

# HS18 SERIES EXPANSION VALVE SYSTEM CONDENSING UNITS

(1 thru 5 Nominal Ton)

**\*12,000 to 62,000 Btuh Cooling Capacity**

\*DOE and ARI 210 Standard Ratings

### Lennox HS18 Series Condensing Units Provide Low Cost Installation With Maximum Cooling Efficiencies

High efficiency, compact size and operational dependability have been featured in the design of the HS18 series of condensing units. Available in 1 thru 5 nominal ton sizes with seasonal energy efficiency ratings of up to 10.40 and cooling capacities of 12,000 to 62,000 Btuh. Units are applicable to expansion valve systems and are compatible to a variety of matching Lennox blower powered and furnace add-on evaporator units, See ARI Ratings table. For complete data see evaporator unit bulletins indexed in Coils-Blower Coil Units section. Compact design of condensing unit cabinet and vertical discharge of air provides ease of concealment for installation on a slab at ground level or on a roof.

Weather resistant cabinet is constructed of galvanized steel with a baked-on outdoor enamel paint finish for maximum protection from rust and corrosion. Extra large four sided wraparound coil provides maximum cooling efficiency. Additionally, cooling efficiency is increased by the use of durable copper tubing and ripple-edged aluminum lanced fins. Powerful direct drive fan with totally enclosed motor draws air thru the entire coil and discharges it up and away from shrubs and lawn. Rugged, PVC coated steel wire fan and coil guards are furnished. Compressor is protected from excessive current and temperatures. Electrical control box is located for easy access. Service valves and refrigerant line connections are externally located. Available as options to be ordered extra are; thermostat, timed-off control, low ambient kit, crankcase heater, mounting base and refrigerant line sets.

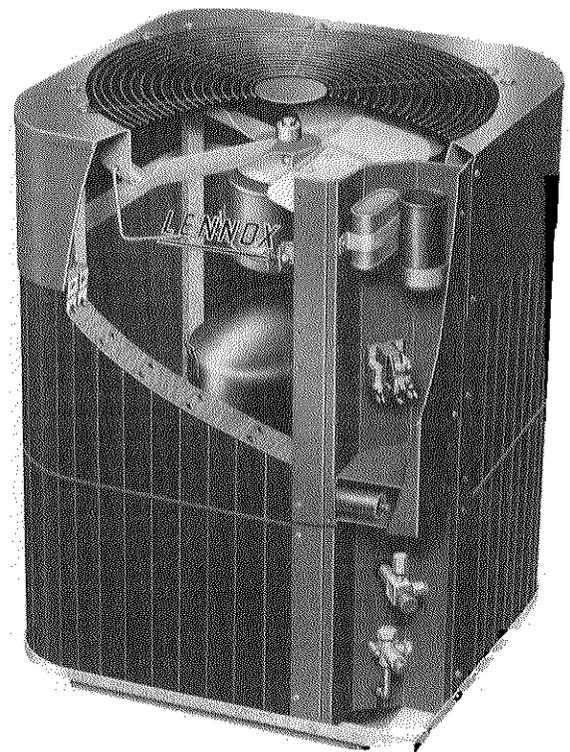

Condensing units are shipped factory assembled, piped and wired. In addition, each unit is test operated at the factory to ensure proper operation. The installer has only to set condensing unit in the desired location, connect refrigerant lines and make electrical connections to complete a low cost installation.

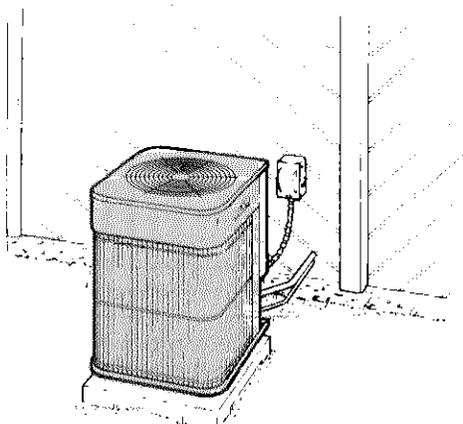

CERTIFICATION APPLIES ONLY WHEN USED WITH PROPER COMPONENTS AS LISTED WITH AIR

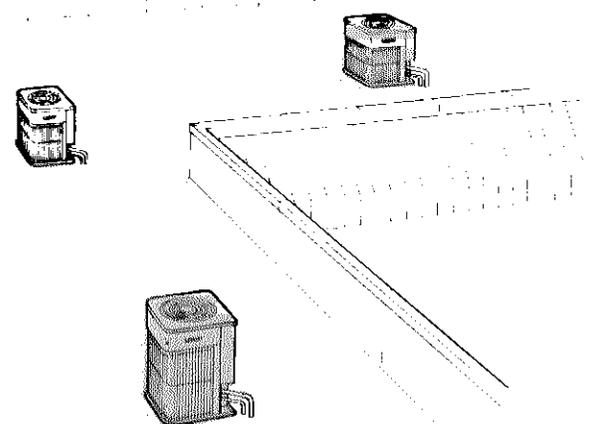

CERTIFICATION APPLIES ONLY WHEN USED WITH PROPER COMPONENTS AS LISTED WITH AIR

### Typical Applications

Unit on slab at grade level

Multiple units on rooftop

## FEATURES

**Durable Weather Resistant Cabinet** - Heavy gauge galvanized steel cabinet is subject to a five station metal wash process. This preparation process results in a perfect bonding surface for the finish coat of baked on enamel. The outdoor enamel paint finish gives the cabinet long lasting protection from the weather. Drainage holes are furnished in base channels for moisture removal. Heavy duty channels under the base raise the unit off the mounting surface away from damaging moisture.

**Accessible Control Box** - Conveniently located for easy access. All controls are pre-wired at the factory.

**Dependable and Quiet Compressor** - Reliable compressor is hermetically sealed and provides trouble free operation and long service life. Built-in protection devices assure protection from excessive current and temperatures. Suction cooled and overload protected. The entire running gear is spring mounted within the sealed housing. In addition, the compressor is installed in the unit on resilient rubber mounts assuring quiet and vibration free operation.

**Crankcase Heater (Optional)** - Available for HS18 211 through HS18 410 models. Crankcase heaters (P 8 8852) are not furnished and must be ordered extra. Heaters prevent migration of liquid refrigerant into the compressor and ensure proper compressor lubrication. HS18-141, HS18-460, HS18-510 and HS18-650 model compressors are equipped with crankcase heaters and are furnished as standard with the unit.

**Powerful Condenser Fan** - Efficient direct drive fan moves large volumes of air uniformly through the entire condenser coil resulting in high refrigerant cooling capacity. Vertical discharge of air minimizes operating sounds and eliminates hot air damage to lawn and shrubs. Fan motor is totally enclosed for maximum protection from weather, dust and corrosion. A rain shield on the motor provides additional protection from moisture. Fan service access is accomplished by removal of fan guard. Corrosion resistant PVC coated steel wire fan guard is furnished as standard.

**Copper Tube/Enhanced Fin Coil** - Lennox designed and fabricated coil is constructed of precisely spaced ripple-edged aluminum fins machine fitted to seamless copper tubes. Extra large four sided wrap around coil configuration provides extra large surface area with low air resistance. Lanced fins provide maximum exposure of fin surface to air stream resulting in excellent heat transfer. In addition, fins are equipped with collars that grip the tubing for maximum contact area. Precise circuiting provides uniform refrigerant distribution for high efficiency. Flared shoulder tubing connections and silver soldering provide tight, leakproof joints. Long life copper tubing is corrosion-resistant and easy to field service. Coil is thoroughly factory tested under high pressure to insure leakproof construction. Entire coil is accessible for cleaning. Non-corrosive PVC coated steel coil guard is furnished as standard.

**High Pressure Switch** - Furnished on HS18-141, 311, 410, 460, 510 and 650 models. Shuts off unit if abnormal operating conditions cause the discharge pressure to rise above setting. Protects the compressor from excessive condensing pressure. Manual reset.

**Refrigerant Line Connections, Electrical Inlets and Service Valves** - Suction and liquid line connections are located outside of the cabinet and are made with sweat connections. Brass service valves prevent corrosion and provide access to refrigerant system. Thermometer well is located in the liquid line to check refrigerant charge. One-shot suction valve, liquid line service valve and gauge ports are accessible outside of the cabinet. A filter drier is furnished on the HS18 460, HS18 510 and HS18 650 models. Refrigerant line connections, valves and field wiring inlets are all conveniently located in one central area of the cabinet. See dimension drawing.

**Thermostat (Optional)** - Thermostat is not furnished with the unit and must be ordered extra. See Lennox Price Book.

**Timed-Off Control (Optional)** - Timed-off control (LB-50709BA) is available as optional equipment for field installation. Prevents compressor short-cycling and also allows time for suction and discharge pressure to equalize, permitting the compressor to start in an unloaded condition. Automatic reset control will shut the compressor off and hold it off for 5 minutes.

**Refrigerant Line Kits (Optional)** - Lines are available in several lengths and must be ordered extra. See Refrigerant Line Kit table. The refrigerant lines (suction and liquid) are shipped refrigeration clean. Lines are cleaned, dried, pressurized and sealed at the factory. Suction line is fully insulated. Lines are furnished with a flare fitting (evaporator unit connection) on one end and less any fitting (stubbed) on the opposite end for connection to the condensing unit.

**Low Ambient Kit (Optional)** - Expansion valve system condensing units will operate satisfactorily down to 50°F outdoor air temperature without any additional controls. For cases where operation of the unit is required below 50°F a Low Ambient Control Kit (LB-57113BA) can be added in the field, enabling it to operate properly down to 0°F. Low ambient kit requires the use of an expansion valve.

**Mounting Base (Optional)** - Rugged mounting base provides permanent foundation for condensing units. High density polyethylene structural material is lightweight, sturdy, sound absorbing and will withstand the rigors of the sun, heat, cold, moisture, oil and refrigerant. Will not mildew or rot. Can be shipped singly or in packages of 6 to a carton. HS18-141-211-261 311 410 460 models use the MB1-22 base (99C78) 22-1/4" x 22-1/4" x 3" shipping weight 10 lbs. HS18-510-650 models use the MB1-32 base (83C83) 32" x 34" x 3" shipping weight 15 lbs.

**Expansion Valve Kits (Optional)** - Must be ordered extra and field installed on most evaporator units. See ARI Ratings table for kit requirement.

**Approvals** - Condensing units have been tested in the Lennox Research Laboratory environmental test room and rated according to U.S. Department of Energy (DOE) test procedures and in accordance with ARI Standard 210.81. In addition, units have been sound rated in the Lennox reverberant sound test room and rated according to ARI Standard 270-84. Condensing units and components within are bonded for grounding to meet safety standards for servicing required by U.L. and N.E.C. Units are also U.L. Listed.

## SPECIFICATIONS

Model No.			HS18-141	HS18-211	HS18-261	HS18-311
Condenser Coil	Net face area (sq. ft.)	Outer coil	8.4	8.4	8.4	9.2
		Inner coil	----	----	----	----

## FIELD WIRING

- A - Two wire power (not furnished)
- B - Two or Three wire power (not furnished) - See electrical data
- C - Two wire low voltage (not furnished) - 18 ga. minimum
- D - Four wire low voltage (not furnished) - 18 ga. minimum

All wiring must conform to NEC and local electrical codes.

HS18-650	*Not Available	----	3/8	1-1/8

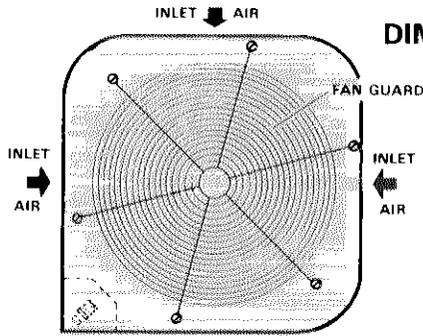

\*Field fabricate.

## INSTALLATION CLEARANCES (inches)

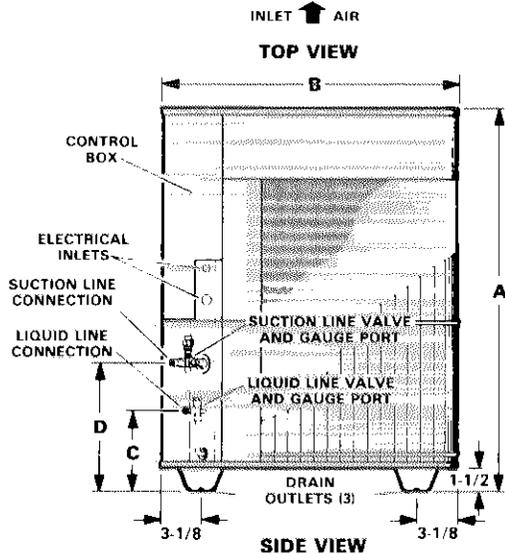

NOTE - 48 inch clearance required on top of unit.  
 \*NOTE - One side must be 36 inches for service.  
 Two of the remaining sides may be 12 inches.

NOTE - All values are gross capacities and do not include evaporator coil blower motor heat deduction.

## RATINGS

NOTE — To determine sensible capacity, leaving wet bulb and dry bulb temperatures not shown in the tables, see Miscellaneous Engineering Data section, Page 9.
