## APPROVALS

Tested with matching air conditioner and heat pump units in the Lennox Research Laboratory environmental test room in accordance with test conditions included in Air-Conditioning, Heating and Refrigeration Institute (AHRI) Standard 340/360-2007 while operating at rated voltage and air volumes.

Blower data is from unit tests conducted in the Lennox Laboratory air test chamber.

Components bonded for grounding to meet safety standards for servicing required by Underwriters Laboratories (UL) and the International Electrotechnical Commission (IEC).

International Organization for Standardization (ISO) 9001 Registered Manufacturing Quality System.

## APPLICATIONS

Provides installation versatility and maximum efficiency in cooling performance, air handling and filtering in cooling or heat pump applications.

Convertible upflow or horizontal design.

Equipped with single circuit (072) or dual-circuit (090-240) indoor coils, suitable for application with Lennox 21 to 70 kW TSA air conditioners or 26 to 35 kW TPA heat pump outdoor units.

Each refrigerant circuit has a dedicated expansion valve.

090-240 models have a dual distribution system for two stage capacity control during cooling cycles.

Air handlers are shipped factory assembled ready to install. Standard static blower drive is furnished factory installed. Low or high static drive options are available as factory installed options. See Blower Drive Specifications Table for selections.

See air conditioners bulletins in Air Conditioners section for cooling capacities and ratings.

See heat pump bulletins in Heat Pump Outdoor Units section for cooling and heating capacities and ratings.

## FEATURES AND BENEFITS

### REFRIGERANT SYSTEM

#### 1 Multi-Circuit, Copper Tube Coil

Extra large surface area of Lennox designed coil provides maximum cooling efficiency, excellent heat transfer and low air resistance.

Coils on 090-240 models are face split with separate circuits, each circuit has its own expansion valve.

Precise circuiting gives uniform refrigerant distribution.

Lennox fabricated coil is constructed of precisely spaced ripple edged aluminum fins fitted to durable seamless, rifled copper tubes.

Rifled tubing provides enhanced heat transfer which results in maximum coil performance when combined with the Lennox fin design.

Fins are strengthened to resist bending and are equipped with collars that grip tubing for maximum contact area.

Flared tubing connections and silver soldering provide tight, leakproof joints.

Long life copper tubing is corrosion-resistant and easy to field service.

Coil is thoroughly factory tested under high pressure to ensure leakproof construction.

#### 2 Expansion Valve

For use with R-410A systems.

Factory installed and piped.

Multi-circuit coils are equipped with one thermal expansion valve per circuit.

Valves are sized for best performance.

090 and 120 models have internal check valves for use with heat pump systems.

#### 3 Refrigerant Piping and Drain Connections

Refrigerant line inlets (knockouts) are provided on both sides of the cabinet.

Refrigerant lines require sweat connections and are made internal to the cabinet.

Condensate drain outlet extends outside the cabinet for ease of connection. Condensate drain can be relocated to other side of cabinet and can be repositioned for horizontal air flow applications.

### OPTIONS/ACCESSORIES

#### Field Installed

##### **Freezestat**

Protects the evaporator coil from damaging ice build-up due to conditions such as low/no air flow, or low refrigerant charge.

##### **Heat Pump Check Valve Kit (180-240 Models Only)**

Field installed kit contains valve assemblies that field convert the coil to allow it to be matched with two smaller heat pump outdoor units.

### INDOOR AIR QUALITY

#### **Filters**

51 mm thick, throwaway fiberglass media filters are furnished as standard.

Filter rack design permits quick and easy removal of filters for servicing.

### OPTIONS/ACCESSORIES

#### Field Installed

##### **Healthy Climate® High Efficiency Air Filters**

Disposable MERV 11 or MERV 16 (Minimum Efficiency Reporting Value based on ASHRAE 52.2) efficiency 5 inch pleated filters.

127 mm pleated filters offer longer filter life and better filtration efficiency compared to standard 51 mm filters.

##### **127 mm Filter Mounting Kits**

Required for use with *Healthy Climate®* MERV 11 or MERV 16 filters. Kit includes filter rack for 127 mm filters.

##### **Healthy Climate® UVC Germicidal Light Kits**

*Healthy Climate®* UVC light kits are specifically designed for the TA air handlers and attach directly to the indoor coil air shields without tools or fasteners at the optimal distance and location required. The UVC lights are sized to optimize the reduction of mold and other bioaerosols (bacteria and viruses) on the coil surface. In addition, the lights are equipped with unique (patent pending) directional honeycomb shields to focus the UVC light on the coil surface where it is needed and reduce the exposure of light on other components and access panels for improved safety and overall effectiveness.

Enhanced rapid start ballast provides UVC lamp operation at a full range of operating conditions.

LED's on ballast show lamp operation status.

"Green" LED indicates power on".

"Blue" LED indicates lamp operation.

Germicidal lamps emit ultra-violet (UVC) energy, which has been proven to be effective in reducing microbes such as viruses, bacteria, yeasts, and molds. This process either destroys the organism or controls its ability to reproduce.

Lamps operate on 208/230V/1ph power supply.

Step-down transformer is available. Order separately.

Lamps may be operated from separate 200/220/230V-1ph power source.

All necessary hardware for installation is furnished.

## FEATURES AND BENEFITS

### 4 BELT DRIVE BLOWERS

072-090-120-150 models are equipped with a single blower wheel, 180 and 240 models have dual blower wheels.

Centrifugal belt driven blowers deliver large air volumes quietly and with low power consumption.

Blower wheels are heavy-duty, with forward curved blades and double inlet.

Wheels are statically and dynamically balanced to eliminate vibration and designed to give maximum air delivery.

Bearings are heavy-duty, permanently sealed and lubricated.

Belt tension is automatically controlled by auto tensioning device.

Adjustable motor pulley allows speed adjustments.

Standard static drive is furnished factory installed. See Blower Drive Specifications table for optional factory installed low and high static drives available.

## OPTIONS/ACCESSORIES

### Factory Installed

#### **Low or High Static Drives**

A choice of optional low or high static drives are available for factory installation. See Blower Drive Specifications table.

## CONTROLS

### 5 Control Box

Control box located in separate compartment in unit cabinet.

Box may be relocated to alternate location for easier access depending on application. See dimension drawings.

Low voltage terminal strip factory installed.

Blower contactor furnished and factory installed in control box.

All controls are pre-wired at the factory.

### 6 CABINET

Cabinet is constructed of heavy-gauge, galvanized steel.

Cabinet is completely lined with thick fiberglass insulation resulting in quiet and efficient operation due to the excellent sound deadening and insulating qualities of fiberglass.

Supply and return air duct flanges are furnished for field installation. See dimension drawings.

Service access is provided on three sides (072-150) and four sides (180-240) of unit.

Large removable panels provide complete service access on one side of unit.

Electrical inlets are conveniently located in the cabinet. See dimension drawings.

### 7 Drain Pan

Deep, corrosion resistant plastic drain pan.

Reversible drain pan allows for drain outlets on either end of cabinet and can be repositioned for horizontal air flow applications.

Drain pan is removable from either side in both horizontal and vertical applications.

## OPTIONS/ACCESSORIES

### Factory Installed

#### **Corrosion Protection**

Polymeric epoxy coating that is deposited by electrical transport (electrophoresis), using a process known as electrocoat (e-coat). Available for enhanced coil corrosion protection. Factory installed on the indoor coil. Blower housing is painted when this option is ordered.

### Field Installed

#### **Float Switch**

Prevents condensate overflow by turning the unit off when the condensate level is abnormally high.

#### **Return Air Grilles**

Anodized aluminum grille field installs in return air opening of air handler.

#### **Return Air Grille Free Area**

T2GARD30L-1 - 0.38 m<sup>2</sup>.

T2GARD30M-1 - 0.55 m<sup>2</sup>.

T2GARD30N-1 - 0.71 m<sup>2</sup>.

## OPTIONS / ACCESSORIES

### ELECTRIC HEAT SECTION

Furnished in a separate add-on matching cabinet. Mounting hardware is furnished to secure cabinets together. Pre-punched mounting holes are furnished for aligning electric heat section to air handler supply air flange. Removable panel permits service access. Electrical inlet provides wiring entry. Field installed electric heaters are available in several kW sizes, see Electric Heat Data table. Helix wound, nichrome heating elements are exposed directly in the air stream resulting in instant heat transfer, lower coil temperatures and long service life. Elements are accurately located and insulated from the heavy-gauge steel support frame by high quality insulators. Elements are equipped with individual limit controls providing positive protection in case of overheating. Sub-fusing, contactors, control relays, 24V transformer are furnished. Certain electric heat sizes may be two-stage controlled (with field provided control) with each stage being energized only when required. See Electric Heat Tables.

### HOT WATER COIL

Furnished in a separate add-on matching cabinet. Mounting hardware is furnished to secure cabinets together. Pre-punched mounting holes are furnished for aligning cabinet to air handler. Cabinet is constructed of heavy-gauge galvanized steel. Completely insulated with thick, foil-faced fiberglass insulation. Removable panel permits service access. Cabinet is reversible to allow piping on either side of unit. Lennox designed and built coil has large face area, excellent heat transfer and low air resistance. Constructed of precisely spaced ripple-edged aluminum fins fitted to durable copper tubes. Fins are equipped with collars that grip tubing for maximum contact area. Flared shoulder tubing connections and silver soldering provide tight, leakproof joints. Long life copper tubing is easy to field service. Coil is thoroughly factory tested under high pressure to ensure leakproof construction. Valves and pumps must be furnished by installer.

### ECONOMIZER OPTIONS

Factory assembled and wired economizer dampers and controls are available for field installation. Heavy-gauge galvanized steel cabinet is completely insulated with thick, matte-faced fiberglass insulation. Large removable panels on both sides of cabinet provide complete service access. Mounting flanges provide ease of connection to air handler unit. Flanges on outdoor air opening and return air opening permit easy duct connection. Damper linkage and shafts are plated.

#### Factory or Field Installed

##### Standard Economizer Features

Gear-driven action, return air and outdoor air dampers, plug-in connections to unit, neoprene seals, 24-volt, fully-modulating spring return motor, adjustable minimum damper position.

##### Standard Economizer Control Module

The Standard Economizer Control Module can be adjusted to operate based on outdoor air temperatures.

##### Economizer Controls:

- Damper Minimum Position - Can be set lower than traditional minimum air requirements resulting in cost savings.
- IAQ Sensor - Signals dampers to modulate and maintain 55°F when CO<sub>2</sub> is higher than the CO<sub>2</sub> setpoint.
- Demand Control Ventilation (DCV) LED - A steady green Demand Control Ventilation LED indicates the IAQ reading is higher than setpoint and requires more fresh air.
- Free Cool LED - A steady green LED indicates outdoor air is suitable for free cooling.

Free Cooling runs when outdoor air temperature is lower than the set temperature on the economizer control.

*NOTE: The Free Cooling default setting for outdoor air temperature sensor is 55°F.*

##### High Performance Economizer Features

ASHRAE 90.1-2010 compliant.

*Gear-driven action, high torque 24-volt fully-modulating spring return damper motor, return air and outdoor air dampers, plug-in connections to unit, nylon bearings, enhanced neoprene blade edge seals and flexible stainless steel jamb seals to minimize air leakage.*

## OPTIONS / ACCESSORIES

### High Performance

#### Economizer Control Module

Module provides inputs and outputs to control economizer based on parameter settings.

Module automatically detects sensors by polling to determine which sensors are installed in system.

Module displays any alarm messages (fault detection and diagnostics) as an aid in troubleshooting.

Non-volatile memory retains parameter settings in case of power failure.

Keypad with four navigation buttons and LCD screen is furnished for setting economizer parameters.

- Menu Up/Exit button returns to the main menu.
- Arrow Up button moves to the previous or next parameter within the selected menu.
- Arrow Down button moves to the next parameter within the selected menu.
- Select (enter) button confirms parameter selection.

#### Main Menu Structure:

- STATUS (economizer and system operation status)
- SETPOINTS (settings for various setpoint parameters)
- SYSTEM SETUP (settings/information about the system)
- ADVANCED SETUP (freeze protection, CO<sub>2</sub> settings, stage 3 delay and additional calibration settings)
- CHECKOUT (damper positions)
- ALARMS (output signal that can be configured for remote alarm monitoring)

Refer to Installation Instructions for complete setup information and menu parameters available.

### Field Installed

#### Differential Enthalpy Control

Allows the outdoor air enthalpy control to select between outdoor air or return air, whichever has lower enthalpy. Field installed in economizer damper section.

NOTE - The catalog and model numbers that appear here are for ordering field installed accessories only.

X - Field Installed.

<sup>1</sup> Corrosion protection option requires extended lead time.

<sup>2</sup> Nominal kW at 400V/3ph/50hz. Electric heat model numbers are based on nominal kW for US applications.

<sup>3</sup> Order 127 mm (5 in.) Filter Mounting Kit and required number of MERV 11 or MERV 16 filters: - (3) 072-090, (4) 120-150.

<sup>4</sup> Step-down transformer (380/420V to 190/210V-1ph) or separate power supply is required.

## BLOWER DATA

### TAA072 BLOWER PERFORMANCE

All data is measured external to the unit with dry coil and standard 51 mm (2 in.) air filters in place.

FOR ALL UNITS ADD:

1 - Wet indoor coil air resistance of selected unit.

2 - Any field installed accessories air resistance (electric heat, economizer, etc.) See page 16.

Then determine from table the blower motor hp and drive rpm required. See page 15 for blower drive specifications.

## BLOWER DATA

### TAA090 BLOWER PERFORMANCE

All data is measured external to the unit with dry coil and standard 51 mm (2 in.) air filters in place.

FOR ALL UNITS ADD:

1 - Wet indoor coil air resistance of selected unit.

2 - Any field installed accessories air resistance (electric heat, economizer, etc.) See page 16.

Then determine from table the blower motor hp and drive rpm required. See page 15 for blower drive specifications.

## BLOWER DATA

### TAA180 BLOWER PERFORMANCE

All data is measured external to the unit with dry coil and standard 51 mm (2 in.) air filters in place.

FOR ALL UNITS ADD:

1 - Wet indoor coil air resistance of selected unit.

2 - Any field installed accessories air resistance (electric heat, economizer, etc.) See page 17.

Then determine from table the blower motor hp and drive rpm required. See page 15 for blower drive specifications.

## BLOWER DATA

### TAA240 BLOWER PERFORMANCE

All data is measured external to the unit with dry coil and standard 51 mm (2 in.) air filters in place.

FOR ALL UNITS ADD:

1 - Wet indoor coil air resistance of selected unit.

2 - Any field installed accessories air resistance (electric heat, economizer, etc.) See page 17.

Then determine from table the blower motor hp and drive rpm required. See page 15 for blower drive specifications.

Air Volume		STATIC PRESSURE EXTERNAL TO UNIT - Pa (Inches Water Gauge)

High	1078 - 1274	5.6	6.4	7.5	8.62	---	---	---	---	---	O

NOTE - Using total air volume and system static pressure requirements, determine from blower performance tables Rev/min and motor horsepower required. Maximum usable horsepower of motors furnished by Lennox are shown. If motors of comparable horsepower are used, be sure to keep within the service factor limitations outlined on the motor nameplate.

S - Factory installed standard

O - Factory Installed with extended lead time.

1 Nominal kW based on 400V/3ph/50hz.

2 Electric heater capacity only - does not include additional blower motor heat capacity.

3 Refer to local codes to determine wire, fuse and disconnect size requirements. Use wires suitable for at least 75°C (167°F).

4 Heating, Air Conditioning, Refrigeration type breaker or fuse.

## SPECIFICATIONS - HOT WATER COIL

General Data	Hot Water Coil Model No.	T2HWCL10LM1-	T2HWCL10N-1-
	Air Handler Model No.	TAA072 TAA090 TAA120 TAA150	TAA180 TAA240
Water Line Connections	Inlet o.d. - mm (in.) (sweat)	35 (1-3/8)	35 (1-3/8)
Hot Water Coil	Outlet o.d. - mm (in.) (sweat)	35 (1-3/8)	35 (1-3/8)
	Net face area - m <sup>2</sup> (sq. ft.)	0.56 (6.00)	0.84 (9.00)
	Tube diameter - mm (in.)	9.5 (3/8)	9.5 (3/8)
	Fins per mm (inch)	551 (14)	551 (14)

## UNIT CLEARANCES - MM (INCHES)

TOP (Upflow) or END (Horizontal) VIEW

### INSTALLATION CLEARANCES (WITH ELECTRIC HEAT)

Cabinet – 0 mm (0 in.)  
To Plenum – 0 mm (0 in.)  
To Outlet Duct within 3 feet (914 mm) – 0 mm (0 in.)

### RECOMMENDED SERVICE CLEARANCES

<sup>1</sup> Filter Removal and Routine Maintenance  
(Horizontal / Upflow):  
914 mm (36 in.)

<sup>1</sup> Service Clearance for Drain Pan Removal  
(Horizontal / Upflow):  
TAA072, TAA090 – 1448 mm (57 in.)  
TAA120, TAA150 – 1854 mm (73 in.)  
TAA180, TAA240 – 2590 mm (102 in.)

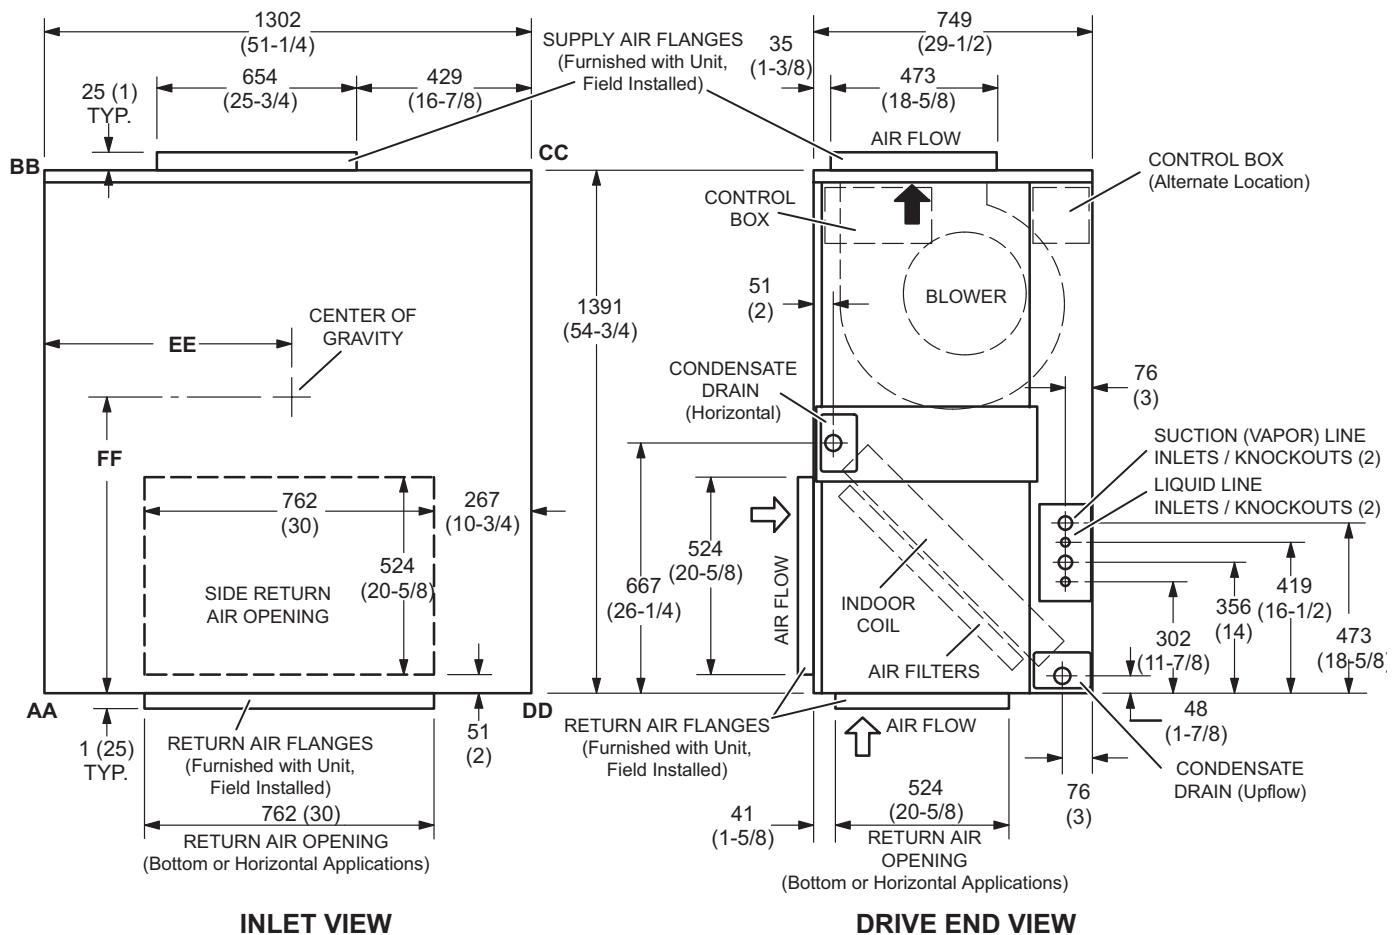

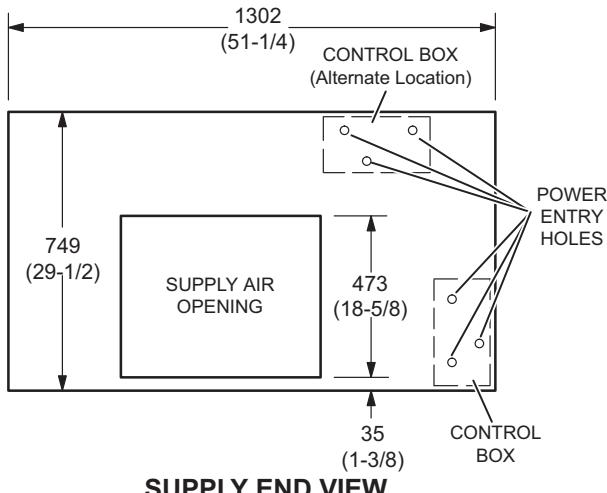

<sup>2</sup> Coil Cleaning / UVC Light Access (Upflow) :  
All models – 914 mm (36 in.)

<sup>3</sup> Coil Cleaning / UVC Light Access  
(Horizontal / Upflow):  
Provide 914 mm (36 in.) on this side if top/rear access is obstructed

<sup>3</sup> Alternate Drain/Refrigerant Line Location  
(Horizontal / Upflow):  
Allow additional clearance if refrigerant or drain lines are routed from this side of cabinet.

### TYPICAL SUPPORT METHOD FOR AIR HANDLER WITH HEAT SECTION IN HORIZONTAL POSITION

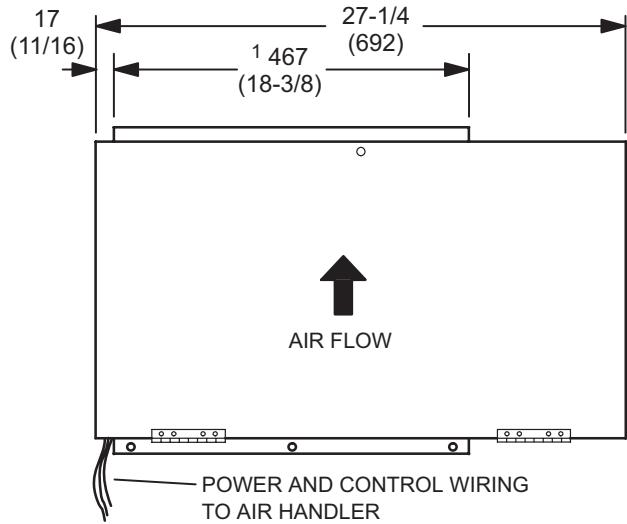

#### NOTES:

- 2 Ensure support rails do not interfere with ducting, plumbing or electrical connections.
- 3 When hot water or electric heat section is installed, additional support underneath these accessories will be required.
- 4 Support rods and rails are field supplied.
