**HEAT PUMPS**

**2SHP13**

Dry Charge Split System - 60 HZ

Bulletin No. 210645
July 2013
Supersedes June 2012

**3 to 5 Tons**

**MODEL NUMBER IDENTIFICATION**

- **Refrigerant Type**
  - 2 = R-22

- **Unit Type**
  - SHP = Split Heat Pump

- **Efficiency Rating**
  - 13 = 13 SEER Nominal

- **Cabinet**
  - Louvered Commercial

- **Series**
  - 1

- **Voltage**
  - T = 208/230V-3 phase-60hz

- **Nominal Capacity**
  - 36 = 36,000-Btuh
  - 48 = 48,000 Btuh
  - 60 = 60,000 Btuh

- **Major Revision Code**

- **Minor Revision Code**
FEATURES

EQUIPMENT WARRANTY

Compressor - limited warranty for five years.
installations.
All other covered components - one year.
Refer to Lennox Equipment Limited Warranty certificate
included with unit for specific details.

APPROVALS

Rated According to U.S. Department of Energy (DOE)
test procedures.
Units and components within bonded for grounding to
meet safety standards for servicing required by UL,
NEC and CEC.
Units are UL listed

APPLICATIONS

3 through 5 tons.
Three phase power supply.
Nitrogen-charged for replacement of R-22 components
only.
Designed for applications with remotely located indoor
air handler units or matching indoor coils with gas
furnaces (dual fuel applications).
Grommet-mounted compressor for quiet operation.
Discharge muffler for quiet operation.
Sound levels as low as 76 dB.
Internally manufactured to withstand high temperature
conditions.
Designed for ambients up to 125°F.
Low pressure switch for loss of charge system
protection.
Bi-directional filter drier for long-lasting durability.

REFRIGERATION SYSTEM

Copper Tube/Enhanced Fin Coil
Enhanced aluminum fins and copper tubing for high
efficiency and capacity.
Raised coil prevents debris from collecting in bottom of
coil and causing loss of airflow.
Entire coil is accessible for cleaning.
Coil is factory-tested under high pressure to ensure
leakproof construction.

Outdoor Coil Fan
Direct drive fan moves large air volumes uniformly
through entire condenser coil for high refrigerant cooling
and heating capacity.
Vertical air discharge minimizes operating sounds and
eliminates damage to lawn and shrubs.
Fan motor has sleeve bearings and is inherently
protected.
Motor totally enclosed for maximum protection from
weather, dust and corrosion.
Rain shield on motor provides additional protection from
moisture.
Fan service access accomplished by removal of top
panel.

High Capacity Liquid Line Drier
Factory installed in the liquid line, the drier traps
moisture or dirt that could contaminate the refrigerant
system.
100% molecular-sieve, bead type bi-flow drier.

Reversing Valve
4-way interchange reversing valve effects a rapid
change in direction of refrigerant flow resulting in quick
changeover from cooling to heating and vice versa.
Valve operates on pressure differential between outdoor
unit and indoor unit of the system. Factory installed.

OPTIONS

Check/Expansion Valve Kit
Must be ordered separately and field installed on certain
indoor units. See Specifications table.
Chatleff-style fittings.

Freezestat
Installs on or near the vapor line of the indoor coil or on
the suction line.
Senses suction line temperature and cycles the
compressor off when suction line temperature falls
below its setpoint.
Opens at 29°F and closes at 58°F.

High Pressure Switch
Protects the system from high pressure conditions that
can be a result of fan failure or a blocked/dirty coil.
Automatic reset.

Loss of Charge Kit
Helps protect the compressor from damage due low
refrigerant charge conditions.
SPST, normally-closed switch, automatic reset switch
mounted on suction line.
FEATURES

COMPRESSOR

Scroll Compressor
Compressor features high efficiency with uniform suction flow, constant discharge flow and high volumetric efficiency and quiet operation.
Compressor consists of two involute spiral scrolls matched together to generate a series of crescent shaped gas pockets between them.
During compression, one scroll remains stationary while the other scroll orbits around it.
Gas is drawn into the outer pocket, the pocket is sealed as the scroll rotates.
As the spiral movement continues, gas pockets are pushed to the center of the scrolls. Volume between the pockets is simultaneously reduced.
When pocket reaches the center, gas is now at high pressure and is forced out of a port located in the center of the fixed scrolls.
During compression, several pockets are compressed simultaneously resulting in a smooth continuous compression cycle.
Continuous flank contact, maintained by centrifugal force, minimizes gas leakage and maximizes efficiency.
Scroll compressor is tolerant to the effects of slugging and contaminants. If this occurs, scrolls separate, allowing liquid or contaminants to be worked toward the center and discharged.
Low gas pulses during compression reduces operational sound levels.
Compressor motor is internally protected from excessive current and temperature.
Muffler in discharge line reduces operating sound levels.
Compressor is installed in the unit on resilient rubber mounts for vibration free operation.

OPTIONS

Compressor Crankcase Heater
Protects against refrigerant migration that can occur during low ambient operation.

CONTROLS

Defrost Control
Time-initiated, temperature-terminated defrost system.
Defrost control features built-in diagnostics for easier service.
Defrost control has short cycle protection to protect compressor.
Defrost control is Quiet Shift™ capable.
Defrost cycle is field selectable 30/60/90 minutes.

OPTIONS

Indoor Blower Off Delay Relay
Delays the indoor blower-off time during the cooling cycle.

Compressor Low Ambient Cut-Off
Non-adjustable switch (low ambient cut-out) prevents compressor operation when outdoor temperature is below 35°F.

Low Ambient Kit
Heat pumps operate satisfactorily in the cooling mode down to 45°F outdoor air temperature without any additional controls.
Low Ambient Control Kit allows unit operation down to 30°F.
NOTE - Freezeast should be installed on compressors equipped with a low ambient kit.

Mild Ambient Kit
Heat pump units operate satisfactorily in the heating mode at outdoor air temperatures up to 75°F.
Mild Weather Kit can be field installed, allowing heating operation above 75°F.

NOTE - Freezestat should be installed on compressors equipped with a low ambient kit.
**FEATURES**

**CABINET**
Heavy gauge steel cabinet with five station metal wash process.
Louvered panels can be quickly removed by loosening two screws per panel.
Controls located in corner post for installation and service accessibility.
Baked polyester paint finish over galvanized steel for maximum durability.
Rounded corners for safety.
Raised base pan with ports allows water and debris drainage.

**Refrigerant Line Connections, Electrical Inlets, Service Valves**
Sweat connection vapor and liquid lines are located on corner of unit cabinet.
Fully serviceable brass service valves prevent corrosion and provide access to refrigerant system. Vapor valve can be fully shut off, while liquid valve may be front seated to manage refrigerant charge while servicing system.
Refrigerant line connections and field wiring inlets are located in one central area of cabinet for easy access. See dimension drawing.

**INSTALLATION CLEARANCES - INCHES (MM)**

- **NOTES:**
  Service clearance of 30 in. (762 mm) must be maintained on one of the sides adjacent to the control box.
  Clearance to one of the other three sides must be 36 in. (914 mm).
  Clearance to one of the remaining two sides may be 12 in. (305 mm) and the final side may be 6 in. (152 mm).
  A clearance of 24 in. must be maintained between two units. 48 in. (1219 mm) clearance required on top of unit.
OPTIONAL CONVENTIONAL TEMPERATURE CONTROL SYSTEMS - FIELD INSTALLED

COMMERCIAL TOUCHSCREEN THERMOSTAT

Intuitive Touchscreen Interface - **Two Stage Heating / Two Stage Cooling**

**Conventional or Heat Pump** - Seven Day Programmable - Four Time Periods/Day - Economizer Output - Title 24 Compliant - ENERGY STAR® Qualified - Backlit Display - Automatic Changeover

Sensors For Touchscreen Thermostat

1. Remote non-adjustable wall mount 20k temperature sensor................................. C0SNZN01AE2-
   (47W36)
2. Remote non-adjustable wall mount 10k averaging temperature sensor .......... C0SNZN73AE1-
   (47W37)
3. Remote non-adjustable duct mount temperature sensor................................. C0SNDC00AE1-
   (19L22)

Outdoor temperature sensor ................................................................................. C0SNSR03AE1-

**NOTE** - Extremes of operating range are plus 10% and minus 5% of line voltage.

1 Refrigerant charge sufficient for 15 ft. length of refrigerant lines.
2 HACR type circuit breaker or fuse.
3 Refer to National or Canadian Electrical Code manual to determine wire, fuse and disconnect size requirements.
4 Freezeast is recommended with Low Ambient Control.
