coated fan guard furnished.

#### Required Selections

#### Cooling Capacity

- Specify nominal cooling capacity

#### Options/Accessories

#### Factory Installed

#### Conventional Fin/Tube Condenser Coil (replaces Environ™ Coil System, Standard Efficiency Models only)

- Copper tube construction
- Enhanced rippled-edge aluminum fins
- Flared shoulder tubing connections
- Silver soldered construction

#### Field Installed

#### Condensate Drain Trap

- Available in copper or polyvinyl chloride (PVC)

#### Drain Pan Overflow Switch

- Monitors condensate level in drain pan, shuts down unit if drain becomes clogged

#### Low Ambient Controls

- Units operate satisfactorily down to 7°C outdoor air temperature without any additional controls
- Two low ambient control options are available for field installation
  1. **Low Ambient Control Kit (-1°C)** - Allows unit operation down to -1°C
  2. **Low Ambient Control Kit (-17°C)** - Allows unit operation down to -17°C without evaporator coil icing
    - Head pressure speed control reduces outdoor fan operation during low ambient conditions until head pressure rises to the setpoint
    - Pressure transducers are mounted on the liquid lines
    - High pressure switches are furnished to replace existing
    - Wiring harnesses are furnished for simple plug-in wiring to fans and controller

### CABINET

#### 5 Construction

- Heavy-gauge steel panels
- Full perimeter heavy-gauge galvanized steel base rail
- Base rails have rigging holes
- Three sides of the base rail have forklift slots
- Raised edges around duct and power entry openings in the bottom of the unit for water protection

#### Airflow Choice

- Units are shipped in downflow (vertical) return air flow configuration

**NOTE** - Units can be field converted to horizontal air flow with optional Horizontal Return Air Panel Kit and Horizontal Roof Curb.

#### Power Entry

- Electrical lines can be brought through the unit base or through horizontal access knock-outs

#### Exterior Panels

- Constructed of heavy-gauge, galvanized steel
- Two-layer enamel paint finish

#### Insulation

- Fully insulated with non-hygroscopic fiberglass insulation (conditioned areas)
- Unit base is fully insulated
- Base insulation serves as an air seal to the roof curb, eliminating the need to add a seal during installation

#### Access Panels

- Economizer/Filter section
- Heating/Blower section
- Compressor/Controls section

#### Options/Accessories

#### Factory Installed

#### Corrosion Protection

- Completely flexible immersed coating
- Electrodeposited dry film process
- AST ElectroFin E-Coat
- Meets Mil Spec MIL-P-53084, ASTM B117 Standard Method Salt Spray Testing.
- Indoor Corrosion Protection:
  - Coated coil
  - Painted blower housing
  - Painted indoor base
- Outdoor Corrosion Protection:
  - Coated coil
  - Painted outdoor base

## FEATURES AND BENEFITS

### **CABINET (continued)**

#### Options/Accessories (continued)

#### Hinged Access Panels

- Filter section
- Heating/Blower section
- Compressor/Controls section
- Panel seals and quarter-turn latching handles provide a tight air and water seal

#### **Field Installed**

#### Combination Coil/Hail Guards

- Heavy gauge steel frame painted to match cabinet with expanded metal mesh to protect the outdoor coil from damage.

#### Horizontal Return Air Panel Kit

- Required for horizontal applications with Horizontal Roof Curb, contains panel with return air opening for field replacement of existing unit panel and panel to cover bottom return air opening in unit, see dimension drawings.

### **BLOWER**

- 6** A wide selection of supply air blower options are available to meet a variety of airflow requirements.

#### Motor

- Overload protected, equipped with ball bearings. Belt drive motors are offered on all models and are available in several different sizes to maximize air performance.

#### Supply Air Blower

- Forward curved blades, double inlet, blower wheel is statically and dynamically balanced. Equipped with ball bearings and adjustable pulley (allows speed change).
- Blower assembly slides out of unit for servicing.

#### Required Selections

- Order blower motor output and drive kit number required when base unit is ordered, see Drive Kit Specifications Table.

#### Select Constant Air Volume (CAV) or MSAV® (Multi-Stage Air Volume) Supply Air Blower Option

- Constant Air Volume (CAV) models supply a constant volume of air
- MSAV® (Multi-Stage Air Volume) models utilize a Variable Frequency Drive (VFD) to stage the supply air blower airflow
  - The VFD alters the frequency and voltage of the power supply to the blower to control blower speed
  - The supply air blower has two speeds:
    1. Low speed for part-load cooling operation

**NOTE** - Low speed is 66% of high speed

2. High speed for full load cooling and all heat modes
- Full speed blower operation is set by adjusting the motor pulley to deliver the desired air volume
  - The ventilation speed is selectable between high and low speed

**NOTE** - Part load airflow in cooling mode on MSAV® models should not be set below 30 L/s per kW to reduce the risk of evaporator coil freeze-up.

- The VFD has an operational range of -40 to 52°C outdoor air ambient temperature
- Lower operating costs are obtained when the blower is operated on lower speeds

#### MSAV® Sequence of Operation

- Ventilation speed is determined by the VENT SPEED switch setting on VFD control board (LO or HI)
- Blower operates in low speed for mechanical cooling (Y1)
- Blower operates in high speed for any other mode (free cooling, mechanical cooling Y1+Y2, and heating)
- Economizer damper minimum position is fully closed in unoccupied mode
- In occupied mode, the economizer damper minimum position is determined by the setting of the two potentiometers on VFD control board:
  - **LO SPD MIN POS** potentiometer sets the minimum position when blower is operating at low speed
  - **HI SPD MIN POS** potentiometer sets the minimum position when blower is operating at high speed

#### Ordering Information

- Specify standard or high efficiency blower motor, motor horsepower and drive kit number when base unit is ordered

### **CONTROLS**

#### **7** Unit Control

- All control voltage is provided via a 24V (secondary) transformer with built-in circuit breaker protection
- Up to 2 heat / 2 cool staging with a third party DDC control system or thermostat
- Low voltage terminal block provides screw terminal connections for thermostat or controller wiring
- Night Setback Mode saves energy by closing outdoor air dampers and operating supply fan on thermostat demand only

#### Options/Accessories

#### **Field Installed**

#### Smoke Detector

- Photoelectric type
- Installed in supply air section, return air section or both sections
- Available with power board and single sensor (supply or return) or power board and two sensors (supply and return)
- Power board located in unit control compartment.

#### **Commercial Control Systems**

#### Thermostats

- Control system and thermostat options, see page 9

## FEATURES AND BENEFITS

### **ELECTRICAL**

All units include terminal block and fuse block in power entry junction box for single power entry application.

#### **Marked & Color-Coded Wiring**

- All electrical wiring is color-coded and marked to identify which components it is connecting

#### **Electrical Plugs**

- Positive connection electrical plugs are used to connect common accessories or maintenance parts for easy removal or installation

### **Options/Accessories**

#### **Field Installed**

#### **8 Electric Heat**

- Helix wound nichrome elements
- Individual element limit controls
- Wiring harness
- Unit fuse block
- See Options / Accessories tables for ordering information

#### **Phase Monitor**

- Phase monitor detects the phasing of incoming power
- If the incoming power is out of phase or if any of the three phases are lost red LED on the phase monitor will light and the unit will not start
- Green LED indicates normal operation with correct incoming power phasing

**NOTE** - Phase Monitor is factory Installed in the control compartment on all units equipped with the MSAV® Supply Air Blower option.

### **Required Selections**

#### **Voltage Choice**

- Specify when ordering base unit

### **INDOOR AIR QUALITY**

#### **9 Air Filters**

- Disposable 51 mm filters furnished as standard

### **Options/Accessories**

#### **Field Installed**

#### **Healthy Climate® High Efficiency Air Filters**

- Disposable MERV 8 or MERV 13 (Minimum Efficiency Reporting Value based on ASHRAE 52.2) efficiency
- 51 mm pleated filters

#### **Healthy Climate® UVC Germicidal Lamps**

- Germicidal lamps emit ultra-violet (UV-C) energy, which has been proven to be effective in reducing microbes such as viruses, bacteria, yeasts, and molds
- This process either destroys the organism or controls its ability to reproduce
- UV-C energy greatly reduces the growth and proliferation of mold and other bioaerosols (bacteria and viruses) on illuminated surfaces (particularly coil and drain pan)
- Field installed in the blower/evaporator coil section
- Magnetic safety interlock terminates power when access panels are removed
- All necessary hardware for installation is included
- Lamps operate on 220V-1ph power supply

**NOTE** - Step-down transformer must be field supplied for field installation for 380/420V primary to 220V secondary.

#### **Indoor Air Quality (CO<sub>2</sub>) Sensors**

- Monitors CO<sub>2</sub> levels
- Reports to the Unit Controller which adjusts economizer dampers as needed

### ECONOMIZER

#### Factory or Field Installed

- 10** Economizer  
(Standard and High Performance Common Features)
- Outdoor Air Hood with mist elimination filter furnished
  - Mixed Air Sensor furnished for field installation in the rooftop unit

**NOTE** - Sensor is factory installed when Economizer is factory installed.

#### Standard Economizer Features

Gear-driven action

- 24-volt, fully-modulating spring return motor
- Return air and outdoor air dampers
- Plug-in connections to unit
- Nylon bearings
- Neoprene seals

#### Standard Economizer Control Module

- The Standard Economizer Control Module can be adjusted to operate based on outdoor air temperatures

#### Economizer Controls:

- Damper Minimum Position - Can be set lower than traditional minimum air requirements resulting in cost savings
- IAQ Sensor - Signals dampers to modulate and maintain 13°C when CO<sub>2</sub> is higher than the CO<sub>2</sub> setpoint
- Demand Control Ventilation (DCV) LED - A steady green Demand Control Ventilation LED indicates the IAQ reading is higher than setpoint and requires more fresh air
- Free Cool LED - A steady green LED indicates outdoor air is suitable for free cooling
  - Free Cooling runs when outdoor air temperature is lower than the set temperature on the economizer control

**NOTE:** The Free Cooling default setting for outdoor air temperature sensor is 13°C.

#### High Performance Economizer Features

- Gear-driven action
- High torque 24-volt fully-modulating spring return damper motor
- Return air and outdoor air dampers
- Plug-in connections to unit
- Stainless steel bearings
- Enhanced thermoplastic vulcanizate (TPV) seals
- Flexible stainless steel jamb seals

#### High Performance Economizer Control Module

- Provides inputs and outputs to control economizer based on parameter settings
- Automatically detects sensors by polling to determine which sensors are installed in system.
- Displays any alarm messages (fault detection and diagnostics) as an aid in troubleshooting
- Non-volatile memory retains parameter settings in case of power failure
- Keypad with four navigation buttons and LCD screen is furnished for setting economizer parameters
  - Menu Up/Exit (⬆) button returns to the main menu
  - Arrow Up (▲) button moves to the previous or next parameter within the selected menu
  - Arrow Down (▼) button moves to the next parameter within the selected menu
  - Select (enter) (↵) button confirms parameter selection

#### Main Menu Structure:

- STATUS (economizer and system operation status)
- SETPOINTS (settings for various setpoint parameters)
- SYSTEM SETUP (settings/information about the system)
- ADVANCED SETUP (freeze protection, CO<sub>2</sub> settings, stage 3 delay and additional calibration settings)
- CHECKOUT (damper positions)
- ALARMS (output signal that can be configured for remote alarm monitoring)

**NOTE** - Refer to Installation Instructions for complete setup information and menu parameters available.

#### Factory or Field Installed

##### Single Enthalpy Temperature Control

- Outdoor air enthalpy sensor enables Economizer if the outdoor enthalpy is less than the setpoint of the control

##### Field Installed

##### Differential Enthalpy Control

- Order two Single Enthalpy Controls
- One is field installed in the return air section, the other in the outdoor air section
- Allows the economizer control board to select between outdoor air or return air, whichever has lower enthalpy

## OPTIONS / ACCESSORIES

### EXHAUST

#### **Factory or Field Installed**

#### **11 Downflow Barometric Relief Dampers With Exhaust Hood**

- Allow relief of excess air
- Aluminum blade dampers prevent blow back and outdoor air infiltration during off cycle
- Exhaust hood with bird screen is furnished

#### **Field Installed**

#### **Horizontal Barometric Relief Dampers With Exhaust Hood**

- For use when unit is configured for horizontal applications requiring an economizer
- Allows relief of excess air
- Aluminum blade dampers prevent blow back and outdoor air infiltration during off cycle
- Field installed in return air duct
- Exhaust hood with bird screen is furnished

#### **12 Power Exhaust Fan**

- Installs internal to unit for downflow applications only with economizer option
- Provides exhaust air pressure relief
- Interlocked to run when supply air blower is operating, fan runs when outdoor air dampers are 50% open (adjustable)
- Motor is overload protected
- Requires Economizer with Outdoor Air Hood and Downflow Barometric Relief Dampers.
- Dual fans
- 508 mm diameter
- 5 blades with
- Two 0.25 kW motors

### OUTDOOR AIR

#### **Factory or Field Installed**

#### **Outdoor Air Damper - Downflow or Horizontal With Air Hood**

- Linked mechanical dampers
- 0 to 25% (fixed) outdoor air adjustable
- Installs in unit
- Includes outdoor air hood
- Automatic model features fully modulating spring return damper motor with plug-in connection
- Manual model features parallel blade, gear-driven dampers with adjustable fixed position

**NOTE** - Outdoor Air Hood is included when damper is factory installed and is furnished with damper when ordered for field installation.

### ROOF CURBS

- Nailer strip furnished
- Mates to unit,
- US National Roofing Contractors Approved
- Shipped knocked down

#### **Downflow**

#### **Hybrid Roof Curbs**

- Interlocking tabs fasten corners together
- No tools required
- Can also be fastened together with furnished hardware.
- Available in 203, 356, 457, and 610 mm heights

#### **Adjustable Pitch Curb**

- Fully adjustable pitch curb provides a level platform for rooftop units allowing flexible installations on roofs with uneven or sloped angles
- Maximum slope is 19 mm per 300 mm in any direction
- Uses interlocking tabs to fasten corners together
- No tools required
- Hardware is furnished to connect upper curb with lower curb
- Available in 356 mm height

#### **Adaptor Curbs (not shown)**

- Curbs are regionally sourced
- Dimensions vary based upon the source

**NOTE** - Contact your local sales representative for a detailed cut sheet with applicable dimensions.

#### **Horizontal**

- Converts unit from downflow to horizontal (side) air flow
- Return air is on unit
- Supply air is on curb
- See dimension drawings
- Meets National Roofing Code requirements
- Requires Horizontal Return Air Panel Kit
- Available in 660, 762, 940 and 1041 mm heights

**NOTE** - Optional Insulation Kit is available to help prevent sweating.

### CEILING DIFFUSERS

#### **Ceiling Diffusers (Flush or Step-Down)**

- Aluminum grilles; large center grille
- Insulated diffuser box with flanges
- Hanging rings (furnished)
- Interior transition (even air flow)
- Internally sealed (prevents recirculation)
- Adapts to T-bar ceiling grids or plaster ceilings

#### **Transitions (Supply and Return)**

- Used with diffusers
- Installs in roof curb
- Galvanized steel construction
- Flanges furnished for duct connection to diffusers
- Fully insulated

## OPTIONAL CONVENTIONAL TEMPERATURE CONTROL SYSTEMS

### ComfortSense® 7500 Commercial 7-Day Programmable Thermostat

- Four-Stage Heating / Two-Stage Cooling
- Universal Multi-Stage
- Intuitive Touchscreen Interface
- Automatic Changeover between Heating and Cooling
- Full Seven-Day Programming
- Four Time Periods Per Day
- Temperature and Humidity Control
- One-Touch Away Mode
- Holiday Scheduling
- Smooth Setback Recovery (SSR)
- Performance Reports
- Notifications/Reminders
- Dehumidification/Humiditrol® Control for Split Systems and Rooftop Units
- Economizer Relay Control
- Backlit Display
- Wallplate Furnished
- FDD, ASHRAE and IECC Compliant

### ComfortSense® 3000 Commercial 5-2 Day Programmable Thermostat

- Two-Stage Heating / Two-Stage Cooling
- Conventional Systems
- Intuitive Interface
- 5-2 Day Programming
- Program Hold
- Remote Indoor Temperature Sensing
- Smooth Setback Recovery (SSR)
- Economizer Relay Control
- Maintenance/Filter/Service Reminders
- Backlit Display
- Wallplate Furnished
- Simple Up and Down Temperature Control

### BACnet Compatible Thermostat With Reheat Function

- 7-Day Programmable
- For units with or without Humiditrol®
- BTL listed MS/TP ensures compatibility with any BACnet system
- Built-in control programs for conventional and heat pump applications
- Conventional systems up to 3-stage heat and 3-stage cool
- Heat pumps with 1 or 2 compressors and up to 2-stage auxiliary heat
- On-board temperature and humidity sensor
- Multiple configurable inputs and outputs enable advanced control strategies
- Set-up Wizard enables rapid system configuration
- No special tools required for installation or commissioning
- Seven-day (2, 4 or 6 event) occupancy scheduling per day
- Backlit 5-inch LCD touchscreen

Description	Model No.	Catalog No.
<b>ComfortSense® 7500 7-Day Programmable</b>	C0STAT06FF2L	<b>17G74</b>

<sup>1</sup> Lamps operate on 220V single-phase power supply. Step-down transformer must be field supplied for field installation for 380/420V primary to 220V secondary. Alternately, a separate 220V power supply may be used to directly power the UVC ballast(s).

NOTE - Catalog and model numbers shown are for ordering field installed accessories.

<b>Electrical characteristics</b>			380/420V - 50 hertz - 3 phase			

NOTE - Net capacity includes evaporator blower motor heat deduction. Gross capacity does not include evaporator blower motor heat deduction.

<sup>1</sup> Rating test conditions are those included in Air Conditioning, Heating and Refrigeration Institute (AHRI) Standard 340/360; 35°C (95°F) outdoor air temperature and 27°C (80°F) db/19°C (67°F) wb entering evaporator air; minimum external duct static pressure while operating at rated voltage and air volumes.

<sup>2</sup> Rated at 46°C (115°F) outdoor air temperature and 27°C db/19°C (67°F) wb entering evaporator air (T3 Conditions).

<sup>3</sup> Using total air volume and system static pressure requirements determine from blower performance tables motor rev/min and motor output required. Maximum usable output of motors furnished are shown. If motors of comparable output are used, be sure to keep within the service factor limitations outlined on the motor nameplate

NOTE - Units equipped with MSAV® (Multi-Stage Air Volume) option are limited to a motor service factor of 1.0.

	<b>Filters</b>	Type of filter		Fiberglass, disposable			
Number and size - mm (in.)			(6) 610 x 610 x 51 (24 x 24 x 2)				
<b>Electrical characteristics</b>			380/420V - 50 hertz - 3 phase				

NOTE - Net capacity includes evaporator blower motor heat deduction. Gross capacity does not include evaporator blower motor heat deduction.

<sup>1</sup> Rating test conditions are those included in Air Conditioning, Heating and Refrigeration Institute (AHRI) Standard 340/360; 35°C (95°F) outdoor air temperature and 27°C (80°F) db/19°C (67°F) wb entering evaporator air; minimum external duct static pressure while operating at rated voltage and air volumes.

<sup>2</sup> Rated at 46°C (115°F) outdoor air temperature and 27°C db/19°C (67°F) wb entering evaporator air (T3 Conditions).

<sup>3</sup> Using total air volume and system static pressure requirements determine from blower performance tables from blower performance tables rev/min and motor output required. Maximum usable output of motors furnished are shown. If motors of comparable output are used, be sure to keep within the service factor limitations outlined on the motor nameplate

NOTE - Units equipped with MSAV® (Multi-Stage Air Volume) option are limited to a motor service factor of 1.0.

## BLOWER DATA

**BLOWER TABLE INCLUDES RESISTANCE FOR BASE UNIT ONLY WITH DRY INDOOR COIL & AIR FILTERS IN PLACE FOR ALL UNITS ADD:**

- 1 - Wet indoor coil air resistance of selected unit.
- 2 - Any factory installed options air resistance (electric heat, economizer, etc.)
- 3 - Any field installed accessories air resistance (electric heat, duct resistance, diffuser, etc.)

Then determine from blower table blower motor output and drive required.

See page 31 for wet coil and option/accessory air resistance data.

See page 31 for factory installed drive kit specifications.

### MINIMUM AIR VOLUME REQUIRED FOR USE WITH OPTIONAL ELECTRIC HEAT

All units require 2830 L/s (6000 cfm) minimum air with electric heat.

NOTE - Using total air volume and system static pressure requirements determine from blower performance tables rev/min and motor output required. Maximum usable output of motors furnished are shown. If motors of comparable output are used, be sure to keep within the service factor limitations outlined on the motor nameplate.

NOTE - Units equipped with MSAV® (Multi-Stage Air Volume) option are limited to a motor service factor of 1.0.

<sup>1</sup> Throw is the horizontal or vertical distance an airstream travels on leaving the outlet or diffuser before the maximum velocity is reduced to 15 m (50 ft.) per minute. Four sides open.

## UNIT CLEARANCES

### Unit With Economizer

Note: 180H, 240S, 300S sizes shown

<sup>1</sup> Unit Clearance	A		B		C		D		Top Clearance
	mm	in.	mm	in.	mm	in.	mm	in.	
<b>Service Clearance</b>	1524	60	914	36	914	36	1676	66	Unobstructed
<b>Minimum Operation Clearance</b>	1143	45	914	36	914	36	1041	41	

NOTE - Entire perimeter of unit base requires support when elevated above the mounting surface.

<sup>1</sup> **Service Clearance** - Required for removal of serviceable parts.

**Minimum Operation Clearance** - Required clearance for proper unit operation.

## OUTDOOR SOUND DATA

Unit Model Number	Octave Band Linear Sound Power Levels dB, re 10 <sup>-12</sup> Watts - Center Frequency - Hz							<sup>1</sup> Sound Rating Number (SRN) (dBA)
	125	250	500	1000	2000	4000	8000	
156H, 180S, 210S	71	78	81	81	76	71	63	86
180H, 240S	80	83	87	88	84	80	71	93
210H, 240H, 300S	79	84	88	89	85	82	73	94

Note - The octave sound power data does not include tonal corrections.

<sup>1</sup> Sound Rating Number according to ARI Standard 370-2001 (includes pure tone penalty). "SRN" is the overall A-Weighted Sound Power Level, (LWA), dB (100 Hz to 10,000 Hz).
