

ENGINEERING DATA

Bulletin No. 210356

December 2008

Supersedes February 2007

**AFUE - 80%****Input - 66,000 to 132,000 Btuh  
Nominal Add-on Cooling - 2 to 5 Tons****MODEL NUMBER IDENTIFICATION****G 60 DF V - 36A - 070 X**

Unit Type

G = Gas Furnace

Series

60 = 2 Stage 80% Minimum AFUE

Configuration

DF = Down-Flow

Blower

V = Variable Speed Blower Motor

Low NO<sub>x</sub> = Units meet California Nitrogen Oxides standards

Nominal Gas Heat Input (High Fire)

070 = 66,000 Btuh

090 = 88,000 Btuh

110 = 110,000 Btuh

135 = 132,000 Btuh

Cabinet Width

A = 14-1/2 in.

B = 17-1/2 in.

C = 21 in.

D = 24-1/2 in.

Nominal Add-On Cooling Capacity

36 = 2-3.5 tons

60 = 3.5-5 Tons

## FEATURES

### WARRANTY

**Duralok® Aluminized Steel Heat Exchangers - Limited twenty year warranty** in residential applications, ten years in non-residential applications.

**All other covered components - Limited ten year warranty** in residential applications and one year in non-residential applications.

Refer to Lennox Equipment Limited Warranty certificate included with equipment for details.

### APPROVALS

Units certified by CSA International and ratings are certified by GAMA.

Units tested and rated according to US DOE test procedures and FTC labeling regulations.

Approved by California Energy Commission and meet California Seasonal Efficiency requirements and California Nitrogen Oxides (NO<sub>x</sub>) Standards.

"X" models meet California Nitrogen Oxides (NO<sub>x</sub>) Standards.

Blower data from unit tests conducted in Lennox Laboratory air test chamber.

ISO 9001 Registered Manufacturing Quality System.

### APPLICATIONS

Input capacities (high fire) of 66,000, 88,000, 110,000 and 132,000 Btuh.

Energy efficiency (AFUE) of 80.0%.

Utility room, alcove, closet or attic installation.

Variable speed blower is ideal for zoning applications.

Lennox add-on indoor coils, high-efficiency air cleaners and humidifiers can easily be added to furnace.

Shipped factory assembled with all controls installed and wired.

Each unit factory test operated to insure proper operation.

#### Zoning Applications

Units may be used with certain zoning systems. Zone control panel must be able to interface and communicate with the variable speed blower motor in the unit. Lennox Harmony III™ Zone Control Panel has this capability.

### HEATING SYSTEM

#### 1 SilentComfort™ Technology

Patent pending burner sound enclosure and extra cabinet insulation reduces operating sound levels.

#### 2 Lennox DuraLok™ Aluminized Steel Heat Exchanger

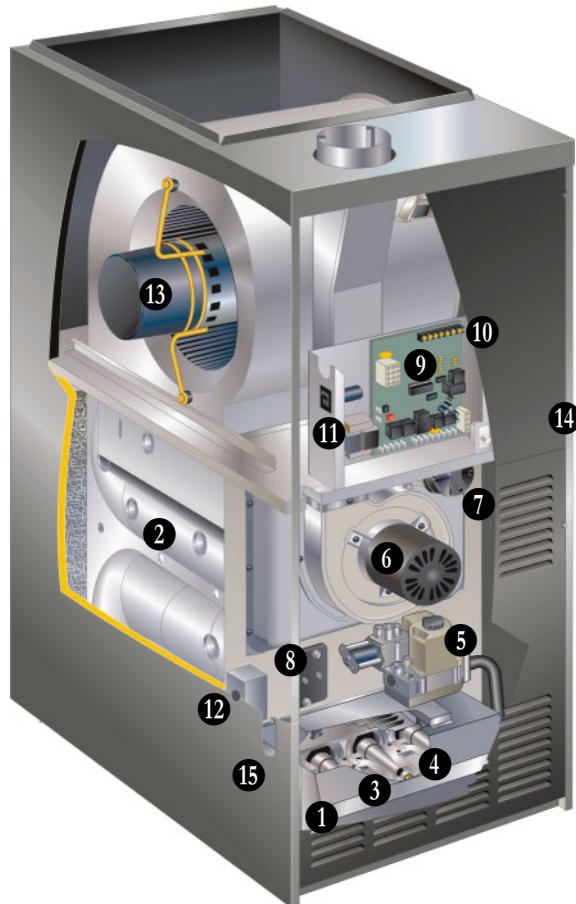

Heavy gauge aluminized steel heat exchanger.

Crimped seam clamshell type design.

Designed for normal expansion and contraction.

Minimum resistance to air flow.

Heat exchanger has been laboratory life cycle tested.

#### 3 SureLight® Hot Surface Ignitor

Tough, reliable, long-life, trouble-free performance. Tungsten heater element sandwiched between two plates of silicon nitride.

Cemented to steatite block for protection against current leakage.

Ignition leads constructed of nickel plated copper enclosed in high temperature Teflon insulation for dependable operation.

No electrical noise.

#### 4 Inshot Burners

Aluminized steel inshot burners provide efficient, trouble-free operation.

Burner venturi mixes air and gas in correct proportion for proper combustion.

Burner box assembly is removeable from the unit as a single component for ease of service.

Patent pending sound enclosure reduces operating sound levels.

#### 5 Two Stage Gas Control Valve

24 volt redundant combination two stage gas control valve combines manual shut off valve (On-Off), automatic electric valve (dual) and gas pressure regulation into a compact combination control.

#### 6 Two Speed Combustion Air Inducer

Shaded pole heavy duty two speed blower prepurges heat exchanger and safely vents flue products.

7 Dual pressure switches (low fire/high fire) prove blower operation before allowing gas valve to open.

Operates only during heating cycle.

## FEATURES

### 8 Limit Controls

Automatic reset, primary and secondary limits are accurately located.  
Primary limit factory installed on vestibule panel on all units, secondary limit factory installed on blower housing.

### Flame Rollout Switches (2)

Manual reset.  
Factory installed on burner box.  
Switches provide protection from abnormal operating conditions.

## OPTIONS

### High Altitude Orifice Kit - natural gas models only

Required on all natural gas units for proper unit operation at altitudes from 7,501 to 10,000 ft.  
Proper orifice for LPG/Propane models is included with optional LPG/Propane Conversion Kit.

### High Altitude Pressure Switch Kit

Required on most units for proper unit operation at altitudes above 4,500 ft.

### LPG/Propane Conversion Kit

Required for field changeover from natural gas.

### Natural Gas Conversion Kit

Required for field changeover from LPG/Propane to natural gas.

## CONTROLS

### 9 SureLight® Integrated Two Stage / Variable Speed Blower Control

Solid-state board contains all necessary controls and relays to operate furnace.  
Combustion air inducer is controlled by board. Prior to ignition, a low speed pre-purge cycle for 15 seconds is initiated. After the main burners are turned off, a post-purge cycle for 5 seconds is run.

Adaptive technology of ignition control board continuously monitors and adjusts the ignitor power to operate at minimum ignitor temperature required for ignition, prolonging ignitor life.

Electronic flame sensor assures safe and reliable operation.

Should flame fail to ignite, flame sensor will initiate 4 re-attempts at ignition before locking out unit operation for 60 minutes.

Watchguard type circuit automatically resets ignition controls after one hour of continuous thermostat demand after unit lockout, eliminating nuisance calls for service.  
Jumper settings for single or two stage thermostat operation.

Two selectable second stage recognition times (10 and 15 minutes) are available on the board when the furnace is used with a single stage thermostat. When used with a two stage thermostat, furnace will only initiate second stage operation with a second stage thermostat demand.

Two LED's indicate heating status and aid in troubleshooting.

### 10 Two accessory terminals furnished for additional power supply requirements for 120 volt (less than 1 amp) power humidifiers and powered air cleaners.

Two blower speeds - second stage heat and second stage cool (with four air volume selections for each) are selected by DIP switches on board. Heat speed can be adjusted to optimize discharge temperature. Cool speed can be adjusted to correct optional cooling capacity. See Blower Performance tables.

First stage blower speed is a percentage of second stage speed.

The ADJUST switch (DIP) allows normal (NORM), 10% higher (+ plus) or 10% lower (- minus) motor speed selection within HEAT and COOL speeds selected for fine tuning air volume.

DELAY switch (DIP) allows one of four de-humidification profiles during cooling mode.

**Profile A** - Motor runs at 50% for 30 seconds, then at 82% for 7-1/2 minutes, then at 100% (if needed) until demand is satisfied. Once demand is met, motor runs at 50% for 30 seconds, then ramps down to stop.

**Profile B** - Motor runs at 82% for 7-1/2 minutes and then at 100% (if needed) until demand is satisfied. Once demand is met, motor ramps down to stop.

**Profile C** - Motor runs at 100% until demand is satisfied. Once demand is met, motor runs at 100% for 60 seconds, then ramps down to stop.

**Profile D** - Motor runs at 100% until demand is satisfied. Once demand is met, motor ramps down to stop.

In heat mode, blower on time is fixed at 45 seconds, blower off time is adjustable from 60, 90, 120 and 180 seconds (factory setting - 90 seconds).

Control has four status lights (CFM, ON/OFF, HTG BLOWER, HI/LOW) to assist in servicing.

For air-conditioning applications, blower on time is 2 seconds following thermostat demand for cooling.

Board controls evaporator humidity by controlling blower and compressor speed on two stage outdoor units when used with humidity control or Lennox SignatureStat.

### 11 24 Volt Transformer

Furnished and factory installed in control box.  
40VA transformer has circuit breaker wired in series.  
Note - 50VA transformer is required when unit is used with Harmony Zone Control System. Ordered separately. See Price Book.

### 12 Field Wiring Make-up Box

Furnished for line voltage wiring.  
Factory installed internally on left side of furnace.  
Box may be installed internally or externally on either side of furnace.

## OPTIONS

### ComfortSense™ 7000 Touchscreen Thermostat

Electronic 7-day, universal, multi-stage, programmable, touchscreen thermostat.

4 Heat/2 Cool.

Auto-changeover.

Controls humidity during cooling mode.

Offers enhanced capabilities including humidification / dehumidification / dewpoint measurement and control, Humiditrol® control, and equipment maintenance reminders.

Easy-to-use, menu driven thermostat with a back-lit, LCD touchscreen.

Remote outdoor temperature sensor (optional) allows the thermostat to display outdoor temperature. Required in dual fuel and Humiditrol® applications.

See the ComfortSense™ 7000 Engineering Handbook bulletin in the Controls section for more information.

## Thermostat

See Thermostat bulletins in Controls section and Lennox Price Book for a complete list of thermostats.

## FEATURES

### **BLOWER**

#### **Variable Speed Direct Drive Blower**

Each blower assembly statically and dynamically balanced.

Change in blower speed is easily accomplished by simple DIP switch change on SureLight® Integrated Furnace Two Stage / Variable Speed Blower Control.

See Blower Performance tables.

Blower assembly easily removed for servicing

### **13 Variable Speed Blower Motor**

Variable speed motor maintains specified air volume from 0 though 0.80 in. w.g. static range.

Variable speed operation is achieved by the use of an ECM (Electronically Commutated Motor) motor.

Motor is controlled by SureLight® Integrated Furnace Two Stage / Variable Speed Blower Control.

Motor is resiliently mounted.

When furnaces are used with Harmony Zone Control System, blower motor operates from predetermined minimum - maximum air volumes to satisfy zone requirements.

### **FILTER (NOT FURNISHED)**

Filter and provisions for external mounting must be field provided.

### **CABINET**

Low profile, narrow width cabinet allows easy installation. Heavy gauge cold rolled steel constructed.

Pre-painted cabinet finish.

Flue outlet on top of cabinet.

Flanges provided on return air opening for ease of plenum connection.

Fully insulated cabinet with foil faced insulation on sides and back of heating compartment and mat faced insulation in blower compartment.

Complete service access.

**14** Tool-less latches on burner and blower doors assure positive lock.

Safety interlock switch automatically shuts off power to unit when blower compartment access door is removed.

**15** Gas piping and electrical inlets are provided in both sides of cabinet.

### **Coil Match-Up**

All furnaces exactly match CR33 cased, down-flow indoor coils with furnished adaptor rails.

### **OPTIONS**

#### **Down-Flow Additive Base**

Required for heating only units installed on combustible floors.

Not required in add-on cooling applications.

See Dimension drawing.

| Flue            | 1 inch (25 mm)           | 6 inches (152 mm)            |

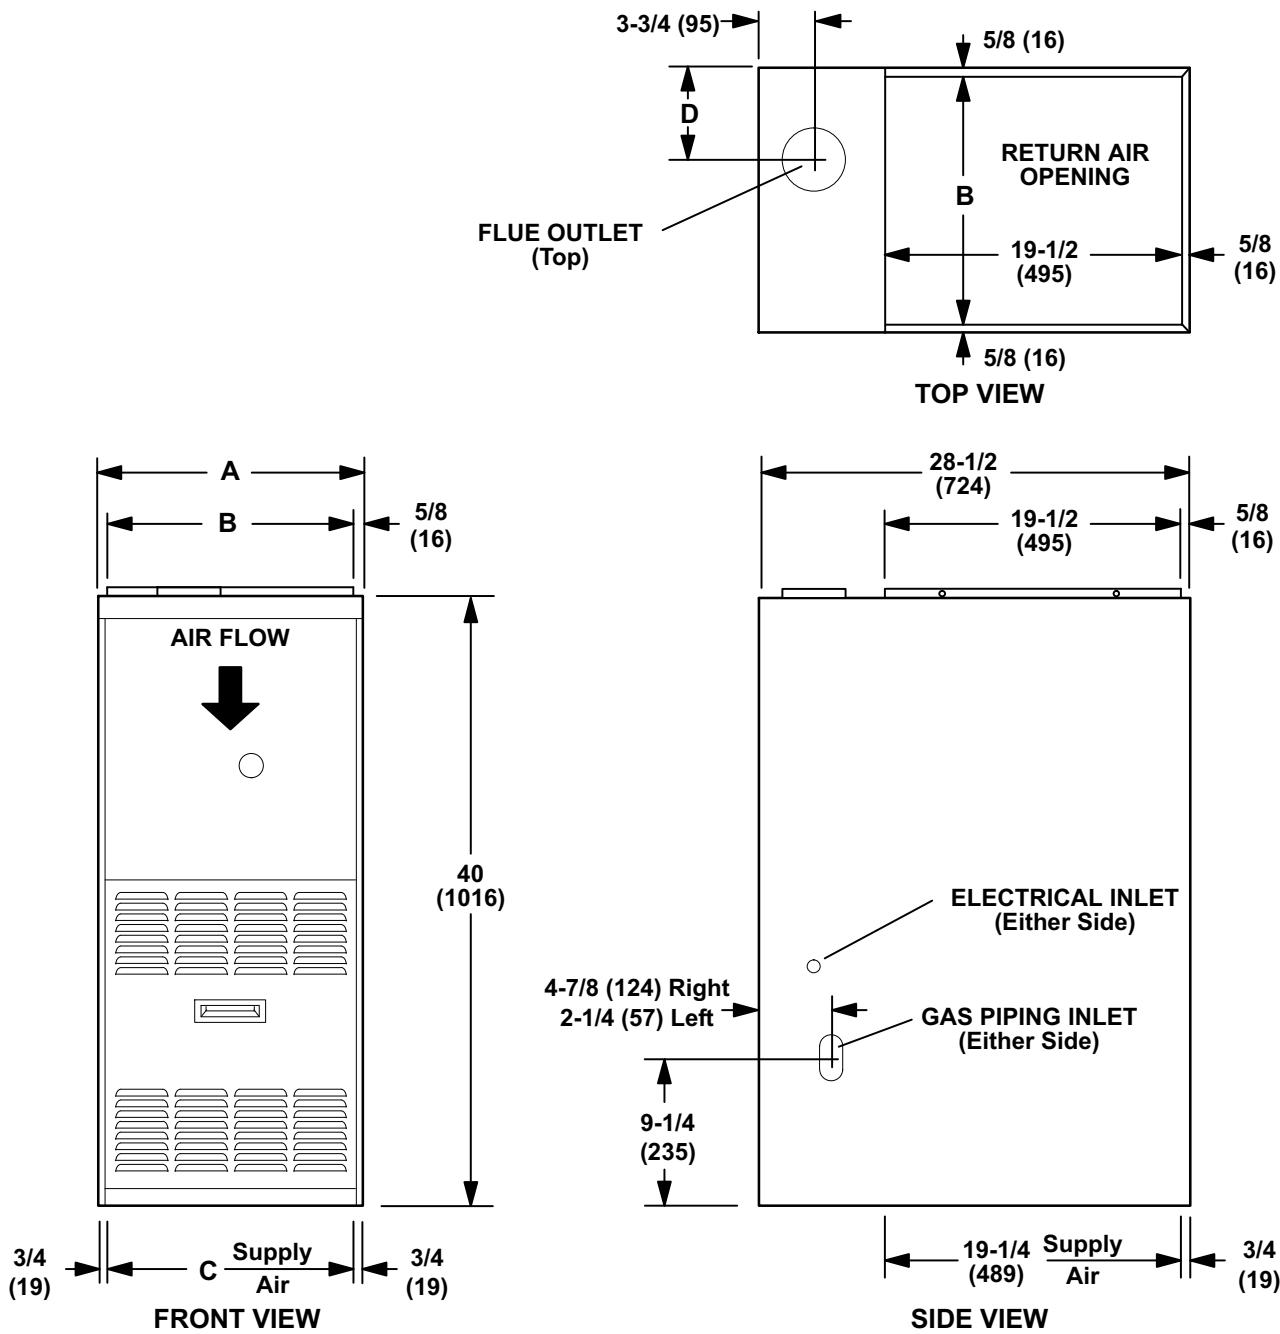

NOTE - Air for combustion must conform to the methods outlined in the National Fuel Gas Code (NFPA 54/ANSI-Z223.1) or the National Standard of Canada CAN/CSA-B149.1 "Natural Gas and Propane Installation Code".

NOTE - In the U.S. flue sizing must conform to the methods outlined in the current National Fuel Gas Code (NFPA 54/ANSI-Z223.1) or applicable provisions of local building codes. In Canada flue sizing must conform to the methods outlined in National Standard of Canada CAN/CSA-B149.1.

<sup>1</sup> Left side requires 4 in. clearance if single wall vent is used on 14-1/2 in. "A" width cabinets, and 2 in. clearance on 17-1/2 in. "B" width cabinets.

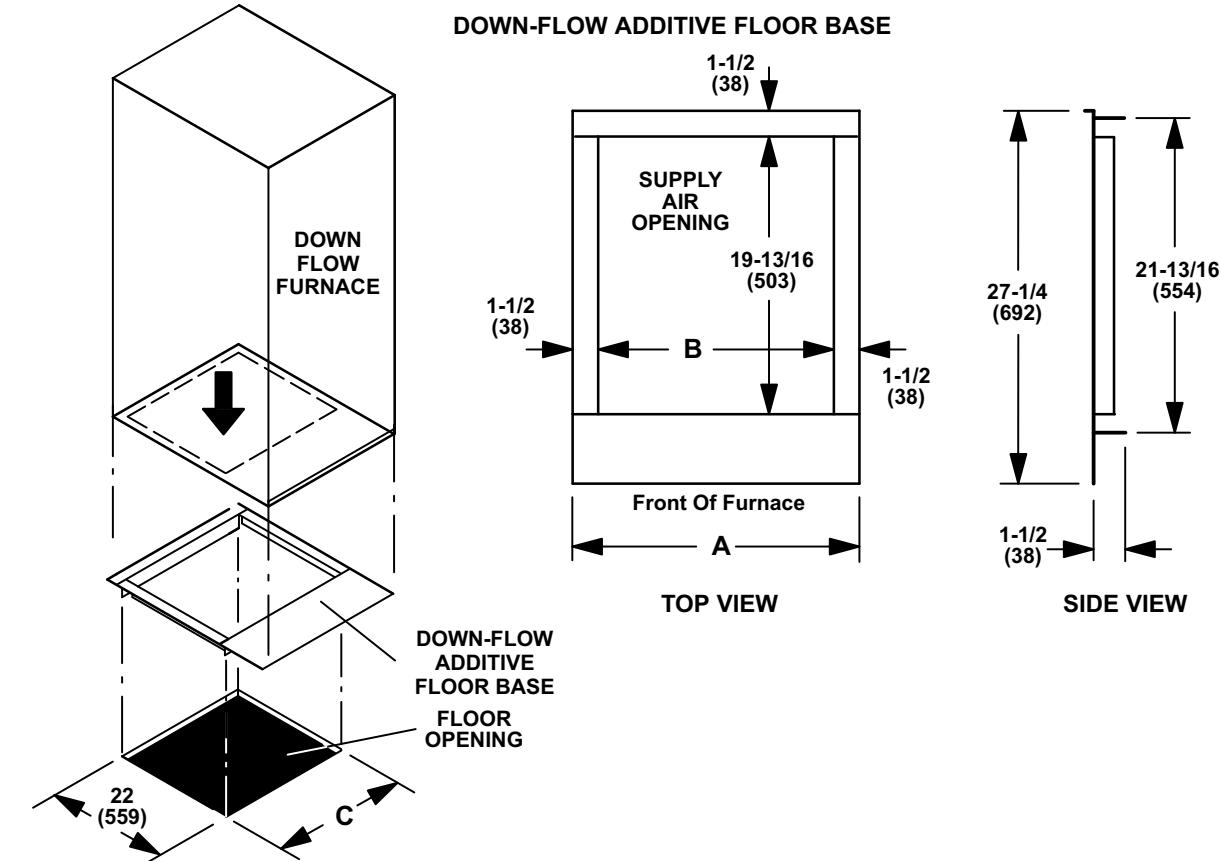

<sup>2</sup> Clearance for installation on combustible floor if optional additive base is installed between furnace and combustible floor. Not required in add-on cooling applications if installed in accordance with local codes or National Fuel Gas Code ANSI-Z223.1.

<sup>1</sup> Factory default jumper setting.

NOTES - The effect of static pressure is included in air volumes shown.

Continuous Fan Only speed is approximately 38% of the same second stage COOL speed position.

Lennox Harmony III™ Zone Control Applications - Minimum blower speed is 520 cfm.
